

Weekly Compilation of
**Presidential
Documents**

Monday, October 18, 1999
Volume 35—Number 41
Pages 1991–2064

Contents

Addresses and Remarks

American Academy of Pediatrics—2006
Canada, Forum of Federations Conference in
Mont-Tremblant—1991
Comprehensive Nuclear-Test-Ban Treaty,
Senate action—2026
Democratic Leadership Council gala—2027
Forest “Roadless” Areas—2020
Illinois, U.S. Hispanic Leadership Institute
conference in Chicago—2000
Millennium Evening at the White House,
eighth—2015
National Summit on Community Food
Security, videotape remarks—2050
NCAA men’s and women’s basketball
champions—2053
Philip Morris company admission—2020
Radio address—1998
U.S. Secret Service Memorial Building,
dedication—2048
Virginia, George Washington National
Forest—2020
Youth violence, unveiling public service
announcements—2055

Appointments and Nominations

Defense Department
Commander in Chief, United States Space
Command, and related positions,
statement—2051

Appointments and Nominations—Continued

Supreme Allied Commander Europe,
statement—2052
Vice Chairman of the Joint Chiefs of Staff,
statement—2051

Bill Signings

Department of Transportation and Related
Agencies Appropriations Act, 2000,
statement—2005
Family farmers, statement on legislation to
extend bankruptcy relief—2006

Communications to Congress

Caribbean Basin Economic Recovery Act,
message transmitting report—2015
Cuba, message transmitting report on
telecommunications payments—2025
East Timor, letter transmitting report on
deployment of U.S. forces to provide
support to the multinational force—1998
Food Aid Convention 1999 with
documentation, message transmitting—2025
Naval Petroleum Reserves, message
transmitting report—2004

Editor’s Note: The Weekly Compilation of Presidential Documents is also available on the Internet on the *GPO Access* service at <http://www.gpo.gov/nara/nara003.html>.

WEEKLY COMPILATION OF PRESIDENTIAL DOCUMENTS

Published every Monday by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, the *Weekly Compilation of Presidential Documents* contains statements, messages, and other Presidential materials released by the White House during the preceding week.

The *Weekly Compilation of Presidential Documents* is published pursuant to the authority contained in the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15), under

regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (37 FR 23607; 1 CFR Part 10).

Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, DC 20402. The *Weekly Compilation of Presidential Documents* will be furnished by mail to domestic subscribers for \$80.00 per year (\$137.00 for mailing first class) and to foreign subscribers for \$93.75 per year, payable to the Superintendent of Documents, Government Printing Office, Washington, DC 20402. The charge for a single copy is \$3.00 (\$3.75 for foreign mailing).

There are no restrictions on the republication of material appearing in the *Weekly Compilation of Presidential Documents*.

Contents—Continued

Communications to Federal Agencies

Forest “Roadless” Areas, memorandum on protection—2023
Individual Training Accounts for Federal Workers, memorandum—2053
School-Based Health Insurance Outreach for Children, memorandum—2013
White House Council on Youth Violence, memorandum—2059

Interviews With the News Media

Exchange with reporters outside the Oval Office—2026
News conference, October 14 (No. 182)—2035

Joint Statements

Joint United States-Norway Statement—2060

Meetings With Foreign Leaders

Canada, Prime Minister Chretien—1991
Norway, Prime Minister Bondevik—2060

Proclamations

Columbus Day—1997
National Forest Products Week—2063
White Cane Safety Day—2062

Statements by the President

See also Appointments and Nominations; Bill Signings
Death of former President Julius Nyerere of Tanzania—2052

Digest of other White House announcements—2063
Nominations submitted to the Senate—2064

Week Ending Friday, October 15, 1999

**Remarks to the Forum of
Federations Conference
in Mont-Tremblant, Canada**
October 8, 1999

Thank you. Thank you so much. Prime Minister Chretien; to the Prime Minister of Saint Kitts and Nevis, Denzil Douglas; Premier Bouchard; cochairs of this conference, Bob Rae and Henning Voscherau; to distinguished visitors; Governors—I think the Lieutenant Governor of South Dakota, Carole Hillard, is here—and to all of you: I think it is quite an interesting thing that we have this impressive array of people to come to a conference on federalism, a topic that probably 10 or 20 years ago would have been viewed as a substitute for a sleeping pill. *[Laughter]*

But in the aftermath of the conflicts in the former Yugoslavia; the interesting debates—at least I can say this from the point of view as your neighbor—that has gone on in Quebec; the deepening, troubling efforts to reconcile different tribes who occupy nations with boundaries they did not draw in Africa; and any number of other issues, this topic of federalism has become very, very important.

It is fitting that the first global conference would be held here in North America, because federalism began here—a founding principle forged in the crucible of revolution, enshrined in the Constitution of the United States, shared today by all three nations on our continent, as I'm sure President Zedillo said.

It is also especially fitting that this conference be held in Canada. A land larger than China, spanning 5 time zones and 10 distinct provinces, it has shown the world how people of different cultures and languages can live in peace, prosperity, and mutual respect.

In the United States, we have valued our relationship with a strong and united Canada. We look to you; we learn from you. The part-

nership you have built between people of diverse backgrounds and governments at all level is what this conference is about and, ultimately, what democracy must be about, as people all over the world move around more, mix with each other more, live in close proximity more.

Today I would like to talk briefly about the ways we in the United States are working to renew and redefine federalism for the 21st century; then, how I see the whole concept of federalism emerging internationally; and finally, how we—how I think, anyway—we should judge the competing claims of federalism and independence in different contexts around the world.

First let me say we are 84 days, now, from a new century and a new millennium. The currents of change in how we work and live and relate to each other, and relate to people far across the world, are changing very rapidly.

President Franklin Roosevelt once said that new conditions impose new requirements upon government and those who conduct government. We know this to be the case not only in the United States and Canada, Great Britain and Germany, Italy and France, Mexico and Brazil, but indeed, in all the countries of the world. But in all these places there is a federalist system of some form or another. We look for ways to imbue old values with new life and old institutions with new meaning.

In 1992, when I ran for President, there was a growing sense in the United States that the compact between the people and their Government, and between the States and the Federal Government, was in severe disrepair. This was driven largely by the fact that our Federal Government had quadrupled the national debt in 12 years, and that had led to enormous interest rates, slow growth, and grave difficulties on all the States of our land which they were powerless to overcome.

So when the Vice President and I ran for national office, we had no debate from people who said, "Look, this is a national priority and you have to deal with it." But we talked a lot to Governors and others about the necessity to create again what our Founding Fathers called the laboratories of democracy. We, frankly, admitted that no one knew all the answers to America's large welfare caseload, to America's enormous crime rate, to America's incredible diversity of children and challenges in our schools. And so we said we would try to give new direction to the Nation and deal with plainly national problems, but we would also try to build a new partnership that would make all of our States feel more a part of our union and more empowered in determining their own destiny.

Now, people develop this federalist system for different reasons. It came naturally to the United States because Great Britain set up colonies here as separate entities. And the States of our country actually created the National Government. So we always had a sense that there were some things the States were supposed to do and some things the Federal Government were supposed to do.

Our Founding Fathers gave us some indication in the Constitution, but the history of the United States Supreme Court is full of cases trying to resolve the whole question of what is the role and the power of the States as opposed to what is the role and the power of the National Government in ever new circumstances.

There are different examples elsewhere. For example, in the former Yugoslavia when it existed before, federalism was at least set up to give the appearance that all the different ethnic groups could be fairly treated and could have their voices heard.

So in 1992 it appeared that the major crisis in federalism was that the States had been disempowered from doing their jobs because the national economy was so weak and the fabric of the national society was fraying in America. But underneath that I knew that once we began to build things again we would have to resolve some very substantial questions, some of which may be present in your countries, as well.

As we set about to work, the Vice President and I, in an effort that I put him in

charge of, made an attempt to redefine the mission of the Federal Government. And we told the people of the United States that we actually thought the Federal Government was too large in size, that it should be smaller but more active, and that we should do more in partnerships with State and local governments and the private sector, with the ultimate goal of empowering the American people to solve their own problems in whatever unit was most appropriate, whether it was an individual citizen, the family, the community, the State, or the Nation.

And we have worked at that quite steadily. Like Canada, we turned our deficit around and produced a surplus. We also shrank the size of the Federal Government. The size of the United States Federal Government today is the same as it was in 1962, when John Kennedy was President, and our country was much, much smaller.

In the economic expansion we have been enjoying since 1993, the overwhelming majority of the jobs that were created were created in the private sector. It's the largest percentage of private sector job creation of any economic expansion in America since the end of World War II.

Meanwhile, many of our State and local governments have continued to grow in size, to meet the day-to-day demands of a lot of the domestic issues that we face in our country. And I think that is a good thing.

In addition to shrinking the size of Government, we've tried to empower the States to make more of their own decisions. For example, the Department of Education has gotten rid of two-thirds of the rules that it imposed on States and school districts when I became President. Instead, we say, "Here are our national objectives; here is the money you can have; you have to make a report on the progress at meeting these national objectives, but we're not going to tell you how to do it anymore." And it's amazing what you can do if you get people to buy into national objectives with which they agree, and you stop trying to micromanage every instance of their lives and their daily activities. So we found some good success there.

We've also tried to give the States just blanket freedom to try more new ideas in areas where we think we don't have all the

answers now, from health policy to welfare reform, to education to fighting crime.

We have always felt—this has been easy in the United States, though, compared to a lot of places because we've had this history of believing from the time of our Founders that the National Government would never have all the answers, and that the States should be seen as our friends and our partners because they could be laboratories of democracy. They could always be out there pushing the envelope of change. And certain things would be possible politically in some places that would not be possible in others.

And we have been very well served by that. It has encouraged a lot of innovation and experimentation. Here is the problem we have with the basic business of government and federalism today. In the 21st century world, when we find an answer to a problem, very often we don't have time to wait for every State to agree that that's the answer. So we try to jumpstart the federalist experience by looking for ideas that are working and then embodying them in Federal legislation and giving all the States the funds and other support they need to do it.

Why do we do this? Well, let me give you one example. In 1787, in the United States, the Founding Fathers declared that all the new territories would have to set aside land for public schools, and then gave the responsibility for public education to the States. Now, then, in the next few years, a handful of States mandated education. But it took more than 100 years for all of our States to mandate free public education for all of our children. That was 19th century pace of change. It's inadequate in the 21st century.

So I have tried to do what I did as a Governor. If something is working in a State, I try to steal it, put it into Federal law, and at least give all the States the opportunity and the money necessary to implement the same change. But it's very, very important.

Since our Ambassador is a native of Georgia, I'll give you one example. One of my goals is to make universal access to colleges and universities in America, and we now have something called the HOPE scholarship, modeled on Ambassador Giffin's home State program, which gives all students enough of a tax subsidy to at least afford the first 2 years

of college in America, because we found in a census that no matter where you come from in the United States, people with at least 2 years of education after high school tended to get jobs where their incomes grew and they did better. People with less than that tended to get jobs where their incomes stayed level or declined in the global economy.

Now, we've also tried to make dealing with Washington less of a problem. We've ended something that was very controversial, at least prospectively, called unfunded mandates, where the Federal Government would tell the States they had to do something and give them about 5 percent of the money it cost to do it. That, I think, is a problem in every national Federal system. We continue to give the States greater freedom and flexibility. And this summer I signed a new Executive order on federalism which would reaffirm in very specific ways how we would work in partnership and greater consultation with State and local officials.

Federalism is not a fixed system; it, by definition, has to be an evolving system. For more than 200 years, the pendulum of powers have swung back and forth one way or the other. And I do want to say—for those of you who may be looking outside in, thinking the Americans could never understand our problems, they don't have any problems like this—it is true that, by and large, in our State units we don't have people who are of just one racial or ethnic or religious groups. But to be sure, we have some of that. I'll give you one example that we're dealing with today.

The United States Supreme Court has to decide a case from the State of Hawaii in which the State has given native Hawaiians, Pacific Islanders, the right to vote in a certain kind of election—and only native Hawaiians. And someone in Hawaii has sued them, saying that violates the equal protection clause of the United States Constitution. We disagree because of the purpose of the election.

But you can see this is a federalist issue. We basically said the National Government would give that to the States, the States want to do it this way; then a citizen says, "No, you can't do that under national law."

Another example that causes us a lot of problems in the West—what happens when the Federal Government actually owns a lot of the land and the resources of a State? The National Government is most unpopular in America in States like Wyoming or Idaho, where there aren't very many people; there's a lot of natural resources. Cattlemen, ranchers have to use land that belongs to the Federal Government, and we feel that we have to protect the land for multiple uses, including environmental preservation as well as grazing or mining or whatever. And so it's an impossible situation.

It's very funny—in these States, when we started, the Federal Government was most popular in the areas where we own most of the land, because we built dams and channeled rivers and provided land for people to graze their cattle. And within 50 years, the Federal Government has become the most unpopular thing imaginable. Now, I used to go to Wyoming on vacation just to listen to people tell me how terrible the job I had was. *[Laughter]* But it's a problem we have to face.

And let me say one other thing I think might be interesting to you is that the Democratic Party and the Republican Party in the United States tend to have different ideas about federalism depending on what the issue is, which is why it's always good to have a dynamic system.

For example, we Democrats, once we find something working at the local level that advances our social policy, or our economic policy, we want to at least make it a national option, if not a national mandate. When I became President, crime was going up, but there were cities where crime was going down. I went there and found out why it was going down. And it was obvious to me we didn't have enough police officers preventing crime in the first place, so I said we're going to create 100,000 police at the national level and give them to the cities.

The conservatives were against that. They said, "You're interfering with State and local rights, telling them how to fight crime." Of course, I wasn't; I was giving them police. They didn't have to take them if they didn't want them. *[Laughter]* And it turned out they liked it quite well; we have the lowest crime

rate in 26 years. But there was a genuine federalism dispute.

Now we're having the same dispute over teachers. We have the largest number of children in our schools in history; lots of evidence that smaller classes in the early grades yield permanent learning gains to children. So I said, now let's put 100,000 teachers out there. And they say I'm trying to impose this terrible burden on State and local governments, sticking my nose in where it doesn't belong.

On the other hand, in the whole history of the country, personal injury law, including economic injuries, commercial law has always been the province of State and local government except for things like securities, stocks, bonds, things that required a national securities market. But many people in the Republican Party believe that since there is essentially a national economy and an international economic environment, that we should take away from the States all their States' rights when it comes to determining the rules under which people can sue businesses. And they really believe it.

And I have agreed with them as it applies to securities litigation because we need a national securities market. But I have disagreed with them as it applies to other areas of tort reform where they think it's a bad thing that there is State rights.

And I say this not to attack the other party, but only to illustrate to all of you that in whatever context you operate, there will always be differences of opinion about what should be done nationally and what should be done at the State level. That cannot be eliminated. The purpose of federalism, it seems to me, is to, number one, take account of the genuinely local feelings which may be, in the United States, a result of economic activities and ties to the land and history; or it may be in another country the result of the general segregation of people of various racial, ethnic, or religious groups into the provinces in the Federal system.

So the first process is to give people a sense of their identity and autonomy. And then you have to really try to make good decisions so that the system works. I mean, in the end, all these systems only have integrity if the allocation of decisionmaking authority

really produces results that people like living with, so they feel that they can go forward.

Now, let me just discuss a minute what is sort of the underlying tension here that you see all across the world, which is, what is the answer to the fact that on the edge of a new millennium—where we would prefer to talk about the Internet, and the decoding of the human gene, and the discovery of billions of new galaxies in outer space—those of us in politics have to spend so much time talking about the most primitive slaughter of people based on their ethnic or racial or religious differences.

The great irony of the turning of the millennium is that we have more modern options for technology and economic advance than ever before, but our major threat is the most primitive human failing: the fear of the other and the sense that we can only breathe and function and matter if we are somehow free of the necessity to associate with and deal with, and maybe even under certain circumstances subordinate our own opinions to, the feelings of them—people who are different from us, a different race, a different religion, a different tribe.

And there is no answer to this that is easy. But let me just ask you to look in the context of the former Yugoslavia, where we are trying to preserve a Bosnian State—Prime Minister Chretien and I and our friends—which serves Croats and Muslims, after 4 years of horrible slaughter, until we stopped it in 1995. Or in Kosovo, where we're exploring whether Kosovo can continue to be an autonomous part of Serbia, notwithstanding the fact that the Serbs ran all of them out of the country and we had to take them back.

Why did all this happen? Partly because it was an artificially imposed federalism. Marshal Tito was a very smart man who basically said, "I'm going to create federalism out of my own head. I'm going to mandate the participation of all these groups in government. And I'm going to forbid my government from talking about ethnic superiority, or oppression, or problems." He wouldn't even let them discuss the kind of ethnic tensions that are just part of the daily life in most societies in this world. And it all worked until he died. And then it slowly began to unravel.

So one of the reasons you have all these people clamoring for the independence of ever smaller groups is that they had a kind of phony federalism imposed from the top down. So the first lesson I draw from this is every federalist system in the world today—a world in which information is widely shared, economic possibilities are at least—always, to some extent, based on global forces, certainly in terms of how much money you can get into a country—the federalism must be real. There must be some real sense of shared authority. And people must know they have some real range of autonomy for decisions. And it must more or less correspond to what they perceive they need to accomplish.

On the other hand, it seems to me that the suggestion that a people of a given ethnic group or tribal group or religious group can only have a meaningful communal existence if they are an independent nation—not if there is no oppression, not if they have genuine autonomy, but they must be actually independent—is a questionable assertion in a global economy where cooperation pays greater benefits in every area of life than destructive competition.

Consider, for example, the most autonomous societies on Earth, arguably, the tribes still living in the rainforests on the island of New Guinea. There are 6,000 languages still existent in the world today, and 1,000 of them can be found in Papua New Guinea, and Irian Jaya, where tribes living 10, 20 miles from one another have compete self-determination. Would you like that?

On the other hand, consider the terrible problems of so many African peoples where they're saddled with national borders drawn for them at the Conference of Berlin in 1885, that took no reasonable account of the allocation of the tribes on certain lands and the history of their grazing, their farming, their moving.

So how to work it out? There is no answer. We have to provide a framework in which people can work it out. But the only point I want to make to you today—I don't want to beat this to death, because we could stay here for a week discussing this—is that at the end of World War I, the European powers I think—and America sort of withdrew,

so we have to share part of the blame—but our record is not exactly spotless in how we went about carving up, for example, the aftermath of the Ottoman Empire. And so we have spent much of the 20th century trying to reconcile President Woodrow Wilson's belief that different nations had the right to be free—nations being people with a common consciousness—had a right to be a State.

And the practical knowledge that we all have that if every racial and ethnic and religious group that occupies a significant piece of land not occupied by others became a separate nation—we might have 800 countries in the world and have a very difficult time having a functioning economy or a functioning global polity. Maybe we would have 8,000; how low can you go?

So that doesn't answer any specific questions. It just means that I think when a people thinks it should be independent in order to have a meaningful political existence, serious questions should be asked: Is there an abuse of human rights? Is there a way people can get along if they come from different heritages? Are minority rights, as well as majority rights, respected? What is in the long-term economic and security interests of our people? How are we going to cooperate with our neighbors? Will it be better or worse if we are independent, or if we have a federalist system?

I personally believe that you will see more federalism rather than less in the years ahead, and I offer, as exhibit A, the European Union. It's really a new form of federalism, where the States—in this case, the nations of Europe—are far more important and powerful than the federal government, but they are giving enough functions over to the federal government to sort of reinforce their mutual interest in an integrated economy and in some integrated political circumstances.

In a way, we've become more of a federalist world when the United Nations takes a more active role in stopping genocide in places in which it was not involved, and we recognize mutual responsibilities to contribute and pay for those things.

So I believe we will be looking for ways, over and over and over again—the Prime Minister and I have endorsed the Free Trade

Area of the Americas—we'll be looking for ways to integrate our operations for mutual interest, without giving up our sovereignty. And where there are dissatisfied groups in sections of countries, we should be looking for ways to satisfy anxieties and legitimate complaints without disintegration, I believe.

That's not to say that East Timor was wrong. If you look at what the people in East Timor had been through, if you look at the colonial heritage there, if you look at the fact that the Indonesians offered them a vote, they took it, and nearly 80 percent of them voted for independence—it seems that was the right decision there.

But let us never be under the illusion that those people are going to have an easy path. Assuming that those of us that are trying to support them help them; assuming we can stop all the pro-integrationist militias from oppressing the people, and we can get all the East Timorese back home, and they'll all be safe—there will still be less than a million of them, with a per capita income among the poorest in the world, struggling to make a living for their children in an environment that is not exactly hospitable.

Now, does that mean they were wrong? No. Under the circumstances they faced, they probably made the only decision they could have. But wouldn't it have been better if they could have found their religious, their cultural, their ethnic and their economic footing—and genuine self-government—in the framework of a larger entity which would also have supported them economically? And reinforced their security instead of undermined it? It didn't happen; it's too bad.

But I say this because I don't think there are any general rules, but I think that, at the end of World War I, when President Wilson spoke, there was a general assumption, because we were seeing empires break up—the Ottoman Empire, the Austro-Hungarian Empire; there was the memory of the Russian Empire; British colonialism was still alive in Africa, and so was French colonialism—at that time, we all assumed, and the rhetoric of the time imposed the idea that the only way for people to feel any sovereignty or meaning was if they were independent.

And I think we've spent a lot of the 20th century minimizing the prospects of federalism. We all have recoiled, now, so much at the abuse of people because of their tribal, racial, and religious characteristics, that we tend immediately to think that the only answer is independence.

But we must think of how we will live after the shooting stops, after the smoke clears, over the long run. And I can only say this, in closing: I think the United States and Canada are among the most fortunate countries in the world because we have such diversity; sometimes concentrated, like the Inuits in the north; sometimes widely dispersed within a certain area, like the diversity of Vancouver. We are fortunate because life is more interesting and fun when there are different people who look differently and think differently and find their way to God differently. It's an interesting time. And because we all have to grow and learn when we confront people who are different than we are, and instead of looking at them in fear and hatred and dehumanization, we look at them and see a mirror of ourselves and our common humanity.

I think if we will keep this in mind—what is most likely to advance our common humanity in a smaller world; and what is the arrangement of government most likely to give us the best of all worlds—the integrity we need, the self-government we need, the self-advancement we need—without pretending that we can cut all the cords that bind us to the rest of humanity—I think more and more and more people will say, “This federalism, it's not such a bad idea.”

Thank you very much.

NOTE: The President spoke at 2:25 p.m. in the Chateau Mont-Tremblant. In his remarks, he referred to Prime Minister Jean Chretien of Canada; Premier Lucien Bouchard of Quebec; President Ernesto Zedillo of Mexico; and U.S. Ambassador to Canada Gordon Giffin. The President also referred to Executive Order 13132—Federalism, published in the *Federal Register* on August 10, 1999. This item was not received in time for publication in the appropriate issue.

Proclamation 7239—Columbus Day, 1999

October 8, 1999

*By the President of the United States
of America*

A Proclamation

Although Christopher Columbus' first voyage to the New World took place more than 500 years ago, the momentous changes it brought about still resonate today. His journey triggered a historic encounter between Europe and the native peoples of the New World; helped open new continents to exploration, trade, and development; established a reliable route to the Americas; and was a major milestone in the inexorable trend toward expansion and globalization.

Columbus could not have imagined the full impact of his arrival in 1492 or how his journey would shape human history. The zeal for trade that motivated the Spanish crown to fund Columbus' voyages still exists today as we work to strengthen our commercial ties with other nations and to compete in an increasingly global economy. Columbus' own passion for adventure survives as an integral part of our national character and heritage, reflected in our explorations of the oceans' depths and the outer reaches of our solar system. A son of Italy, Columbus opened the door to the New World for millions of people from across the globe who have followed their dreams to America. Today, Americans of Italian and Spanish descent can take special pride, not only in Columbus' historic achievements, but also in their own immeasurable contributions to our national life. From business to the arts, from government to academia, they have played an important part in advancing the peace and prosperity our country enjoys today.

We are about to embark on our own journey into a new millennium of unknown challenges and possibilities. As we ponder that future, Columbus' courage and daring still capture the American imagination, inspiring us to look to the horizon, as he did, and see, not a daunting boundary, but a new world full of opportunity.

In tribute to Columbus' many achievements, the Congress, by joint resolution of April 30, 1934 (48 Stat. 657), and an Act of June 28, 1968 (82 Stat. 250), has requested the President to proclaim the second Monday in October of each year as "Columbus Day."

Now, Therefore, I, William J. Clinton, President of the United States of America, do hereby proclaim October 11, 1999, as Columbus Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities. I also direct that the flag of the United States be displayed on all public buildings on the appointed day in honor of Christopher Columbus.

In Witness Whereof, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

[Filed with the Office of the Federal Register, 8:45 a.m., October 13, 1999]

NOTE: This proclamation was published in the *Federal Register* on October 14. This item was not received in time for publication in the appropriate issue.

Letter to Congressional Leaders on Deployment of United States Force To Provide Support to the Multinational Force in East Timor

October 8, 1999

Dear Mr. Speaker: (Dear Mr. President:)

On September 15, 1999, the United Nations Security Council, under Chapter VII of the Charter, authorized the establishment of a multinational force to restore peace and security in East Timor, to protect and support the United Nations Mission in East Timor (UNAMET), and, within force capabilities, to facilitate humanitarian assistance operations. In support of this multinational effort, I directed a limited number of U.S. military forces to deploy to East Timor to provide support to the multinational force (INTERFET) being assembled under Australian leadership to carry out the mission de-

scribed in Security Council Resolution 1264. United States support to the multinational force has thus far been limited to communications, intelligence, logistics, planning assistance, and transportation.

Recently, I authorized the deployment of the amphibious ship, USS *BELLEAU WOOD* (LHA 3), and her embarked helicopters, to the East Timor region, including Indonesian waters, to provide helicopter airlift and search and rescue support to the multinational operation. Also, embarked in *BELLEAU WOOD* is a portion of her assigned complement of personnel from the 31st Marine Expeditionary Unit (Special Operations Capable) (MEU (SOC)). At this time, I do not anticipate that the embarked Marines will be deployed ashore, with the exception of the temporary deployment of a communications element to support air operations.

At this point, it is not possible to predict how long this operation will continue. The duration of the deployment depends upon the course of events in East Timor and may include rotation of naval assets and embarked aircraft. United States support for this multinational effort will continue until transition to a U.N. peacekeeping force is complete. It is, however, our objective to redeploy U.S. forces as soon as circumstances permit.

I have taken this action pursuant to my constitutional authority to conduct U.S. foreign relations and as Commander in Chief and Chief Executive. I am providing this report as part of my efforts to keep the Congress fully informed, consistent with the War Powers Resolution. I appreciate the support of the Congress in this action.

Sincerely,

William J. Clinton

NOTE: Identical letters were sent to J. Dennis Hastert, Speaker of the House of Representatives, and Strom Thurmond, President pro tempore of the Senate. This item was not received in time for publication in the appropriate issue.

The President's Radio Address

October 9, 1999

Good morning. On Tuesday the Senate plans to vote on whether to ratify the nuclear test ban treaty. Today I want to emphasize

why this agreement is critical to the security and future of all Americans.

Just imagine a world in which more and more countries obtained nuclear weapons and more and more destructive varieties. That may be the single greatest threat to our children's future. And the single best way to reduce it is to stop other countries from testing nuclear explosives in the first place. That's exactly what the test ban treaty will do.

The treaty is even more essential today than it was when President Eisenhower proposed it more than 40 years ago, or when President Kennedy pursued it. It's more essential, even than, when we signed it 3 years ago, because every year, the threat grows that nuclear weapons will spread—in the Middle East, the Persian Gulf, and Asia, to areas where American troops are deployed, to regions with intense rivalries, to rogue leaders, and perhaps even to terrorists.

The test ban treaty gives us our best chance to control this threat. A hundred and fifty-four countries have already signed it, including Russia, China, Japan, Israel, Iran, and all our European allies. Many nations have already ratified it, including 11 of our NATO Allies, including nuclear powers France and Britain. But for 2 years after I submitted the treaty to the Senate for ratification, there had been absolutely no action.

Now, only a week has been allotted to consider it. That is especially disturbing since the issue has been politicized—apparently with large numbers of Republican Senators committing to their leader to vote against it without even giving the issue serious consideration or hearing the arguments.

Now, a week is not enough time for an issue of this profound importance. That's why I've said I want to see the vote postponed so we can have a thorough debate that addresses all the legitimate concerns.

The stakes are high. If our Senate rejected this treaty outright, it would be the first time the Senate has rejected a treaty since the Treaty of Versailles, which established the League of Nations after World War I. We all know what America's walking away from the world after World War I brought us—in the Depression and the Second World War. If our Senate rejected this treaty, it

would be a dangerous U-turn away from our role as the world's leader against the spread of nuclear weapons. It would say to every country in the world, "Well, the United States isn't going to test, but we're giving all of you a green light to test, develop, and deploy nuclear weapons."

Last year rival nuclear explosions by India and Pakistan shook the world. Now both countries have indicated their willingness to sign the test ban treaty. But if our Senate defeats it, can we convince India and Pakistan to forgo more tests? America has been the world's leader against the proliferation of nuclear weapons for more than four decades. If our Senate defeats it, we won't be anymore. If our Senate defeats it, what will prevent China, Russia, or others from testing and deploying new and ever more destructive weapons?

Some oppose the treaty because they say we still need to test nuclear weapons ourselves to make sure they're reliable. But this week 32 American Nobel Prize-winning physicists and other leading scientists told the Senate that America doesn't need to test more nuclear weapons to keep a safe and reliable nuclear force. After all, we stopped testing back in 1992. And now we're spending about \$4½ billion a year on proven program, using our advanced technology to maintain a superior nuclear force without testing. Since we don't need nuclear tests to protect our security, this treaty does not require us to do anything we haven't already done.

It's about preventing other countries from nuclear testing; about constraining nuclear weapons development around the world, at a time when we have an overwhelming advantage.

I've told the Senate I would be prepared to withdraw from this treaty if our national security ever required us to resume nuclear tests in the future. And I've urged them to work with me to include safeguards in their ratification act, as they normally do.

Some also say these treaties are too risky because some people might cheat on them. But with no treaty, other countries can test without cheating and without limit. The treaty will strengthen our ability to determine

whether other countries are engaged in suspicious activity. With onsite inspections and a global network of over 300 sensors, including 33 in Russia, 11 in China, 17 in the Middle East, we could catch cheaters and mobilize the world against them. None of that will happen if we don't ratify the treaty.

That's why four former Chairmen of the Joint Chiefs of Staff and the current Chairman have all endorsed the nuclear test ban treaty. So have a broad spectrum of religious leaders and many other leading Americans, both Republicans and Democrats.

So I say to the Senators who haven't endorsed it, heed the best national security advice of our military leaders. Hear our allies who are looking to us to lead. Listen to the scientists. Listen to the American people who have long supported the treaty. And since you're not prepared for whatever reason to seize the priceless chance to fulfill the dream of Presidents Eisenhower and Kennedy for a safer world, delay the vote on the treaty, debate it thoroughly, and work with us on a bipartisan basis to address legitimate concerns. And then you'll be able to vote yes for our country and our children's future.

Thanks for listening.

NOTE: The President spoke at 9:06 a.m., c.d.t., from the Lake Michigan Room at the Hilton Towers in Chicago, IL.

**Remarks to the United States
Hispanic Leadership Institute
Conference in Chicago, Illinois
October 9, 1999**

Thank you. Good morning. You know, I was a little sleepy before I came in here and saw you. [*Laughter*] And I'm ready to go now. I thank you very much.

Let me begin by saying a simple thank you. Thank you for your friendship; thank you for your support; thank you for bringing all of the children who are here in this audience today to remind us of what our deliberations are all about. Thank you, Juan Andrade, for your long leadership and your friendship to me. And thank you, Rey Gonzalez.

Thank you for bringing the Juan Andrade Scholarship award winners outside for me to have my picture taken with them. I enjoyed

that. They were great. People who are worried about America should take a look at those young people. They would worry a lot less and feel a lot more hope.

I want to express my appreciation to everyone at the U.S. Hispanic Leadership Institute for working since 1982 on your noble mission of empowerment through education and voter participation. Your work has paid off. You see it in greater Hispanic participation in elections and in the growing number of Latino elected officials, like Congressman Luis Gutierrez. I think he is here today, and I thank him for his work.

I also want to thank the many dedicated Hispanic members of our administration, including my Deputy Chief of Staff, Maria Echaveste, who is here; our Director of Intergovernmental Affairs, Mickey Ibarra; the EEOC Chair, Ida Castro—I know she has been or will be on your program—along with George Munoz, Aida Alvarez, Henry Solano, Saul Ramirez, and Secretary Bill Richardson, and a number of other young people in our administration who I've seen wandering around here at your meeting, and some of whom have worked on my trip here.

Let me say that there is another mission that you have followed over the years. You have helped to forge unity among the diverse elements of Hispanic America. You remind us that there are actually differences of ethnicity, national origin, and even, occasionally, of opinion among Hispanic-Americans; but that you are united by common values of faith and family, hard work, and a common vision of a better America. That is America at its best—a diverse nation, now the most diverse in our history, and growing increasingly so.

In a global economy, in a global society, our diversity can be a godsend if we make the most of it, if we enjoy it, if we respect it, if we honor it, and if we believe that the common humanity that unites us is more important than all the differences among us. That thought was uppermost in my mind 6½ years ago when I became President.

Vice President Gore and I came into office determined to move away from the divide-and-conquer politics which had dominated our country for the previous 12 years. It had

weakened and divided America, and it was wrong. We wanted to find a way to unify our country, to unify our thinking, to unify our action, and to move our country forward, based on values all Americans share—opportunity for all, responsibility from all, a community of all our people. With that in mind, we put in place a new economic plan, new crime and welfare policies, new education, environment, and health policies, new policies to empower the poor and elevate citizen service. I think the results speak for themselves.

We have the longest peacetime economic expansion in history; the highest homeownership in history; the lowest unemployment rate in 29 years; the lowest welfare rolls in 32 years; the lowest poverty rates in 20 years; the lowest crime rates in 26 years; the smallest Federal Government in 37 years; the first back-to-back budget surpluses in 42 years. Along the way we managed to pass the family and medical leave law, which has given millions and millions of Americans the right to take some time off when a baby is born or a parent is sick without losing their jobs. Ninety percent of our children are immunized against serious childhood diseases for the first time in our history. Our air and water are cleaner; our food is safer. We have opened the doors of college with the HOPE scholarship and other increases in financial aid. We have opened the doors of health care to 5 million children; 100,000 young Americans have served in AmeriCorps.

Just last week we learned that median household income rose 3½ percent last year, but for Hispanics it rose at an even faster rate of 4.8 percent in one year. Even though this community has serious challenges, including, I might say uppermost, a high school dropout rate that is too high, we now have the lowest Hispanic unemployment rate in history, the lowest Hispanic poverty rate in a generation, and a million new Hispanic homeowners since 1994.

In 1993 we doubled the earned-income tax credit for lower income working people. It now lifts over a million Hispanics out of poverty. We raised the minimum wage that directly benefits 1.6 million Hispanic workers, and I think it's time we raised the minimum wage again.

We increased the number of Small Business Administration loans to Hispanic entrepreneurs by 250 percent. We thank Aida Alvarez for her leadership there. And as the Vice President recently announced, the SBA has planned to expand lending to the Hispanic community even more. We revolutionized welfare in a way that allowed the rolls to be cut nearly in half—millions of people to move from dependence to the dignity of work, what with more child care, more transportation aid, guaranteed food and medicine to children, and we have succeeded in reversing the unfair cuts in the welfare reform law, restoring benefits to over 600,000 legal immigrants.

Under the Vice President's leadership, we've reduced the naturalization backlog at INS, streamlining the process to make it easier for immigrants who play by the rules to become full partners in America. We have more to do, and I ask you to help us with that.

I'd also like to ask your help with one other thing. In the 1997 bipartisan balanced budget bill, we created the \$24 billion Children's Health Insurance Program. It was the largest expansion of children's health coverage since the enactment of Medicaid. It required all the States to file plans to use this money to enroll children without health insurance in the program. This year we finally got all the States enrolled. But the alarming thing is that we estimate there are at least—at least—4 million more children who could be covered by the money that is there waiting for them to provide health insurance who have not signed up yet.

So I ask you, when you go back home, make sure that in your community there is a systematic effort underway to get health care to every Hispanic child who doesn't have it, who is eligible for this program.

Like you, I believe in the concept of empowerment, so I will mention this one last issue. I asked the Vice President to lead our efforts to create over 100 enterprise zones and empowerment communities across our country, to generate billions of dollars in new private sector investment and public investment in these low income areas. You can see them operating from Chicago to Philadelphia to Cleveland to Detroit to south Texas to the

Mississippi Delta to Appalachia. And you can see them working. I have asked for an increase in the number of empowerment zones and community development banks, and we're fighting for them now in the budget.

I want to talk to you about what we're going to do next. I thank you for your support. I am pleased by the progress we have made. But in America we must always be determined to change, to improve, to move forward. And we must honestly face the fact that there are still a lot of challenges out there that have not been met.

When I came up on this stage—I'll just give you one example—when I came up on this stage, one of the people back here said, "Mr. President, there are some people in our community with disabilities who are out there. Be sure and say hello to them on the way out." One of the important things I'm trying to get passed in this Congress is a bill sponsored by Senator Kennedy and Senator Jeffords which would allow people with disabilities to move into the workplace and still keep their Medicaid insurance because they can't get health insurance in the workplace. That's the sort of thing we need to be doing.

I ask you to take just a few minutes and focus on the outstanding challenges—places where we haven't made enough progress and places where we haven't received enough cooperation from this Congress. Let me begin with judicial nominations.

I am proud that we have succeeded in appointing more Hispanics to the Federal bench than any administration in history. And I'm proud that, on the whole, the judges I've appointed are the most diverse group in our history—nearly half are women or minorities. More than half my current judicial nominees are women or minorities, and they are good judges. My appointees have garnered the highest ratings from the American Bar Association of any President in 40 years.

Now, I would also say that unlike previous administrations, there has been article after article after article saying that I have avoided putting ideological extremists on the court, unlike what happened in the previous decade or so. So these people are well-qualified, they're diverse—you would think the United States Senate would be falling all over themselves to confirm them.

Now, let's look at the facts. Earlier this week I said it was a disgrace that the Senate defeated on a straight party-line vote my nomination of Ronnie White, a highly talented African-American jurist from the State of Missouri that was the first African-American to serve on the Missouri State Supreme Court, who was endorsed by one of his State's Republican Senators, supported by Republican Senators on the Judiciary Committee, but when he came to the floor, for political reasons back in Missouri, 100 percent of the Republicans in the majority voted to deny his confirmation and distorted his record in capital punishment appeals cases. It was wrong. That's the kind of thing that's going on up there that ought to stop.

But unfortunately, it's not an isolated event. Listen to this: Richard Paez, the first Mexican-American ever to serve as a judge in the Federal District Court in Los Angeles, I nominated more than 3½ years ago for a seat on the Ninth Circuit Court of Appeals. For more than 3½ years he has been waiting for the Senate to confirm his nomination. Is it because he's not qualified? No. The American Bar Association said not that he was qualified, but that he was well qualified. He received the highest rating from the ABA. He has broad, bipartisan support back in California and in the legal community. Yet, he still has not been given a Senate floor vote. Why? Well, they don't want to vote him down because they hope that you will vote with them in the next election, but they don't want to vote for him. So this man has been hanging there for 3½ years.

Now, I don't know about you, but if I took 3½ years to make a decision, you wouldn't think I was a very good President. And most of you couldn't hold your jobs if you took 3½ years to do your assigned tasks. Can you imagine that? How many times has somebody been on you because you took 3½ hours? [*Laughter*]

Another fine candidate for the Ninth Circuit, a renowned appellate lawyer, Marsha Berzon, has been waiting for more than 18 months to receive a floor vote. That is, they put these people out of committee and they just never bring them up. They just disappear

somewhere in the dark recesses of the calendar of the Senate. Now, I think the treatment of Richard Paez and Marsha Berzon is shameless.

We have also been working to get three other exceptional Hispanic nominees confirmed: Judge Julio Fuentes for the Third Circuit; civil lawyer Enrique Moreno for the Fifth Circuit; and Judge Ronald Guzman for the Northern District of Illinois, here.

I am pleased to announce that Judge Guzman finally received his judiciary committee hearing last week for a vacancy here. But the Senate's treatment of Judge White and its failure to vote on the outstanding Hispanic nominees that are pending creates a real doubt about their ability and their willingness to perform their constitutional duties to advise and consent.

So I urge you to help me get a Senate vote on Judge Paez, Judge Fuentes, Judge Guzman, Marsha Berzon, Enrique Moreno. They should be confirmed. They should be confirmed. But they ought to be voted on one way or the other.

Now, let me say, in spite of the difficulties we have had with this Congress, they're capable of putting partisanship aside and putting the country first. We did it on the third try with the welfare bill in '96. We did it with the Balanced Budget Act in '97. We did it last year when they voted right before the election for my program to put 100,000 teachers in the schools. And just last week, at the end of this session that just concluded, finally, after 2 years of work, a substantial bipartisan majority in the House of Representatives passed a strong, enforceable Patients' Bill of Rights.

Now, that bill is a long way from becoming law, but a lot of people never thought we could get this far. It gives you the right if you're in an HMO to see a specialist if your doctor says you should; to go to the nearest emergency room if you're in an accident; to keep your doctor through a course of treatment, whether for chemotherapy or a pregnancy; and to hold your health care plan accountable if you're injured.

So we're capable of doing this. I have asked the Congress to do more. I have asked them to keep our prosperity going by paying down our debt and getting America out of

debt in 15 years for the first time since 1835. We can do that.

I have asked them to keep working until the prosperity of this moment reaches every community and every person willing to work for it. I have asked them to double the number of empowerment zones and enterprise communities. And I have asked them to adopt my new markets initiative, which would simply say we want the same incentives for people with money to invest in poor communities in America we give them to invest in poor communities around the world, because people in America deserve the chance to be a part of America's prosperity.

I've asked them to work with me to meet the challenge of the aging of America by saving Social Security and modernizing Medicare and adding a prescription drug benefit. I have asked them, now that we have the lowest crime rate in 26 years, to ask them to join me in making America the safest big nation on Earth by closing this gun show loophole in our background check law and doing more to keep guns out of the hands of children and criminals.

I have asked them to help me give all of our children—all of our children—a world-class education, demanding more from our schools, but also investing more. Our agenda is clear: Build or modernize 6,000 schools; there are too many kids in the schools and too many schools are run down or too many kids going to school in trailers. Put 100,000 teachers out there and focus on the early grades to give our children smaller classes. Have more after-school and summer school programs like Chicago does, so that you can say, "Okay, we're going to have high standards; we're going to end social promotion, but we will not label children a failure when the systems fail them." We want them to have access to the help they need. Close the digital divide; hook up every classroom and every library in this country to the Internet at a rate even the poorest schools can afford. That's what we're doing.

I am proud that we won almost \$500 million in the 1999 budget for the Hispanic education action plan, to make sure Latino children get the tutoring, the after-school, the mentoring programs they need to help them

meet higher academic standards, finish, not drop out of high school, and go on to college.

It will take time for these efforts to have an impact, but you can help at the local level. Hold up these young scholarship winners as an example to the young people in your communities. We cannot make America what it ought to be in the 21st century unless we dramatically reduce the 30 percent dropout rate among Hispanic-American children.

As many of your leaders have told me, not withstanding our best intentions in this administration, we have a lot more to do to make sure that the States and the school districts who accept Federal dollars actually spend those dollars in a way that reaches underserved Hispanic students, and we are working on that, as well.

Let me finally make this one point. I have always wanted an administration that looks like America. You've heard me say that a dozen times, I bet. More and more, America will look like you. More and more, there will be more people listening and more people performing like Ricky Martin and Jennifer Lopez. There will be more books. There will be more movies. There will be a bigger part of our culture.

And what I ask you to do as you rise in dominance and influence, not only in our political life but in our cultural life, is never to forget your roots and never forget the pain of discrimination or being ignored, and make sure that you are always a force for good, for building one America.

If you look around this old world today, the biggest problem I have faced as your President in my responsibilities around the world is dealing with the racial and the ethnic and the religious and the tribal conflicts where people occupy the same land and cannot get along; where they continue to believe what is different about them is more important than their common humanity; where they fear people who are different from them and get to the point where they look down on them and in some places—God forbid—they think it's even okay to kill them.

And if you look all over the world today, we celebrate the modern world—modern music, modern culture, the Internet, the decoding of the human gene—all these things that are going on. A lot of your young people

probably want to go to work for these Internet companies, where there are dozens and dozens of young people in their twenties now worth \$50 million. That's chump change to some of them. It's all great, all this modern world, but don't forget the biggest problem is the oldest problem of the human heart—the fear and hatred of people who are different.

So I ask you to remember this. You are growing in numbers; you are growing in influence. You will grow in ways that are good and will make America richer, more alive, more textured, more exciting. And it's all going to be positive. But don't forget what you've been through. And do everything you can to stop it from happening within America and beyond our borders. We are still, for all of our modern advances, too much in the grip of the oldest fears of the human heart. And your community can make all the difference for 21st century America.

Thank you, and God bless you.

NOTE: The President spoke at 9:36 a.m. in the Grand Ballroom at McCormick Place. In his remarks, he referred to Juan Andrade, Jr., president and executive director, and Rey Gonzalez, board chairman, U.S. Hispanic Leadership Institute; singer Ricky Martin; and actress/singer Jennifer Lopez.

Message to the Congress Transmitting the Report on Naval Petroleum Reserves

October 8, 1999

To the Congress of the United States:

In accordance with section 201(3) of the Naval Petroleum Reserves Production Act of 1976 (10 U.S.C. 7422)(c)(2), I am informing you of my decision to extend the period of production of the naval petroleum reserves for a period of 3 years from April 5, 2000, the expiration date of the currently authorized period of production.

Attached is a copy of the report investigating the necessity of continued production of the reserves as required by 10 U.S.C. 7422(c)(2)(B). In light of the findings contained in that report, I certify that continued

production from the naval petroleum reserves is in the national interest.

William J. Clinton

The White House,
October 8, 1999.

NOTE: This message was released by the Office of the Press Secretary on October 12.

**Statement on Signing the
Department of Transportation and
Related Agencies Appropriations
Act, 2000**

October 9, 1999

I have signed into law H.R. 2084, the “Department of Transportation and Related Agencies Appropriations Act, 2000.” The bill provides \$47.1 billion in funding for the Nation’s vital transportation and related safety needs. The record level of infrastructure investment provided by this measure, which I requested, will enhance use and efficiency, provide better connections, and help improve the conditions and performance of the Nation’s transportation system.

This bill’s funding levels for highway and transit programs will allow us to continue making substantial improvements in travel conditions and transit ridership. Completing the full funding of our request for Coast Guard operating expenses will improve the safety of all Americans by enabling the expansion of the Coast Guard’s vital search and rescue, law enforcement, and drug interdiction activities. Provision of our request for Amtrak capital funds will improve passenger service and keep the rail service on the 5-year glide path to operating self-sufficiency that was agreed to in 1997 by the Congress and my Administration.

I am concerned about the funding level provided in the bill for Federal Aviation Administration (FAA) operations and capital programs. For example, the bill provides \$144 million less than my request for FAA operations. This reduction will slow hiring for safety and security positions and postpone implementation of needed efficiency and management improvements. The bill also constrains funding for the modernization of the air traffic control system, including need-

ed modernization and improvement of the Global Positioning System. These reductions may increase air travel delays and ill-position the FAA to meet the growing challenges of the future. My Administration will work with the Congress to rectify the consequences of these harmful reductions.

Section 321 of this bill again blocks the Department of Transportation from evaluating corporate average fuel economy standards to determine whether the vehicles we drive can be more fuel efficient. Because of similar provisions, the Department has been unable to carry out its responsibility to review this issue for several years, during which time the average fuel economy has dropped to its lowest level since 1980, adding to pollution and to the Nation’s dependency on imported oil. I am very disturbed by this limitation on my Administration’s ability to address this critical issue. We cannot continue to ignore this. For that reason, we will soon invite the leaders of the auto industry to the White House to try to find a way to address this issue notwithstanding the limitation in this bill.

I appreciate the increase in funding for motor carrier safety provided in the bill, as it is the goal of the Secretary of Transportation to reduce motor carrier safety fatalities by 50 percent within 10 years. However, I am disappointed that the full funding requested for motor carrier safety grants to States was not provided, as this funding is needed to help achieve this goal. I am also concerned about language that precludes enforcement action, and my Administration will work with the Congress to address this problem.

I am also troubled by the widespread earmarking of vital highway and transit programs without regard to criteria that have been established to ensure that these are sound investments. For example, a number of projects specified for the Job Access and Reverse Commute program are strictly for research, an activity that would not otherwise be eligible for this funding. In general, earmarks tend to be aimed at projects that have not advanced in the local planning process and, as a result, the funding will likely remain unused for a longer period of time, depriving

ready-to-go projects of needed Federal assistance.

I recognize the widespread transportation needs of our country, which is why transportation infrastructure investment during my Administration has increased by 32 percent above the previous Administration's average. However, our transportation investment must be strategic and applied to critical needs, and excessive earmarking can undermine this goal. I ask the House and Senate Appropriations Committees to work with the Department of Transportation to see that essential projects that can quickly utilize Federal funding are given the ability to move forward.

William J. Clinton

The White House,
October 9, 1999.

NOTE: H.R. 2084, approved October 9, was assigned Public Law No. 106-69. This statement was released by the Office of the Press Secretary on October 12.

Statement on Signing Legislation To Extend Bankruptcy Relief to Family Farmers

October 9, 1999

I have signed into law S. 1606, which extends the provisions of chapter 12 of the Bankruptcy Code until July 1, 2000.

Chapter 12 of the Bankruptcy Code was enacted in 1986 to provide bankruptcy relief to our Nation's family farmers, enabling them to avoid the loss of their farms and their way of life. Chapter 12 has also benefited creditors, who would be unlikely to obtain repayment if these farmers went out of business.

This is the third short-term extension of chapter 12 that I have approved since last fall. As I stated in March when I approved the most recent extension, I urge the Congress to make chapter 12 permanent.

William J. Clinton

The White House,
October 9, 1999.

NOTE: S. 1606, approved October 9, was assigned Public Law No. 106-70. This statement was re-

leased by the Office of the Press Secretary on October 12.

Remarks to the American Academy of Pediatrics

October 12, 1999

Thank you very much, President Alpert—[*laughter*]*—*President-elect Cook. Seems like just yesterday I had that title for a while. [*Laughter*] To the executive board and the members of the American Academy of Pediatrics, thank you for welcoming me here. I am told that I'm the first President ever to address your convention, but I know—I know that Hillary spoke to you in 1993, and I was—I was thinking of, given the difference in our respective political prospects for the future, we should have reversed the order. [*Laughter*] But we just got back this morning from Camp David, where we celebrated our 24th anniversary, and she asked me to give you her regards, so I do so today.

I'm delighted to be here. I think pediatricians have a special place in the hearts of every person who has ever been privileged to either be treated by one or have his or her children treated by one. Just a few weeks ago, the man who was my doctor in Hot Springs, Arkansas, when I was a little boy, Dr. Joe Rosenzweig, came to see me with his wife and his grandchildren. I regularly stay in touch with Dr. Betty Lowe, who once headed this distinguished group and took care of Chelsea when she was a little girl. And so I feel a great personal bond to the work that you do.

And you should feel a great personal bond to the work that I do. I mean, Washington is the only place outside of a pediatrician's office where you can hear so much screaming and crying on a daily basis. [*Laughter*] And we all—all the politicians here have a lot in common with doctors. We all want to prescribe medicine, and no one wants to take it. [*Laughter*] But screaming and crying are part of the process of getting better, in medicine and in politics.

Let me echo some of the things that Dr. Alpert has said. I am profoundly grateful for the things that we have done together and the leadership that you have taken to make

America better. The gains that our administration has made for children have come with your organization fighting by our side: passing the family and medical leave law, which now over 15 million people have taken advantage of; immunizing more than 90 percent of our children against major childhood diseases for the first time in our history; passing the Brady bill and other measures to stem gun violence; making aggressive initiatives in the area of school safety, including zero tolerance for guns in schools; and—[applause]—thank you—the V-chip, the TV rating systems, and now similar systems for the Internet and for video games that we're working on; increasing child support enforcement and collection; dramatically expanding opportunities for adoption and for moving foster care kids into permanent adoptive homes—I thank you for all those things—the First Lady's Prescription for Reading program, and many, many other issues I could mention.

One I want to talk about more later today in my remarks is your role in creating the \$24 billion Children's Health Insurance Program, which is designed to address that problem of more than 10 million uninsured children.

Because of all these efforts, America is a better place for children; they're healthier and safer than they were 7 years ago. Infant mortality is down. Drug abuse is down. Teen pregnancy is down. Juvenile crime is down. America, itself, is stronger, more prosperous, more confident.

Today, we enjoy the longest peacetime expansion in our history, the lowest unemployment rate in 29 years, the lowest welfare rolls in 30 years, the lowest poverty rate in 20 years, the lowest crime rate in 26 years, the first back-to-back budget surpluses in 42 years. Thank you for your contribution to all of these things.

But like your work with children, our work here is always about tomorrow. So the question we face is, what are we going to do with this phenomenal burst of good fortune that we have had by dint of effort and the grace of God? What are we going to do with it?

I have been arguing very strenuously now for some time that we have turned the country around and we are heading in the right

direction. And now we have, as a people, the chance—literally, the chance of a lifetime, that a nation gets maybe once every 30, 40, 50 years, to deal with its long-term challenges, to seize its long-term opportunities, to forge the future that our children and our grandchildren will have. And that is what I earnestly hope we will do. I believe that we have to use this moment to meet the great challenges we know, without a doubt, 21st century America will face. What are they?

First, the aging of America. The number of people over 65 will double by the year 2030. I hope I'll still be one of them. There will be two people working for every one person drawing Social Security.

Second, the health and education of the largest and most diverse group of children in our Nation's history.

Third, sustaining our economic prosperity over the long term and expanding its reach to people and places that have not been touched by this marvelous economic recovery.

Fourth, making America the safest big country in the world. Yes, the crime rate's at a 26-year-low, but no one believes it's low enough. The accidental death rates by guns of children is 9 times higher than that of the next 25 big industrial countries combined. So, yes, we have a 26-year-low in crime rates, but if we're the strongest economy in the world and we have a free society, why don't we say we're going to not stop until America is the safest big country in the entire world?

The fifth big challenge we have, which will bear directly on your efforts and those that succeed you in the years ahead is dealing with the environmental challenges we face, especially the challenge of climate change and global warming. I feel very, very strongly about that. One of the problems I have in dealing with it is that the applause is still scattered when I talk about it. [Laughter]

And sixth, building one America out of all the diverse threads of our citizenship and doing it in a world that we help to make ever more interdependent, peaceful, and prosperous.

The answers to those questions, whether we will do that, will be affected by the decisions we make here in Washington in the coming days and weeks. Ever since I gave

my State of the Union Address, I have been working with Congress, or trying to, on a budget that will move us ahead in meeting all these challenges, that will leave this country in good shape for the new millennium, while maintaining our budget discipline that has been responsible for so much of the good things that have happened in this country in the last 6½ years.

To meet the challenge of the aging of America, I have proposed to extend the life of Social Security to 2050, to get it out beyond the life of the baby boom generation, to lift the earnings limit, to give more help to older women who are disproportionately poor. I have also proposed to extend the life of Medicare to 2027—that's the longest existence of the Medicare Trust Fund in a long time—to add a voluntary prescription drug benefit, to allow uninsured Americans between the ages of 55 and 65 to buy into the Medicare program, and to provide a long-term care tax credit for families that are dealing with that challenge.

To meet the challenge of our children's education, I have proposed to continue with our program of putting 100,000 more teachers in the classroom, to lower class sizes in the early grades, to build or modernize 6,000 schools, to complete our efforts to hook all of our classrooms up to the Internet by the year 2000, and to raise standards and accountability.

I know Secretary Riley spoke here earlier, and perhaps he dealt with this at greater length, but we propose as we give out our Federal money and reauthorize that law every 5 years—this is the year we do it—to say every State must have high standards, every State must have accountability—accountability for teachers, for schools, for students. We shouldn't have social promotion, but we shouldn't blame kids for the failure of the system. So we proposed to triple the number of our children served by after-school and summer school programs. We proposed to give funds to schools that are failing, to turn them around or require them to be shut down. We proposed to expand the number of charter schools within our public school system so we'll get up to 3,000 by the end of next year.

These are very important things that I hope all Americans will support. Unless we can educate all our children—and increasingly, they come from families whose first language is not English—we will not have the country we want in 30 years.

To meet the challenge of expanding and continuing our economic prosperity and bringing it to people who haven't felt it yet, I have asked the Congress to adopt a new markets initiative to give Americans with funds to invest the same incentives to invest in poor areas in America we now give them to invest in poor areas in Latin America or Asia or Africa.

I have proposed to increase the immensely successful community empowerment program that the Vice President has run for us over the last 6½ years, to increase enterprise zones, empowerment communities, to increase our community development banks that make loans to people and places where capital is not available. And to keep this expansion going perhaps for another generation, through ups and downs in the global economy, I have asked the Congress to do this within a framework that would enable us to continue to pay down our national debt which we quadrupled in the 12 years before I took office, so that in 15 years, America could be debt-free for the first time since 1835 when Andrew Jackson was the President of the United States.

Let me say to all of you—this is a pretty progressive group, and you always want Government to invest in money—why should progressives want America to be out of debt? I want to make this argument just very briefly. All of us who are over 40, at least, who went to college and took an economics class were told that every country needs a certain amount of debt, that it's healthy. And that was true when every country controlled its own economic destiny independent of every other. And it was true when people were borrowing money to invest in things like roads and bridges and parks and universities and long-term capital investments.

But over the last 20 years, governments, the United States being the worst offender, got to borrowing money just to pay the bills every week. And in a global economy where

money can move across national borders instantaneously, if a government is debt-free, it means the people in that country, whether they're businesses trying to start or expand or families trying to pay for homes, cars, college loans and credit card bills, can all borrow money more cheaply. It means that if rich countries like America get out of debt and other countries get in trouble, like our Asian partners did over the last couple of years, they can get money to get help more quickly, rebound more quickly, and buy our products more rapidly.

So I feel very strongly that this is an important idea that I hope the American people will insist upon. And I hope that they will say to the Congress, "Don't let tax cuts or spending increases get in the way of getting us out of debt. If you want to spend the money, raise it. Do whatever's necessary, but get America out of debt over the next 15 years so that we can continue to grow for the next 50 years. It's very, very important to our future."

Now, here's what's going on here. I know you see all this food fight in Washington and you wonder, what is really going on? Here's what's going on. We passed a balanced budget bill in 1997. It had very tough spending caps. The spending caps were too tough—if you work in a teaching hospital, or at other hospitals that have been handicapped by the Medicare cutbacks, you know they're too tough. I'll say more about that in a minute. But what we said was, "We're going to balance this budget, and then we're going to keep it balanced by staying within these caps, which means we have to spend money according to a certain plan over the next 5 years; or, if we want to spend more money, we have to raise more money, either by cutting some other spending, closing some tax loopholes, raising some fees, or raising some tax." So that's why we're having this fight.

Then it turns out we have a bigger surplus than we thought we would, thanks to the prosperity and the hard work and the productivity of the American people. Then the Congress said, "We want to separate the Social Security fund from the other funds." That's something they never could have done before, because the only surplus we've had for the last 17 years was in Social Security.

All the others—the deficit—every year, you saw those deficit numbers, it was always a lot bigger than that. It's just—we were paying more in Social Security taxes than we were paying out in Social Security payments. And the difference, under the Government's unified accounting system, lowered the deficit.

So they said, "Let's separate them. Now that we have a non-Social Security surplus, let's separate them. And we really want to do this." So I said, "Fine by me, I'll do that," because under my plan, we would keep the Social Security taxes separate, then use the interest savings we get on paying down the debt and put it back into Social Security and run Social Security out to 2050, beyond the life of almost all but the most fortunate baby boomers, and get us through this big population problem we've got.

But when the Congress looked at the books—and the majority party, the Republican Party, which normally says they're more conservative than we are on spending; it depends on what it is—found out that they couldn't spend all the money they wanted to spend with just the non-Social Security surplus. And they didn't want to raise the cigarette tax or raise fees on people that have to help us clean up the toxic waste dumps, or close any of the corporate loopholes that I tried to close. And so that's why you see all these problems up here.

They're having a very difficult time, even with this big surplus, because they promised they wouldn't touch the Social Security part of the surplus, crafting a budget that both protects that surplus, invests in important things like education and health care, does what both parties wanted to do in transportation, meets their defense targets, and stays within the spending cap. So that's why you hear about all these gimmicks and why they wanted to start giving poor people their tax returns under the earned-income tax credit every month, instead of in a lump sum, like the rest of us get ours—and why they wanted to put a 13th month into the year and all that.

All that sort of handwringing—it must strike you as crazy, since you know we've got a surplus. The reason is, they committed—both parties did, back at the first of the year—to take the Social Security surplus and

put it over here and only spend the non-Social Security surplus. It never existed before, the non-Social Security surplus. And it's going to get bigger and bigger. And this problem won't be here next year or the year after next, but right now it's real small; and what they want to spend is real big, and they don't want to raise the money to raise the difference. That's what's going on.

How many of you knew that before I explained it? [*Laughter*] About 10 hands. That's what's going on. If we were under the old accounting system, this would be like falling off a log. It would have no, sort of, larger economic impact in the short run, but it could be a very bad habit to get into over the long run.

So if we can stop now, we ought to stop now. But in order to stop now, with no gimmicks, we have to work together. If we don't, you wind up with the problems that the House of Representatives is confronting now. Just let me give you some examples.

Already in health care, they want to cut \$85 million from my request for childhood immunizations. That's 170,000 kids who won't get the vaccines they need to ward off major childhood diseases like measles and mumps. There's no money in this proposal, which was strongly pushed by the First Lady, to support graduate medical education at children's hospitals, where many of our pediatricians receive their training and over half of the specialists in many areas receive their training.

It doesn't offer even a modest downpayment on my \$1 billion effort to support our Nation's health care safety net of public hospitals and clinics, which—you remember back in '94, when we got whacked around on health care, and everybody accused Hillary and me of wanting to have the Government take over the health care system, which was not true. They said that if our proposal passed, it wouldn't work. We said, if something didn't pass, the number of uninsured would go up. And sure enough, we were right, and you see the numbers, now.

Well, one of the things we can do in the short run is to dramatically beef up the public health care network. In my home State, for example, over 85 percent of all the immunizations are now done in the public health

clinic, the county health clinic. Even upper-class people get their kids immunized in the health clinic. Solves all those liability problems and other things, and it's just something we did when I was there. But we need to do this. But it can't be done with this bind they're in.

And let me tell you this: If something is not done, they're going to go back and cut everything 3 percent across the board. If they exempt defense, they'll have to cut everything 6 percent across the board. And that is a huge amount of money.

So I'd like to respectfully suggest that Congress go back and look at the budget I sent them 7 months ago. It makes all the investments that they want to make and the investments that I believe in. It stays within the spending caps by providing offsets, including a 55-cent-a-pack excise tax on tobacco.

Now, I believe—I think it's good fiscal policy, and you know it's good health policy. You know more than 400,000 Americans die every year from smoking-related diseases; almost 90 percent of our people start smoking as teenagers, and one of the most effective ways to get the attention of teenagers is to raise the price.

So Congress now faces this, for them, Biblical choice: cut investments in areas like health care and education and the environment; spend from the Social Security Trust Fund at least one more year; or maintain our fiscal discipline and save children's lives by raising the price of smoking, closing some corporate loopholes, and doing a few other things to raise some money here.

I know what I believe the right choice is. I think most Americans would agree with me. I will work with Congress to put politics aside and do the right thing. Congress is clearly capable of working with me. We did it in 1996, with the welfare reform bill, which has cut welfare rolls almost in half and, after I vetoed two earlier attempts, provided billions of dollars in child care and kept the guarantee of Medicaid and food stamps for poor families and work. We did it in the 1997 Balanced Budget Act. And last week, the House of Representatives did it again when they finally passed a strong, enforceable Patients' Bill of Rights, thanks to you and others.

We are one step closer to seeing all Americans, including those in HMO's, have the right to the nearest emergency room care, the right to a specialist, the right to know you can't be forced to switch doctors in the middle of a treatment, the right to hold a health care plan accountable if it causes grave harm. But let me remind you, this is not the law of the land yet. This is a bill which has passed the House of Representatives. A much, much weaker bill passed the Senate.

So if you look at the vote in the House—thanks to the solid support of the Members of our party and some very, very brave people in the Republican Party who stuck their necks out, took a lot of heat from their leadership and from the health insurance companies, led by Congressman Norwood and others—we got a big victory in the House. It wasn't close. It was a big victory—won it by over 100 votes.

Now, the Senate should listen to that and see the will of the American people and give us a bill that is not loaded down with special-interest poison pills. That was their original strategy. We'll pass this bill really strong, but we'll have so much other stuff on it that the President will not be able to sign it, or if he does, he'll be sick for 4 days. *[Laughter]*

And so I say to you, thank you for your efforts. I want to ask you to do two things. Number one, write every one of those Members of Congress that voted right on that bill and recognize that, especially for the Republicans, it was a tough vote, and give them a pat on the back. And number two, don't stop until it comes to my desk in the right form. We are a long way from home, but we have a good chance to win.

Now, I want to say there are some other opportunities for victory. Congress can put progress ahead of partisanship by making it possible for the millions of Americans with disabilities who want to work but are afraid to because they would lose their Medicare or Medicaid, to do that—to go to work and keep their Government health care coverage.

The Senate has already passed, by a 99–0 vote, the “Work Incentives Improvement Act,” to ensure that Americans with disabilities can gain the dignity of a job without fear of losing their health insurance. A bipar-

tisan majority in the House has co-sponsored the same measure. I will sign it.

There is a modest cost associated with this bill for the Government. I have offered them offsets for that. And so far, they don't want to take that, either. But it would be a pity, when virtually everybody in the Congress knows this is the right thing to do, to nickel-and-dime this to death. We're talking about thousands and thousands and thousands of people's lives.

I don't know if you know anybody like this. I've had the privilege of meeting a substantial number of people who are disabled, who got to go into the work force because somebody made provisions for health insurance or because they were in an income category where they could keep their Medicaid for a while. And I've met even more who would go in a New York minute if they knew they could keep their Medicaid or their Medicare. And I've met a lot of employers who would hire them but who know they cannot afford their health insurance. So I implore you, do what you can to help us pass this. This is a bill that everybody's for, and the process is still fooling around with it because of a modest cost that can easily be offset. That is very important.

The third thing I ask for your help on doesn't require any more legislation, and it's consistent with a commitment you have already made. And that is to get children enrolled in the Children's Health Insurance Program.

Since the CHIP program went into effect, it has provided health coverage to over a million children whose families can't afford health coverage and who make too much to be eligible for Medicaid. I am grateful to you for helping us to create it and for helping us put it into effect. But as your president said, somewhere between 10 and 11 million children in America still lack health insurance. That's way over 15 percent. The majority could be covered under either CHIP or Medicaid.

We've still got 2 or 3 million kids out there who are Medicaid-eligible who aren't covered—if we can get word out to their families and sign them up. We know that children who lack health insurance have higher rates

of treatable conditions like asthma, ear infections, vision problems. We know when a child can't see a blackboard clearly or hear the teacher precisely or pay attention to anything other than his or her own pained breathing, the kids aren't going to be able to learn.

CHIP and Medicaid can change all that for millions of people. And when we passed the CHIP program, we thought it would insure 5 million people, if we could also get the Medicaid insurance rates up, and solve at least half the problem. Now, 2 years later, we've only insured a million. But it was only this year, to be fair, that all 50 States had their programs in place. So we're now at the take-off point, and we will be judged—you and I and all of us—on how well we do from here on out.

This year—or last year, I established an inner-agency task force to come up with some innovative strategies to get the word out to parents about CHIP and Medicaid. Today I'm releasing their first annual report, which details a lot of promising outreach efforts. Just for example, the Department of Agriculture, which administers the school lunch program, has added information on CHIP and Medicaid to applications it sends to every school district in America. Millions of parents who fill out their school lunch forms now will have a chance to learn about these health programs.

Other promising innovations are also in the works. Thousands of AmeriCorps and Vista volunteers who deal directly with low-income families every day will soon have information in their training manuals on how to enroll children in CHIP and Medicaid. Tens of millions of elderly Americans who may have grandchildren eligible for CHIP and Medicaid will soon be able to read about these programs in the annual letters they receive from Social Security and Medicare.

But as the Vice President has been saying for months and months and months, if we're going to bring health care coverage to more children, we have to start with where the children are—in the schools. That's why today, I am issuing an Executive order to the Secretaries of Education, Agriculture, and Health and Human Services, directing them to find the most innovative school-based

strategies now being pursued at the State and local level, to report back to me in 6 months on how we can replicate them in every community in the country.

I'm also sending a letter to States, clarifying that they can use the CHIP fund for school-based outreach efforts. And we're going to dedicate over \$9 million in new research grants to find out what outreach methods in schools or elsewhere work best. I believe these things will go a long way toward bringing health coverage to our children. But we need help from the churches, from the YMCA's and the YWCA's, from all the community organizations. And we need help from all the physicians and the public health units throughout our country.

It is simply inexcusable that we're sitting here, and have been, with the money for 2 years to provide health insurance to 5 million kids, and 80 percent of them are still uninsured. And it is conceivable that we could do better than 5 million children with the money appropriated if we had effective enough outreach.

And to those of you who see a lot of people whose parents' first language is not English, I know we have trouble there. But I would implore you, do what you can, when you go back home, with your local groups and your local medical societies and your local health clinics and your local schools, to get them to do this. There is no stigma associated with this. Most people will walk through a wall to get their kids decent health care coverage if they know it is available.

This is simply a question—the average person who's not covered by this doesn't know CHIP from block. [*Laughter*] Or Medicaid from Lego, or whatever. You know, we've got to deal with people that—you know, most normal people worry about their lives, not Government acronyms. And we're dealing with—a lot of these folks don't know anything about this. And you can help to make sure, in your community, that the schools and the community groups and the religious organizations and everybody, is doing their outreach on this. It is profoundly important.

Now, let me just say this last point. If every child eligible for CHIP and Medicaid were enrolled, there would still be millions who

lacked coverage. You know it, and I do, too. You know that I and Hillary and the Vice President, we have always believed it is wrong for any American, much less any child, not to have affordable, quality health care. I know that the American Academy of Pediatrics believes that. I will keep working to change that as long as I am President. I will keep looking for ways to end this unconscionable and growing gap of uninsured care.

Our hospitals will continue to have problems—and again, I would say, this has nothing to do—and you can help us with this—this has nothing to do with the Government taking over health care. The Government's not taking over health care in the CHIP program or Medicare or Medicaid.

If we'd let these people—next to the kids, the fastest growing group of uninsured people are 55 to 65 years old, who retire and can't get employment-based health insurance anymore. We ought to let them buy into Medicare. You know, I get into all these fights with the insurance companies—and I hate to fight with them all the time—but the truth is, America has a system of financing health care that dictates high levels of uninsured, which dictates enormous burdens on the health care system of the country and burdens on everybody that buys insurance.

And they can deny otherwise as long as they want to, but all you have to do is look around at other examples, and you know it's simply not true. There is no other conceivable explanation. It is the system by which we finance our care which has got us in the fix we're in now.

And so we are trying to do this, and we are trying to do the bill for the disabled, and there are lots of other things we can do. But if you look at everything we do that's going to make a difference, it's because we have changed the financing. And those are facts, and you can get them out there.

For the last 6½ years, I have had the great honor to serve as President of this country. I have about a year and 4 months left, maybe a little more. I've worked hard to turn this country around and then to keep the American people always thinking about tomorrow, about the challenges and the opportunities of the new century and the new millennium.

Well, now we have turned America around. And the great test is whether we are going to take this moment and shape our tomorrows. That's what you do every day, every time you take some preventive measure, every time you do something to help a child. There may be some screaming and crying, but you know they're all going to be better off tomorrow.

I just would like to see all of us here in Washington take the same attitude toward the future of all our children's tomorrows that you take toward each child's tomorrow. If we do, America's best days lie in the new millennium.

Thank you very much.

NOTE: The President spoke at 11:37 a.m. at the Washington Convention Center. In his remarks, he referred to Dr. Joel J. Alpert, president, and Dr. Donald E. Cook, president-elect, American Academy of Pediatrics.

Memorandum on School-Based Health Insurance Outreach for Children

October 12, 1999

Memorandum for the Secretary of Health and Human Services, the Secretary of Education, the Secretary of Agriculture

Subject: School-Based Health Insurance Outreach for Children

The lack of health insurance for millions of Americans remains one of the great challenges facing this Nation. To help address this issue, I worked with the bipartisan Congress to create the Children's Health Insurance Program (CHIP), the single largest expansion of children's health insurance in 30 years. The 1997 Balanced Budget Act allocated \$24 billion over 5 years to extend health care coverage to millions of uninsured children in working families. CHIP builds on the Medicaid program, which currently provides health coverage to most poor children, and together, these programs could cover most uninsured children.

Yet too few uninsured children eligible for CHIP or Medicaid participate. Barriers to enrollment include parents' lack of knowledge about the options; cultural and language

barriers; complicated application and enrollment processes; and the “stigma” associated with so-called welfare programs. The Vice President and I have made removing these barriers to enrollment a high priority. In 1997, I launched a major public-private outreach campaign called “Insure Kids Now.” Foundations, corporations, health care providers, consumer advocates, and others have participated through activities such as setting up enrollment booths at supermarkets and promoting the national toll-free number (1-877-KIDS NOW) on grocery bags, TV and radio ads, and posters. In addition, we created a Federal Interagency Task Force on Children’s Health Insurance Outreach in February 1998, which has implemented over 150 new activities to educate and train Federal workers and families nationwide about the availability of Medicaid and CHIP.

Today I am directing the Secretaries of Health and Human Services, Education, and Agriculture to focus children’s health insurance outreach on a place where we know we can find uninsured children: schools. State experience indicates that school systems are an ideal place to identify and enroll uninsured children in Medicaid or CHIP because schools are accepted by parents as a conduit for important information. In addition, health insurance promotes access to needed health care, which experts confirm contributes to academic success. We have learned that children without health insurance suffer more from asthma, ear infections, and vision problems—treatable conditions that frequently interfere with classroom participation; and children without health insurance are absent more frequently than their peers. As we strive for high standards in every school and classroom, it is essential that we help families ensure their children come to school ready to learn.

Therefore, I hereby direct you, in consultation with State and local agencies, to report to me a set of recommendations on specific actions to encourage and integrate health insurance enrollment and outreach for children into schools, consistent with the mission of your agency. This report shall include:

- Specific short- and long-term recommendations on administrative and

legislative actions for making school-based outreach to enroll children in Medicaid and CHIP an integral part of school business. These may include:

- Technical assistance and other support to school districts and schools engaged in outreach;
- Suggestions on how to effectively use the school lunch program application process to promote enrollment in health insurance programs;
- Lists of practices that have proven effective, such as integration of outreach and enrollment activities into school events such as registration, sports physicals, and vision and hearing testing; and
- Model State CHIP and Medicaid policies and plans for school-based outreach.
- A summary of key findings from the national and regional conferences scheduled for this fall on the topic of school-based outreach. These conferences will bring together national and State education officials, Medicaid and CHIP directors, public policy experts, and community-based organizations to examine the use of schools to facilitate the enrollment of children in Medicaid and CHIP; evaluation tools to monitor the effectiveness of current school-based outreach efforts; and best practices in school-based outreach and enrollment for children’s health insurance.
- Recommendations on methods to evaluate CHIP and Medicaid outreach strategies in schools. Performance measures should be an integral part of school-based CHIP and Medicaid outreach strategies, as they can inform policymakers on the effectiveness of these strategies, as well as help to identify areas of improvement.

I direct the Department of Health and Human Services to serve as the coordinating agency to assist in the development and integration of recommendations and to report back to me in 6 months. The recommended actions should be consistent with Medicaid and CHIP rules for coverage of appropriate health- and outreach-related activities. They should be developed in collaboration with

State and local officials as well as community leaders and should include recommendations on fostering effective partnerships between education and health agencies. These recommended activities should be complementary, aggressive, and consistent with my Administration's overall initiative to cover uninsured children.

William J. Clinton

Statement on World Population Growth

October 12, 1999

Today we mark the day that the world's population reportedly reaches 6 billion. It took just 12 years—from 1987 to today—for the world's population to expand from 5 to 6 billion people. We should be thankful that people today live longer and healthier lives than ever before. But over the next few years, this rapid growth and its effect on our environment and quality of life will pose difficult challenges for all of us.

In 1994 the United States helped forge a consensus at the International Conference on Population and Development in Cairo, Egypt, on a comprehensive approach to stabilizing world population growth. We agreed to work with other nations to help prevent the spread of HIV/AIDS, to improve the status of women, to enhance educational opportunities for children, and to support voluntary family planning and related health care.

My administration has made important strides in meeting these objectives. At home, we have increased funding for family planning and reproductive health services, which have helped reduce teen pregnancies and abortions. Overseas, we have invested more than \$5.5 billion in over 100 countries on health and population initiatives and on women's empowerment.

We have also worked to protect our environment and ensure that it can sustain the development needs of a growing population. We are learning that technology can help developing countries grow while bypassing some of the environmental costs of the industrial age. We must promote that technology so that we can address both climate change

and the challenge of providing clean energy for all the world's citizens.

Finally, we have recognized that the best way to stabilize population growth is to fight poverty and to build healthy, growing economies in the developing world. The debt relief package the world's wealthiest nations agreed to in Cologne this year will help us do that. Last month, I went even further, announcing that the United States will forgive 100 percent of the debt owed us by the world's least developed countries if they will use the savings to address basic human needs. And I committed the United States to a new effort to accelerate the development of vaccines for diseases that devastate the developing world.

As we mark this day, the central question we face is not simply how many people will live on this planet, but how they will live. We must refuse to accept a future in which one part of humanity lives on the cutting edge of a new economy, while another part lives on the edge of survival. And we must work for the day when all people have the education, health, security, safe environment, and freedom to lift their lives.

Message to the Congress Transmitting a Report on the Operation of the Caribbean Basin Economic Recovery Act

October 12, 1999

To the Congress of the United States:

As required by section 214 of the Caribbean Basin Economic Recovery Expansion Act of 1990 (19 U.S.C. 2702(f)), I transmit herewith to the Congress the Third Report on the Operation of the Caribbean Basin Economic Recovery Act.

William J. Clinton

The White House,
October 12, 1999.

Remarks at the Eighth Millennium Evening at the White House

October 12, 1999

[The First Lady began the program making brief remarks and introducing the evening's featured speakers: Dr. Vinton Cerf, senior

vice president of Internet architecture and technology, MCI WorldCom, who discussed the evolution of Internet technology; and Dr. Eric Lander, director, Whitehead Institute/MIT Center for Genome Research, who discussed advances in genetic research and biotechnology.]

The President. We have had many wonderful nights here, but I don't think I've ever been more stimulated by two talks in my life. Thank you, Dr. Cerf. Thank you, Dr. Lander.

I would like to also say a word of appreciation to Hillary. I think that as our time here draws toward its close, it's clear that she has been, I believe, the most active and innovative First Lady since Eleanor Roosevelt, for, perhaps these Millennium Evenings will last longer in the imagination of America than virtually anything any of us have done, and I thank her for that.

Also, being term-limited does have its compensations. Normally, at this time of year, in this kind of year, I'd be doing something else tonight. *[Laughter]* Yesterday I called the Vice President to rub it in and describe what I would be doing tonight. *[Laughter]* And I was having a very good time turning the screw about how fascinating this was going to be. And finally, he said, "That's okay, you need to be there more than I do." *[Laughter]* The jokes about my technological and scientific limitations are legion around the White House. *[Laughter]*

So I have been thinking of all these questions—do I really want a mouse smart enough to go to Princeton? *[Laughter]* Won't it be sad to have an Internet connection with Mars if there are no Martians to write to or E-mail us? *[Laughter]* I am glad to know that the total connection of the Internet to the nervous system of human beings is a little ways out there in the future. I had been under the impression that that has already occurred among all children under 15 in America. *[Laughter]*

This is an amazing set of topics. Let me say just one other thing. I really loved seeing—on a slightly sad note, I loved seeing that wonderful, famous picture of Wilt Chamberlain and Willie Shoemaker. Some of you may know the great Wilt Chamberlain passed away today, one of the greatest athletes of the 20th century. So I hope you will

have him and his family and friends in your thoughts and prayers tonight.

This is a fitting thing for us to do in the White House, because innovations in communication and technology are a very important part of the history of this old place. In 1858 the first transatlantic telegraph transmission was received here in a message that Queen Victoria sent to President Buchanan. Later, the first telephone in Washington, DC, was located in a room upstairs, and we now have a replica of that telephone in the same room upstairs. The first mobile phone call to the Moon was made here by President Nixon 30 years ago. Even these Millennium Evenings have made their own history. This is where we held the first-ever cybercast at the White House.

So I want to thank the speakers for building on all of this and telling us what we can look forward to in the future and for reminding us that as we unlock age-old mysteries and make what we can think more possible to do, there are ways to do it that bring us together as a society.

So I would like to begin the questioning, if I might, with a question to Dr. Lander, because it bears on a great deal of the work we've done.

You talked about how we were 99.9 percent the same, but how if you looked at how many permutations there were in the one-tenth of a percent left, we could still be very different. I think it's very interesting—and I talk about this all the time—that as we're on the edge of this new millennium and we have these evenings and we imagine this future that you have sketched out to us, this is what we all like to think about, how exciting, how wonderful, how unbelievable it can be. The biggest threat to that future is how many of us on this globe are still in the grip of the most primitive of human limitations, the fear of the other, people who are different from us. And we see all over the world, from Bosnia and Kosovo to the Middle East, to Northern Ireland, to the tribal wars in Africa, how easily the focus on our differences—that one-tenth of one percent—as what matters can lead first to fear and then to hatred and then, ultimately, to dehumanizing people who are different.

And it's very interesting—as someone who grew up in the segregated South and lived with the whole terrible and, yet, beautiful struggle of the civil rights years, to think that there were in my hometown people who were dehumanizing other people because of the one-tenth of one percent difference between them is quite an awesome thing to contemplate.

So I would like to ask you, if you could say in ways that would make sense to us, explain to us a little bit what is it that makes us the same and what is it that makes us different? And how could we communicate this scientific knowledge to people in a way that would diminish the force of racism and other bigotry in the world in which we live?

[Dr. Lander responded to the President's question, and Ellen Lovell, Director, White House Millennium Council, then led the question-and-answer portion of the evening. One of the questions concerned the legal status of privacy rights.]

The President. Let me just say this. We've been working on this, and it's very important to me because I'm a fanatic about this issue. I want unlimited scientific discovery, and I want unlimited applications. But I think we don't want people to lose their sense of self and the fragility of their personhood, here, in some sort of assault. So we've been working on this.

What you said sounds great, but it's not as easy to do as it sounds. So I think it might be helpful, if I could just ask Secretary Shalala, who is in charge of one piece of this, which is our efforts to protect the privacy of medical records, just to talk a little bit in practical terms about what we're doing to respond to this young man's question.

Donna, would you—there's a mike.

[Secretary of Health and Human Services Donna E. Shalala noted the relative lack of Federal protection of an individual's health information, citing that video rental records are more secure. She also said a person's State of residence can make a difference.]

The President. But let's deal with two hard questions here, real quick—I think this is important. Question number one, pretty soon if the genome project is brought to fru-

ition, according to what Dr. Varmus told me, when I spent a day out there, it will become normal in some point in the not-too-distant future for young mothers to go home with their babies from the hospital with a map of their genetic future. You may not want to know about Alzheimer's, but you could know about things that even if you can't cure you could delay, defer, or minimize. So you get that.

Now, the mother and the father are employed by someone, and they provide family health insurance. Since private insurance is based on a reasonable approximation of risk—I don't agree with the way we finance health care in this country; you all know that, but that's a fight I didn't win here in the last 7 years—if it's based on an assessment of risk, what should the insurance company have a right to know? And if the insurance company doesn't have a right to know, haven't you undermined the whole basis of privately funded insurance based on risk—question one. Question two for you.

Dr. Cerf. We don't get to answer that one?

The President. Yes, I want you to answer that, but I want you guys to talk. Question two, this is the problem we face in a much more grave sense in dealing with the prospect of cyberterrorism or something. It's one thing for us to write laws that protect privacy of records. But you just got through—in answering Omar's question, you were talking about how, well, but all these kids are always figuring out—well, among the things they're figuring out is how to break into various systems all the time. So even if we had perfect laws, how are we going to protect privacy when we're dealing with all of these creative geniuses out there working through the net? Respond to those two questions.

[Dr. Lander answered that insurance companies' right to know depended on whether insurance was about matching rates to risks or about sharing risks not chosen. The question-and-answer portion of the evening continued and included a question from the Internet by Danella Bryce in Sydney, Australia, about technology's effect on alleviation of growing numbers of the disadvantaged in world population.]

The President. Can I give—you said that we got 6 billion people last night. Half of them live on \$2 a day; 1.3 billion live on \$1 a day or less. Those are the numbers behind what Ms. Bryce is asking.

[*The discussion continued.*]

The President. If I might just interject, I don't know the answer to this, but I've spent a lot of time thinking about it. This woman, Ms. Bryce, she works, and she's talked about she works in sustainable development. A big problem in poor countries, they totally destroy the environment to try to develop, and then they don't have anything upon which to develop. The biggest problem in our hemisphere is Haiti. If you fly over the island of Hispaniola, you know when you're going from the Dominican Republic to Haiti because in all the years when it was governed by dictatorships they just tore down all the trees and—if any of you know anything about it, know this.

The real question is, we used to have certain assumptions about development in a poor country; that if you wanted ever to build a middle class life for a substantial number of the people, yet have X amount of electric generating capacity, and you had to have Y number of roads, and you had to have Z number of manufacturing companies, no matter what they did to greenhouse gases, and that eventually you get around to building schools and universal education—and then 30 or 40 years later you start letting the girls go to school with the boys and there is this sort of thing that would happen.

I do believe that the question, the real question is if you're running a country like this, should you put this sort of infrastructure development first? That is assuming you've got a base level of electricity necessary to run a system. Should you do this first because this gives you the possibility to skip a whole generation of development that would otherwise take 30 years in the economy and in education? And I think the answer to that, at least, is, maybe—at least, is, maybe. That I think is really the question that this woman is asking.

[*The discussion continued.*]

The President. If I could just give you one example, because I think this may have also relevance for remote, physically remote areas in America, Appalachia, the Native American reservations, things of this kind.

We were talking before we came in here tonight—I was out in northern California the weekend before last. And I was talking with a lot of people who work for eBay, and they were telling me that there are now, in addition to the employees of eBay, over 20,000 people who make a living on eBay, buying and selling and trading, and that a fair number of these people were actually people who once were on welfare, who moved from welfare to work. That is, from—and presumably a lot of them work—didn't have a lot of formal education. They had made this jump, and a market had been created for them, where they lived, that otherwise would be alien to their own experience. They wouldn't have been able to go down to the bank and get a loan and on and on and on.

Now, last year we made—and this year we will make, through our aid programs in foreign countries—over 2 million microenterprise loans to poor people, to help them start their businesses in Africa and Latin America and Asia. If you could somehow marry the microenterprise concept to setting the infrastructure of the Internet out there, I do think it's quite possible that you could skip a generation in economic development in a way that would reinforce rather than undermine the environment.

[*The question-and-answer portion of the evening continued.*]

The President. Did you say you expected the penetration of the Internet to equal that of the telephone by 2006?

[*Dr. Cerf confirmed the Internet would equal the size of the telephone system by 2006 and, thereafter, exceed both telephone and television.*]

The President. I want to get to the genes, but I think we should answer that question, too. The whole question of whether we're going to develop a digital divide in our country, I think, is a very, very serious one. Our administration, especially the Vice President, when we rewrote the Telecommunications

Act, we fought very hard not only to get people to participate in NetDay to hookup every classroom and library to the Internet by the year 2000—I think we'll get there by the end of the year; functionally, we'll be just about there—but also, to get the Federal Communications Commission to adopt an E-rate which would subsidize the cost to poor schools and poorer hospitals and poor areas and isolated rural areas, so that everyone could have access in the schools.

Now, but the divide won't be bridged until the parents of those children have that in their home. So I think we ought to have as a goal at least to make access to computer technology and to the Internet as universal as telephone access is. And I think until we achieve that, there will be a digital divide, so we ought to try to hasten that day and promote whatever policies we can afford or we can achieve to hasten that day, because until we do, there will be a digital divide.

Dr. Cerf. I agree with that. In fact, it's a goal. A personal goal of mine is to see, literally, Internet everywhere.

The President. Now, what about the gene? That goes to patenting and all that, doesn't it?

[The discussion and question-and-answer portion of the evening continued. The First Lady then introduced the outgoing Director of the National Institutes of Health, Dr. Harold E. Varmus.]

Dr. Varmus. I assume by "outgoing" you mean I'm leaving, as opposed to my social behavior. *[Laughter]*

The President. You mean, as if an outgoing head of NIH were an oxymoron? *[Laughter]*

[Dr. Varmus made brief remarks about the role of genetics in cancer research at NIH.]

The President. Before we go on, I just want to say—we sort of glided over this—this man has done a magnificent job at the NIH for a long time, and I am very grateful. We thank you for it, for your service to your country.

[The question-and-answer portion of the evening continued.]

Ms. Lovell. I think you just summed up the whole evening. And I'm going to give the President the last minute.

The President. Well, you know, that great humorist Ogden Nash once said, "Progress may be all right, but it's really gone on too long." *[Laughter]* And I was thinking that if he were here tonight, he would have to revise his opinion.

This has been an astonishing evening for me and for Hillary and I hope for all the American people and the people throughout the world who have been a part of this.

I want to thank you both. I want to just leave you with one thought: There are public responsibilities involved here, particularly for basic research. We have been very successful, and never more successful than under the leadership of Dr. Varmus, in getting strong bipartisan, nonpartisan support for investments in health. And I think that it's obvious that we can all see that as in our self-interest and as in the public interest. We want to live forever, and we're getting there.

But I think it's quite important also not to forget our responsibilities for basic research in other areas as well. And one of the things that we will come to know as the intersection of your two disciplines, informatics and genomics, come together, then we will have to study even more closely how all this that we know about the human body and its development interacts with changes in the environment.

So other areas of research will be also important, into things like global warming and climate change and the sustainability of the environment. And what I hope we can do is to build a broader consensus, as we look into the new millennium, for the whole research enterprise in those areas where it will never be productive in the beginning, or profitable for people like you, to do the beginning. And then we can find these things, and then the American entrepreneurial genius will take off.

And so I leave here with a renewed commitment to trying to help people like you get started. We may not understand it, those of us in politics, but we have an obligation to help you find it.

And when the first mouse graduates from Princeton, I will invite you both to deliver the commencement address. [Laughter]

Thank you, and good evening.

NOTE: The White House Millennium Evening began at 7:35 p.m. in the East Room at the White House. In his remarks, he referred to basketball Hall of Famer Wilt Chamberlain; and retired jockey Willie Shoemaker. The discussion was entitled, "Informatics Meets Genomics." The transcript made available by the Office of the Press Secretary also included the remarks of the First Lady, Dr. Cerf, Dr. Lander, Secretary Shalala, Ms. Lovell, Dr. Varmus, and the participants in the question-and-answer portion of the evening. The discussion was cybercast on the Internet.

Remarks at George Washington National Forest, Virginia

October 13, 1999

Thank you very much, Peter Pinchot, Secretary Glickman, Under Secretary Lyons. I also want to acknowledge Mike Dombeck, the Chief of the Forest Service, and George Frampton, the Chair of the Council on Environmental Quality.

There are many, many things I'd like to say today, but before I begin, there has been—there was a development in the news today that I need to make a comment on, because I believe this is my only opportunity to see the press and, through them, to speak to the American people.

Philip Morris Company Admission

So I would like to just take a moment to note that after years of denial and deception, the Philip Morris Company has admitted that cigarette smoking causes lung cancer and other diseases. This formal acknowledgement comes far too late, but still we must all welcome it. It can be the beginning of clearing the air.

It certainly makes clear, as I've said for years, that the tobacco companies should answer for their actions in court. They should stop marketing their products to children. And certainly, they should do much more to reduce youth smoking. So this is a good day for the cause of public health and our children in America.

Forest "Roadless" Areas

Now, Peter talked about his grandfather and Theodore Roosevelt. One of my proudest possessions—some of you know I collect old books about America. I just finished reading a fascinating account by Frances Perkins, the first woman to serve in the Cabinet, who was President Franklin Roosevelt's Labor Secretary during his entire tenure, about her 35-year relationship with Roosevelt. One of my proudest old American books is a first printing of the proceedings of the very first Governors' conference, held at the invitation of Theodore Roosevelt in 1908. The subject was the conservation of America's natural resources.

In my private dining room at the White House I have a picture of Theodore Roosevelt and all those Governors, signed by all the Governors with whom I served in 1992, when I was elected President. That first Governors' conference remains one of the most important ever held in the White House. So much of what we've done as a nation to conserve our natural resources extends from that day. Peter's grandfather was a guiding spirit behind that conference.

Theodore Roosevelt, himself, said of Gifford Pinchot, "If it hadn't been for him, this conference neither would have nor could have been called." Gifford Pinchot used to say that we must prefer results to routine. I like that a lot. [Laughter] And let me say that, in my view, no one illustrates that principle in our public life today better than Mike Dombeck, who has done such a remarkable job of returning the Forest Service to the vision of stewardship on which it was founded. And I thank you, sir. [Applause] Thank you.

A century ago, when Mr. Pinchot was first dreaming up his plan to protect our forests, this vista looked very different than what we see today. In fact, it was more wasteland than forest. According to one eyewitness, and I quote, "Weather-white ghosts of trees stood on the desolate slopes as a pitiful, battle-scarred fragment of the glory that was once a virgin forest. Not only were the slopes nearly bare, tanneries and dye plants had poisoned the lakes and the mountain streams. The deer and black bear and turkey nearly were wiped out. The land and water

were so thoroughly abused that most people thought the area had no value at all.”

I know that they don’t agree with that now because we have so many of the fine local officials from this area show up here today. I thank them for their presence, and they can be proud of what they represent.

Visionaries like Theodore Roosevelt and Gifford Pinchot, the other men and women of the Forest Service who have cared for this land since 1917, made those dark descriptions a part of history. Nowadays, hundreds of thousands of visitors come here every year to hike, swim, bike, hunt, fish, or just to breathe the fresh air and take in the beautiful sights. The land that once no one wanted is now a thriving forest everyone can enjoy.

This kind of land has been important to me since I was a boy, where I learned by walking the Ozark and Quachita National Forests of my home State that national forests are more than a source of timber, they are places of renewal of the human spirit and our natural environment. At the dawn of the new century we have the opportunity to act on behalf of these forests in a way that honors the vision of our forebears, Roosevelt and Pinchot.

Within our national forests there are large parcels of land that don’t contain roads of any kind and, in most cases, never have. From the beautiful stretch of the Alleghenies that we see here to the old-growth canyonlands of Tahoe National Forest, these areas represent some of the last, best unprotected wildlands anywhere in our Nation. They offer unparalleled opportunities for hikers, hunters, and anglers. They’re absolutely critical to the survival of many endangered species, as you have just heard. And I think it’s worth pointing out they are also very often a source of clean and fresh water for countless communities. They are, therefore, our treasured inheritance.

Today we launch one of the largest land preservation efforts in America’s history to protect these priceless, back-country lands. The Forest Service will prepare a detailed analysis of how best to preserve our forests’ large roadless areas and then present a formal proposal to do just that. The Forest Service will also determine whether similar pro-

tection is warranted for smaller roadless areas that have not yet been surveyed.

Through this action, we will protect more than 40 million acres, 20 percent of the total forest land in America in the national forests, from activities such as new road construction which would degrade the land. We will ensure that our grandchildren will be able to hike up to this peak, that others like it across the country will also offer the same opportunities. We will assure that when they get to the top they’ll be able to look out on valleys like this, just as beautiful then as they are now.

We will live up to the challenge Theodore Roosevelt laid down a century ago to leave this land even a better land for our descendants than it is for us.

It is very important to point out that we are not trying to turn the national forests into museums. Even as we strengthen protections, the majority of our forests will continue to be responsibly managed for sustainable timber production and other activities. We are, once again, determined to prove that environmental protection and economic growth can and must go hand in hand.

Let me give you an example, because I’ve seen a lot of people already saying a lot of terrible things about what I’m doing today and how it is going to end the world as we know it. *[Laughter]* This initiative should have almost no effect on timber supply. Only 5 percent of our country’s timber comes from the national forests. Less than 5 percent of the national forests’ timber is now being cut in roadless areas. We can easily adjust our Federal timber program to replace 5 percent of 5 percent, but we can never replace what we might destroy if we don’t protect these 40 million acres.

As the previous speaker said, today’s action is the latest step taken under the administration of Vice President Gore and me to expand our children’s natural treasures. Over the past 6½ years, we’ve protected millions of acres, from the Yellowstone to the Everglades, from the ancient redwoods of Headwaters to the red rock canyons of Utah. We’re working now to save New Mexico’s spectacular Baca Ranch.

As Secretary Babbitt has said many times, our administration has now protected more

land than any in the history of the country except those of Franklin and Theodore Roosevelt.

I have also proposed an unprecedented \$1 billion lands legacy initiative, with permanent funding over the years to guarantee for the first time ever a continuing fund for protecting and restoring precious lands across America. This initiative represents the largest investment in protecting our green and open spaces since President Theodore Roosevelt set our Nation on this path nearly a century ago. It would allow us to save Civil War battlefields, remote stretches of the historic Lewis and Clark Trail, nearly half a million acres in California desert parks and wilderness areas. It will also allow us to meet the stewardship challenges of the new century by helping communities save small but sacred spaces closer to home.

Unfortunately, this Congress seems intent on walking away from this opportunity. They're trying to slash lands legacy funding by a full two-thirds this year alone, with no action at all to ensure permanent funding in the years ahead. This is not an isolated case, unfortunately. Once again, the leaders of the Republican majority are polluting our spending bills with special-interest riders that would promote overcutting in our forests, allow mining companies to dump more toxic waste on public land, and give a huge windfall to companies producing oil on Federal lands. I have vetoed such bills before because they were loaded up with anti-environmental riders. If necessary, I will do so again.

So, as Congress completes its work on the Interior bill, again I ask the leadership to send me a clean bill that adequately funds the lands legacy initiative and other priorities. But let me be clear: If the Interior bill lands on my desk looking like it does now, I will give it a good environmental response. I will send it straight back to the recycling bin. *[Laughter]*

Ever since that first Governors' conference back in 1908, conservation has been a cause important enough to Americans to transcend party lines. I hope, somehow, we can make it a bipartisan, even a nonpartisan, issue again. Theodore Roosevelt was a great Republican President. Franklin Roosevelt was a great Democratic President. President

Nixon signed a bill creating the Environmental Protection Agency. Over and over again in the last 7 years in which I have had the honor to serve as President, I have worked with people who were both Democrats and Republicans on conservation issues.

Again I have the feeling that this is not a partisan issue anywhere but Washington, DC, and perhaps in a few other places throughout the country. We can't afford that.

When I was a boy growing up in my hometown, it was in a national park, and I could never be in the downtown of my hometown, which was a big city by Arkansas standards, 35,000 people—that even if you were anywhere downtown, you weren't more than 5 minutes walk from the woods.

I know what this can mean to our children and our future. When I was Governor, I was proud that, after leaving office after 12 years, we had—a higher percentage of our land in Arkansas was timberland than it was on the day that I took office, for the first time. And we always did this across party lines. No State was more active in using the Nature Conservancy to buy land and set it aside, and we always did it across party lines.

When people walk through these woods and run into one another, they may talk a lot of things, but I'll bet you very few of them say, "are you a Republican or a Democrat?" I'll bet you've never asked anybody that on a mountain trail.

We want this for our children forever. And it is important that we set a good example. Earlier, Mr. Pinchot talked about the deterioration of the rain forests and the loss of biodiversity around the globe. If we want to help other people meet those challenges and the even larger challenge of climate change, we have to set a good example. We have the wealth and security to do it. We also have no excuse, because now we have the scientific knowledge and the technical means to grow the economy while we improve the environment.

It is no longer necessary to grow a modern economy by destroying natural resources and putting more greenhouse gases into the atmosphere. In fact, we can create more jobs by following a responsible path to sustainable development.

So I hope this day will be important not only for our forestlands but the preservation of fresh water and biodiversity and recreational opportunities. I hope it will be the first step in America resuming a path of responsible leadership toward the environmental future we will increasingly share with our neighbors all across the globe. And I hope all of you will always be very proud of the role you have played in this special day.

Thank you very much.

NOTE: The President spoke at 1:20 p.m. at Reddish Knob Overlook. In his remarks, he referred to Peter Pinchot, environmental consultant, Pinchot Institute for Conservation, and grandson of Gifford Pinchot, the first Chief of the Forest Service.

Memorandum on Protection of Forest “Roadless” Areas

October 13, 1999

Memorandum for the Secretary of Agriculture

Subject: Protection of Forest “Roadless” Areas

At the start of this century, President Theodore Roosevelt dedicated this Nation to the conservation of natural resources—our land, our water, our wildlife, and all the other precious gifts nature had bestowed upon us. One of America’s great central tasks, he declared, is “leaving this land even a better land for our descendants than it is for us.”

In pursuit of that goal, President Roosevelt established new protections for millions upon millions of acres across America. His remarkable legacy includes 5 national parks, 18 national monuments, and dozens of wildlife refuges. Among his most notable conservation achievements were the consolidation of 65 million acres of Federal forest reserves into the National Forest System, and the creation of the United States Forest Service to ensure wise stewardship of these lands for future generations. In this effort, he was guided by Gifford Pinchot, the first Chief of the Forest Service and a founder of America’s conservation movement.

Today, the National Forest System has grown to 192 million acres of forests and

grasslands in 46 States and territories. These lands provide a broad array of benefits to the American people. They support rural industries, sustain fish and wildlife, generate drinking water for 60 million Americans, and provide important recreation opportunities to an increasingly urban population.

Over the years, unfortunately, our Nation has not always honored President Roosevelt’s vision. Too often, we have favored resource extraction over conservation, degrading our forests and the critical natural values they sustain. As the consequences of these actions have become more apparent, the American people have expressed growing concern and have called on us to restore balance to their forests.

My Administration has made significant strides in improving the management of our Federal forestlands. Beginning with the adoption of a comprehensive, science-based forest plan for the Pacific Northwest, we have sought to strengthen protections for wildlife, water quality, and other vital ecological values, while ensuring a steady, sustainable supply of timber and other commodities to support stable rural economies. The new forest planning regulation proposed last month represents another major step in that direction.

It is time now, I believe, to address our next challenge—the fate of those lands within the National Forest System that remain largely untouched by human intervention.

A principal defining characteristic of these lands is that they do not have, and in most cases never have had, roads across them. We know from earlier inventories that there are more than 40 million acres of “roadless” area within the National Forest System, generally in parcels of 5,000 acres or more. A temporary moratorium on road building in most of these areas has allowed us time to assess their ecological, economic, and social values and to evaluate long-term options for their management.

In weighing the future of these lands, we are presented with a unique historic opportunity. From the Appalachian Mountains to the Sierra Nevada, these are some of the last, best unprotected wildlands in America. They are vital havens for wildlife—indeed, some

are absolutely critical to the survival of endangered species. They are a source of clean, fresh water for countless communities. They offer unparalleled opportunities for hikers, campers, hunters, anglers, and others to experience unspoiled nature. In short, these lands bestow upon us unique and irreplaceable benefits. They are a treasured inheritance—enduring remnants of an untrammelled wilderness that once stretched from ocean to ocean.

Accordingly, I have determined that it is in the best interest of our Nation, and of future generations, to provide strong and lasting protection for these forests, and I am directing you to initiate administrative proceedings to that end.

Specifically, I direct the Forest Service to develop, and propose for public comment, regulations to provide appropriate long-term protection for most or all of these currently inventoried “roadless” areas, and to determine whether such protection is warranted for any smaller “roadless” areas not yet inventoried. The public, and all interested parties, should have the opportunity to review and comment on the proposed regulations. In the final regulations, the nature and degree of protections afforded should reflect the best available science and a careful consideration of the full range of ecological, economic, and social values inherent in these lands.

I commend you, along with the Undersecretary for Natural Resources and the Environment, Jim Lyons, the Chief of the Forest Service, Michael Dombeck, and the entire Forest Service for your leadership in strengthening and modernizing the management of our Federal forests—lands held by us in trust for all Americans and for future generations. With the new effort we launch today, we can feel confident that we have helped to fulfill and extend the conservation legacy of Theodore Roosevelt and Gifford Pinchot, and to ensure that the 21st century is indeed a new century for America’s forests.

William J. Clinton

Statement on Floods and Mudslides in Mexico

October 13, 1999

On behalf of the American people, I want to express our deepest condolences to the families of those who have lost their lives and homes in the devastating floods and mudslides in Mexico, which have taken hundreds of lives and left tens of thousands of people homeless. It was less than a month ago that Hurricane Floyd brought flooding to the States along our own East Coast, reminding us of the pain such tragedies can bring and of the importance of neighbor helping neighbor in times of crisis. In the days ahead, our thoughts and prayers will be with our good friends, the people of Mexico, as they work to rebuild from these terrible tragedies. As a people and a Government, we stand ready to help in any way we can.

Statement on the Conclusion of the Independent Counsel’s Investigation of Secretary of the Interior Bruce Babbitt

October 13, 1999

I am very pleased by today’s announcement concerning Interior Secretary Bruce Babbitt. As I said at the beginning of this inquiry, Bruce Babbitt is a man of the highest integrity, and I was convinced that he would be vindicated. Secretary Babbitt’s record of superb stewardship of our Nation’s lands speaks for itself, and I look forward to his continuing service to our country, its people, and its extraordinary God-given resources.

Statement on Hate Crimes Legislation

October 13, 1999

It has been a year since the murder of Matthew Shepard, and 2 years since I first proposed to strengthen the Nation’s hate crime laws. During this time, hundreds of Americans have been injured or killed, simply because of who they are. In response to

this epidemic of violence, people around the country have joined me in calling on Congress to pass this important legislation.

Earlier this year, the Senate passed my legislation, which, if enacted, would strengthen current law by making it easier to prosecute crimes based on race, color, religion, and national origin and by expanding coverage to include crimes based on sexual orientation, gender, and disability.

Congress has the opportunity to complete work on that legislation and to send it to me for signature. I call on Congress to do the right thing and enact hate crime legislation before the end of this session. The Nation cannot afford to wait.

Statement on the Military Coup d'Etat in Pakistan

October 13, 1999

The events in Pakistan this week represent another setback to Pakistani democracy. Pakistan's interests would be served by a prompt return to civilian rule and restoration of the democratic process. I urge that Pakistan move quickly in that direction.

I am sending my Ambassador back to Islamabad to underscore my view directly to the military authorities and to hear their intentions. I will also be consulting closely with all concerned nations about maintaining peace and stability in South Asia.

Message to the Congress Transmitting a Report on Telecommunications Payments to Cuba

October 13, 1999

To the Congress of the United States:

As required by section 1705(e)(6) of the Cuban Democracy Act of 1992, 22 U.S.C. 6004(e)(6), as amended by section 102(g) of the Cuban Liberty and Democratic Solidarity (LIBERTAD) Act of 1996, Public Law 104-114, 110 Stat. 785, I transmit herewith a semiannual report "detailing payments made

to Cuba . . . as a result of the provision of telecommunications services" pursuant to Department of the Treasury specific licenses.

William J. Clinton

The White House,
October 13, 1999.

Message to the Senate Transmitting the Food Aid Convention 1999 With Documentation

October 13, 1999

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Food Aid Convention 1999, which was open for signature at the United Nations Headquarters, New York, from May 1 through June 30, 1999. The Convention was signed by the United States June 16, 1999. I transmit also, for the information of the Senate, the report of the Department of State with respect to the Convention.

The Food Aid Convention 1999 replaces the Food Aid Convention 1995. Donor members continue to make minimum annual commitments that can be expressed either in the quantity or, under the new Convention, the value of the food aid they will provide to developing countries.

As the United States has done in the past, it is participating provisionally in the Food Aid Committee. The Committee granted the United States (and other countries) a 1-year extension of time, until June 30, 2000, in which to deposit its instrument of ratification.

It is my hope that the Senate will give prompt and favorable consideration to this Convention, and give its advice and consent to ratification by the United States at the earliest possible date.

Remarks on Senate Action on the Comprehensive Nuclear-Test-Ban Treaty and an Exchange With Reporters

October 13, 1999

The President. Good evening. I am very disappointed that the United States Senate voted not to ratify the Comprehensive Nuclear-Test-Ban Treaty. This agreement is critical to protecting the American people from the dangers of nuclear war. It is, therefore, well worth fighting for. And I assure you, the fight is far from over.

I want to say to our citizens, and to people all around the world, that the United States will stay true to our tradition of global leadership against the spread of weapons of mass destruction. The Senate has taken us on a detour. But America eventually always returns to the main road, and we will do so again. When all is said and done, the United States will ratify the test ban treaty.

Opponents of the treaty have offered no alternative, no other means of keeping countries around the world from developing nuclear arsenals and threatening our security. So we have to press on and do the right thing for our children's future.

We will press on to strengthen the worldwide consensus in favor of the treaty. The United States will continue, under my Presidency, the policy we have observed since 1992 of not conducting nuclear tests. Russia, China, Britain, and France have joined us in this moratorium. Britain and France have done the sensible thing and ratified this treaty. I hope not only they, but also Russia, China, will all, along with other countries, continue to refrain from nuclear testing.

I also encourage, strongly, countries that have not yet signed or ratified this treaty to do so. And I will continue to press the case that this treaty is in the interest of the American people.

The test ban treaty will restrict the development of nuclear weapons worldwide at a time when America has an overwhelming military and technological advantage. It will give us the tools to strengthen our security, including the global network of sensors to detect nuclear tests, the opportunity to demand onsite inspections, and the means to

mobilize the world against potential violators. All these things, the Republican majority in the Senate would gladly give away.

The Senators who voted against the treaty did more than disregard these benefits. They turned aside the best advice—let me say this again—they turned aside the best advice of our top military leaders, including the Chairman of the Joint Chiefs of Staff and four of his predecessors. They ignored the conclusion of 32 Nobel Prize winners in physics, and many other leading scientists, including the heads of our nuclear laboratories, that we can maintain a strong nuclear force without testing.

They clearly disregarded the views of the American people who have consistently and strongly supported this treaty ever since it was first pursued by Presidents Eisenhower and Kennedy. The American people do not want to see unnecessary nuclear tests here or anywhere around the world.

I know that some Senate Republicans favored this treaty. I know others had honest questions but simply didn't have enough time for thorough answers. I know that many would have supported this treaty had they been free to vote their conscience and if they had been able to do what we always do with such treaties, which is to add certain safeguards, certain understandings that protect America's interest and make clear the meaning of the words.

Unfortunately, the Senate majority made sure that no such safeguards could be appended. Many who had questions about the treaty worked hard to postpone the vote because they knew a defeat would be damaging to America's interest and to our role in leading the world away from nonproliferation. But for others, we all know that foreign policy, national security policy has become just like every domestic issue—politics, pure and simple.

For 2 years, the opponents of this treaty in the Senate refused to hold a single hearing. Then they offered a take-or-leave-it deal: to decide this crucial security issue in a week, with just 3 days of hearings and 24 hours of debate. They rejected my request to delay the vote and permit a serious process so that all the questions could be evaluated. Even worse, many Republican Senators apparently

committed to oppose this treaty before there was an agreement to bring it up, before they ever heard a single witness or understood the issues. Never before has a serious treaty involving nuclear weapons been handled in such a reckless and ultimately partisan way.

The Senate has a solemn responsibility under our Constitution to advise and consent in matters involving treaties. The Senate has simply not fulfilled that responsibility here. This issue should be beyond politics, because the stakes are so high. We have a fundamental responsibility to do everything we can to limit the spread of nuclear weapons and the chance of nuclear war. We must decide whether we're going to meet it.

Will we ratify an agreement that can keep Russia and China from testing and developing new, more sophisticated advanced weapons; an agreement that could help constrain nuclear weapons programs in India, Pakistan, and elsewhere, at a time of tremendous volatility, especially on the Indian subcontinent? For now, the Senate has said, no.

But I am sending a different message. We want to limit the nuclear threat. We want to bring the test ban treaty into force.

I am profoundly grateful to the Senate proponents of this treaty, including the brave Republicans who stood with us, for their determination and their leadership. I am grateful to all those advocates for arms control and national security and all the religious leaders who have joined us in this struggle.

The test ban treaty is strongly in America's interest. It is still on the Senate calendar. It will not go away. It must not go away. I believe that if we have a fair and thorough hearing process, the overwhelming majority of the American people will still agree with us that this treaty is in our interest. I believe in the wisdom of the American people, and I am confident that in the end, it will prevail.

Q. Mr. President, when you say the fight is far from over, sir, do you mean that you expect this treaty to be brought up again during your term in office?

The President. I mean, I think that—we could have had a regular hearing process in which the serious issues that need to be discussed would have been discussed, and in which, as the Senate leaders both agreed yesterday when they thought there was an

agreement and they shook hands on an agreement, would have resulted in next year being devoted to considering the treaty, dealing with its merits, and then, barring extraordinary circumstances, would have put off a vote until the following year.

By their actions today the Republican majority has said they want us to continue to discuss and debate this. They weren't interested in the safeguards; they weren't interested in a serious debate; they weren't interested in a serious process. So they could have put this on a track to be considered in an appropriate way, which I strongly supported. They decided otherwise.

And we, therefore, have to make it clear, those of us who agree, that it is crazy for America to walk away from Britain and France, 11 of our NATO Allies, the heads of our nuclear labs, the Joint Chiefs of Staff, 32 Nobel laureates, and the whole world, having depended on us for all these decades, to lead the fight for nonproliferation. Therefore, we have to keep this issue alive and continue to argue it in the strongest and most forceful terms.

I wish we could have had a responsible alternative. I worked until the 11th hour to achieve it. This was a political deal. And I hope it will get the treatment from the American people it richly deserves.

Thank you.

NOTE: The President spoke at 8:37 p.m. outside the Oval Office at the White House.

Remarks at a Democratic Leadership Council Gala

October 13, 1999

Thank you. Let me say, first, it's good to be back. I want to thank Al From and Senator Joe Lieberman. And I have seen Senator Robb and Senator Breaux. I understand Senator Landrieu is here. I saw Cal Dooley, and I know there are some other Members of the House here. My former Chief of Staff and Envoy to Latin America, Mack McLarty, is here. I saw Harris Wofford, who has done a magnificent job with our national service program. And I know there are a lot of others here.

But I want to say something about Sam Fried, the gentleman who introduced me. First of all, he gave a good speech, didn't he? I mean, he's got a great gift in capturing our vision. And he also did the nicest thing imaginable; he said how much he liked my phrase about putting a human face on the global economy, which I use three times a day. He didn't tell you the truth. He gave me that phrase, Sam Fried. So he could either be a speechwriter or a Senate candidate from Ohio or anyplace else he wants to run. But I think we need to recruit people from the private sector to run for office with the DLC message. And thank you, my long time friend.

This conference is designed to talk about trade in the global economy in the information society. And I want to talk about that tonight. But I want to try to put it into some sort of context.

I began a conversation with many of you, and led by and prodded by Al From, 15 years ago now. Tonight we know some things about the Third Way and about our credo of opportunity for all, responsibility from all, and a community of all Americans. We know some things tonight about that that we only believed 15 years ago. We know that if this credo is translated into meaningful ideas and real policies, that it's not only good politics; it's very good for America.

In 1992, when Al Gore and I went before the American people, we made an argument. And that's all it was; it was an argument. We said, "We want to put people first. We want a country that's run by opportunity, responsibility, and community. We want a new economic policy. We want a new crime policy. We want a new welfare policy. We want a new environmental policy. We want a new foreign policy. We want to make America strong, America united, America a responsible partner and leader for peace and prosperity and security in the world." And it was just an argument. Thank goodness it was a good enough argument, under the circumstances, to win the election, thanks to an awful lot of you.

Tonight, it is not an argument anymore. We took those ideas—we took the specific commitments of policy; we implemented them. We did what we said we would do in

our very specific campaign—and I've got to say something parenthetically, because I owe this to a lot of you in the DLC. I've always believed ideas matter. But when I ran for President, I violated all the conventional wisdom. We made more specific commitments on more issues than any candidate ever had who was a nominee of a major party. And a scholar of the Presidency, Thomas Patterson, said that we had kept a higher percentage of those commitments, even though we made a larger number of them, than any of the previous five Presidents.

And what really mattered to me is, when I went back to New Hampshire in February of this year, on the seventh anniversary of the New Hampshire primary, people there who pay attention to what you say, because you have to ask every individual 14 times for his or her vote, or you can't play there—and I love the place; you know, it was like running back home—but person after person after person came up to me on the street that day, not at the Democratic Party event at night, on the street, and said, "Mr. President, it's a good thing we've got an"—they had an unemployment rate of below 2½ percent—they said, "Things are good here, but the thing we really appreciate is, you did what you said you would do."

It would not have been possible if I had not been part of the DLC. It would not have been possible if we hadn't thought through in advance what it was we wanted to do, if we hadn't gone from an identification of our guiding values to an analysis of the situation, to a description of what we wanted to achieve, to a strategy, to specific tactics. This organization made that possible.

So let me say, first of all, it's not an argument anymore. The results are in. We have the lowest unemployment rate in 29 years, the lowest welfare rolls in 30 years, the lowest crime rates in 26 years, the lowest poverty rates in 20 years, the first back-to-back budget surpluses in 42 years, the highest homeownership in history, the longest peacetime expansion in history. It is not an argument any more; it works, and you should be proud of that.

The other thing I want to say is, a lot of our specific ideas have worked. The Vice

President's leadership in reinventing government has given us the smallest Federal establishment since 1962, even though the most active executive initiatives in memory.

We have proved you could grow the economy and protect the environment. I went down to Virginia today to a national forest and announced that we were going to close 40 million acres of the nearly 200 million acres of national forest to roadbuilding, to preserve water quality and biodiversity and recreational quality.

We have proved that you can empower poor people to make the most of their own lives, with the earned-income tax credit, the empowerment zone program, the community development financial institutions, and now the new markets initiative.

AmeriCorps, which was a DLC idea—national service—has now enlisted over 100,000 young people in the service of our country at the community level in 5 years, a goal that took the Peace Corps 20 years to reach.

We also supported the Brady bill. We supported the family and medical leave law, two bills vetoed in the previous administration. And all of the objections to them turned out to be wrong.

So I say to you, you can be proud of that. We pursued an aggressive policy to become engaged in the rest of the world, to recognize that we live in an interdependent world in which we ought to lead. And whether it has been pursuing peace from the Balkans to the Middle East to Northern Ireland; to building self-capacity to prevent hardship through the Africa Crisis Response Initiative to give the African nations the capacity to prevent future Rwandas; to developing economic capacities in poor countries; to our efforts to combat terrorism and the spread of the weapons of mass destruction, we have made progress. And I thank you all for that.

Now, by contrast, it is interesting to me to watch the debate in the present election, which I'm not a part of, and to see how people try to say, "Well, maybe there can be a new Republican Party like there is a new Democratic Party." Remember this: They're like we were in '92; it's just an argument.

The Democratic Party—a heavy majority of the Democratic Party has come together

to move forward. But their party still is overwhelmingly, including all those people they've got running for President—they supported that tax cut, which would have completely undermined our ability to save Social Security and Medicare and get this country out of debt over the next 15 years, and which they said they could pay for, even though now they admit they can't even pay for the money they've already spent this year. They all stuck with the NRA, and the Republican congressional leadership, when we tried to close the gun show loophole, after we proved that background checks do not undermine people's legitimate hunting and sporting interests. They're over there opposing the hate crimes legislation in the face of painful evidence that we are still in the grip of bigotry. They're not for the "Employment Non-Discrimination Act."

We see that on so many other issues. On education, we're for high standards, no social promotion, making failing schools turn around or close down, and thousands of charter schools. They're still hawking vouchers, even though we know the Federal Government only provides 7 percent of the total educational expenditures in the first place. On health care, they're out there all against the Patients' Bill of Rights, even though their own Members, who were doctors, in the House of Representatives couldn't bear the position that the party had taken.

So I would say to you, I'm proud of where we are. I'm proud of where the Democrats are. I'm proud of where our party has gone. And I still believe that when it comes to defining the future, the American public will be with the new Democratic Party instead of the right wing of the Republican Party which is driving their agenda.

And we saw it again tonight when they rejected on a party-line vote the Comprehensive Test Ban Treaty, after it had been ratified by 11 of our NATO Allies, including Britain and France, nuclear powers, endorsed by the President and four former Chiefs of Staff of the Joint Chiefs of Staff, 32 Nobel laureate physicists, the heads of our own nuclear weapons labs. They basically said, "Don't bother me with that. I just don't think it's good." And it now has come out,

of course, that there was a partisan commitment to vote against the treaty by more than enough to defeat it before it was ever brought up and anybody ever heard the first argument.

We are trying to work with Republicans, independents, and Democrats to move this country forward. That is the difference in the new Democratic Party. And we are still confronting a level of extremism and partisanship which is truly chilling for the long-term interests of America.

But tonight I ask you not to think about our differences with the Republicans but to think about the one remaining issue on which we have not forged a consensus within our party. And that is how we're going to respond to globalization, to the global economy, the information age, and the whole nature of how we relate to other countries in terms of economics, the environment, and trade.

For all of our changes, we had overwhelming majorities of both parties in both Houses voted for the Balanced Budget Act, overwhelming majorities of our party in both Houses voted for welfare reform. We are still not of one mind, and we do not have a consensus on the way forward with trade. So tonight I would like to talk to you about what I think we should do and where I think we should be, not only because I think we have serious responsibilities to the rest of the world but because we know that, until the Asian financial crisis, 30 percent of our growth in this marvelous expansion came from the expansion of trade and the opportunities that we found there.

I believe a strong, properly constructed global trading system is good for all the nations of the world. I know it's good for America because of the evidence of what has happened here. Today, the worst of the global financial crisis is behind us, and I think the time has come to take an important step forward. I believe we can make our economy even stronger and make open trade an even greater force for peace and prosperity in the new century.

I know some believe that isolating ourselves from the world will shield us from the forces of change that are causing so much disruption, so much instability, and so much inequality. I understand why they fear it, but

I disagree that they can hide from it. America can only seize the problems of the new century if we shoulder our responsibility to lead to a responsible system of worldwide trade.

If we fulfill that responsibility, if we lead boldly and resolutely, pairing solid principles with concrete proposals, we can fulfill our promise in the global economy and help other people as well. We can create for billions of people the conditions that allow them to work and live and raise their families in dignity, and I might add, we can give those nations the kind of greater prosperity necessary to have more responsible environmental and public health policies. We can expand the circle of opportunity, share the promise of prosperity more widely than ever, and in so doing also help to bring down walls of oppression in other countries. We can, in short, put a human face on the global economy.

How are we going to do it, and how are we going to begin? In a little more than a month's time, in Seattle, Washington, our Nation will host a gathering of leaders from government, business, labor, and civil society. That meeting of the World Trade Organization will launch a new round of global trade talks that I called for in my State of the Union Address last January.

We've had eight such rounds in the last 50 years, helping trade to grow fifteen-fold worldwide. It's no coincidence that this period has seen the most rapid sustained economic growth ever recorded. Every trade round in this half-century has served to expand frontiers of opportunity, to expand the circle of prosperity and the rule of law and the spread of peace. I want the round we launch in Seattle to do the same.

But I also want it to be a new kind of trade round for a new century, a round that is about jobs and development, a round about broadly shared prosperity, about improving the quality of life and work around the world. I want to ensure that the global trading system of the 21st century honors our values and meets our goals.

Of course, different nations will bring different perspectives and different interests. To reach a truly global agreement, of course, we've got to work together in good faith. America will do its part.

Tonight I want to set out our agenda for Seattle and the ways we intend to expand opportunity from the world's oldest business, farming, to its newest, electronic commerce.

First, we want to ensure that in this round agriculture is treated as fairly as other sectors in the global economy. That's long overdue. In America, farmers are the lifeblood of our land, as they are in so many other places. They help to fuel our unprecedented prosperity. Unfortunately, too few of our farmers are reaping the bounty they themselves have sown. Flood and drought and crop disease, as well as the financial crisis in Asia, have threatened the livelihoods not only of many farmers but of some entire farm communities.

Every American has a stake in the strength of agriculture. So let's be clear: One way we can revive the rural economy in America is to open markets abroad. The family farmer in America finds trade not an abstraction. It is vital to the bottom line and to their survival.

America is the largest exporter of agricultural products in the world. One in every three acres planted here is growing food for abroad. Five years ago, during the last trade round, we joined with our trading partners to put agriculture on the WTO's agenda. In Seattle, we should move forward fairly but aggressively to expand our opportunities for farmers and ranchers.

We must eliminate export subsidies. All farmers deserve a chance to compete on the quality of their goods, not against the size of other countries' Government grants. In the European Union, fully half of the overall budget is spent on agricultural subsidies. The EU accounts for 85 percent of the world's farm export subsidies—85 percent. This stacks the deck against farmers from Arkansas to Argentina to Africa. In Seattle, we'll work to end this unfair advantage and level the playing field.

At the same time, we have to lower tariff barriers. Tariffs remain much too high, and on average, they're 5 times higher abroad than they are in America. And we must work to reduce the domestic supports that distort trade by paying farmers to overproduce and drive prices down. These steps will help farmers to produce the vast and varied vari-

ety of food for the best possible prices. The benefits will accrue not just to them but to the global fight against hunger and malnutrition.

We should also see that the promise of biotechnology is realized by consumers, as well as producers, and the environment, ensuring that the safety of our food will be guaranteed with science-based and transparent domestic regulation and maintaining market access based on that sound science.

Second, we can lift living standards worldwide if we level the playing field for goods and services. Manufacturing remains a powerful engine of our own economic growth; it generates nearly a fifth of our GDP and two-thirds of our exports. It employs more than 18 million Americans in good jobs. This sector has grown since 1992, accelerated greatly by expanded trade, boosted by agreements made at previous trade rounds. If the Asian crisis has hurt our manufacturers—and it certainly has—it's because expanded trade is vital to their economic health, and it will remain so.

Since 1948, we have cut major industrial nations' tariffs on manufactured goods by 90 percent. Where they remain too high, we can do better, beginning in Seattle where we'll join other nations in pressing to lower barriers even further, some entirely and immediately.

Eight key industries, from an environmental technology to medical instruments to chemicals to toys, stand ready to take this step now. They account for nearly a third of our exports. So let's take that step at Seattle and set ambitious goals for other manufacturing sectors.

And there's one special aim we should achieve at Seattle: We should follow the lead of Korea and Hungary and work together on an agreement to promote transparent procedures and discourage corruption in the \$3.1 trillion government procurement market worldwide.

We should set equally ambitious goals for services. Trade is no longer just agricultural and manufactured goods. It's construction and distribution and entertainment. America is the world's largest exporter of services, in quantity and quality. And though we've made really important advances in agreements on

financial and communication services, too many markets remain closed to us. In Seattle, I want to open those markets more fully and unlock the full creative and entrepreneurial potential of our people.

Third, we have to have a trading system that taps the full potential of the information age. The revolution in information technology can be the greatest global force for prosperity in this century. Last year, in the U.S. alone, electronic commerce totaled about \$50 billion. That number may reach \$1.4 trillion in 3 years. Three years later almost half our work force will either be employed by the new information industries or rely on their services and products.

Around the world, the number of Internet users may reach 1 billion in 5 years. Now, currently, no country charges customs duties on telephone calls, fax transmissions, E-mail, or computer links when they cross borders. That's the way it should be. The lines of communication should not crackle with interference.

Last year the world's nations joined the U.S. in placing a moratorium on tariffs on E-commerce. In Seattle, we should pledge to extend that ban and reach a second agreement to eliminate remaining tariffs on the tools of the high-tech revolution.

Fourth, as I have often said, in the immortal words of Sam Fried, we must put a human face on the global economy. We're Democrats; we've got to make sure this deal works for ordinary people. We need to ensure working people everywhere feel they have a stake in global trade, that it gives them a chance for a better life, that they know that spirited economic competition will not become a race to the bottom in labor standards and environmental pollution.

I know to some people in some nations open trade seems at odds with these basic human goals, but I think the opposite is true. A strong system of trade and a dialog like the one we'll begin in Seattle are our best means to achieve those goals.

For those of us who believe the global economy can be a force for good, our defining mission must be to spread its benefits more broadly and to make rules for trade that support our values. It is nothing more than an international commitment to doing

what we're trying to do here with the new markets agenda and with the empowerment zones. I really believe, if we work it right, we can bring the benefits of enterprise to the people and the places in America that have not yet felt it, from Appalachia to the Mississippi Delta to the Indian reservations to the inner cities. And I feel that way about the rest of the world.

So I ask you to support our efforts to have international organizations work to protect and enhance the environment while expanding trade and to have a decent regard for the need to have basic labor standards so that people who work receive the dignity and reward of work.

The American agenda in Seattle includes a thorough review of the round's environmental impact, as well as win-win opportunities that benefit both the economy and the environment. We will continue to ensure that WTO rules recognize our right to take science-based health, safety, and environmental measures even when they are higher than international standards.

In Seattle, the WTO should also create a working group on trade and labor. And I know you're going to have some labor people here tomorrow, and I congratulate you on that. We have got to keep working on this and banging our heads together until we reach a consensus that is consistent with the reality of the modern world and its opportunities and consistent with the values that we both share.

How can we deny the legitimacy or the linking of these issues, trade and labor, in a global economy? I think the WTO should commit to collaborate more closely with the International Labor Organization, which has worked so hard to protect human rights and to ban child labor, and with the International Environmental Organization. To facilitate this process, in the last year or so, I have gone to Geneva twice, once to talk about new trade rules for the global economy and once to meet with the ILO to talk about the necessity of banning child labor everywhere in the world.

This organization needs to be on the forefront of integrating our objectives and trying to build a global economy that will promote open trade and open prosperity and lift the

standards of living and the quality of life for people throughout the world. They should be reinforcing efforts, not efforts in conflict.

I also believe that the WTO itself has got to become more open and accessible. You know, every NGO, just about, with an environmental or a labor ax to grind is going to be outside the meeting room in Seattle, demonstrating against us, telling us what a terrible thing world trade is. Now, I think they're dead wrong about that. But all over the world, when issues come up, a lot of people representing these groups have some legitimate question or legitimate interest in being heard in the debate. And the WTO has been treated for too long like some private priesthood for experts, where we know what's right, and we pat you on the head, and tell you to just go right along and play by the rules that we preach.

The world doesn't work that way anymore. This open world we're trying to build, where anybody can get on the Internet and say anything, is a rowdy, raucous place. And if we want the world trading system to have legitimacy, we have got to allow every legitimate group with any kind of beef, whether they're right or wrong, to have some access to the deliberative process of the WTO. And I hope you will support that.

Finally, let me say, we have got to expand the family of nations that benefit from trade and play by the rules. In Seattle and beyond, we have to be guided by Franklin Roosevelt's vision, a basic essential to a permanent peace is a decent standard of living for all individual men and women and children in the world. Freedom from fear is eternally linked with freedom from want.

It was this understanding that led the generation of postwar leaders to embrace what was still a revolutionary idea: that freedom, not just of commerce but of governments and ideas and human transit, was the surest route to prosperity for the greatest number of people. This new round should promote development in places where poverty and hunger still stoke despair.

We just went over, I think in the last 24 hours, 6 billion people on the face of the Earth. Half of them live on \$2 a day or less; 1.3 billion live on \$1 a day or less. One of the reasons that I want to expand the reach

of global trade is because I want more people to be able to lift themselves up. One of the reasons I want to expand the reach of global technology is that I believe if we work to bridge the digital divide here at home and around the world, we can help poor people in poor countries skip 20 or 30 or 40 years in the ordinary pace of development because of the explosion of technology. And I believe we can prove to them that they grow a middle class and grow a wealthy country without have to pollute the atmosphere, as their forebears did in the industrial era. I believe that.

But for those who share our views and our party, we must make clear there is no easy way to this. We can't get this done if we're not willing to build a global economic system and tear down these trade barriers and trade with people more and give them access to our markets and try to get our technology and our investments into their markets and build the right kind of partnership.

We can't just say we want all these things and then always find some reason to be against whatever trade agreement is worked out. We have got to have a global trading system, and we're either going to keep pushing it forward, or we're going to fall behind.

Let me just say, to kind of amplify this, there are some specific things that I hope we will do to show that we're acting in good faith. I hope we will get congressional approval in this session of Congress to expand our trade with Africa and the Caribbean Basin. I have proposed two initiatives there. There is broad bipartisan support for it. I hope and pray we will get that out of this session of Congress.

I hope we will bring more countries into the WTO in Seattle. Thirty-three nations are applying for WTO membership today. Two-thirds once had communist command and control economies. It is remarkable and hopeful to all the—listen to this—Albania, Estonia, Georgia, Kyrgyzstan, and Mongolia wanting to enter the world trading system.

This is not charity. This is an economic and political imperative. It is good for us because we want more trading partners. Never forget, your country has 4 percent of the world's people and 22 percent of its wealth. We've got to sell something to the other 96 percent if we want to hold on to our standard

of living. And the more people we bring into our network of possibility, the better they do, the better we'll do. It is very, very important to remember this.

It's also important to remember that as these countries that are new to the experience of freedom and the rule of law and cooperation with other nations that has no element of coercion in it—they are new to all this—the more they have chance to be a part of it, the more they will like it and the more they will become a part of an international system of democracy and law that is so important to the future of our children.

In that same spirit, I am still determined to pursue an agreement for China to join the WTO on viable, commercial terms, again, not as a favor, but to reinforce China's efforts to open, to reform its markets, to subscribe to the rules of the global trading system, and, inevitably, as more and more people have access to more and more information, more and more contacts, to feel that stability comes from openness and not repression of thought or religion or political views.

What is at stake here is more than the spread of free markets or the strength of the global economy, even more than the chance to lift billions of people into a worldwide middle class. It is a chance to move the world closer toward genuine interdependence rooted in shared commitments to peace and reconciliation.

This is a moment of great promise, a moment where we have to lead. A lot of things happen in this country that send mixed signals to people around the world that I regret. And most of them come out of the initiative of the other party in Congress: the failure to pay our U.N. dues; the failure to embrace the Comprehensive Test Ban Treaty; the abysmal budget for foreign affairs, when we can spend a little money in helping our neighbors and get untold benefit; and the zeroing out of our market-oriented initiative to meet our responsibilities to reduce global warming.

But one thing is still on our plate: We have not granted renewed fast-track authority; we are not pursuing the Free Trade Area of the Americas; we haven't yet passed the Africa trade initiative and the Caribbean Basin one, although I think we might get that done, be-

cause in our party, we have not been able to resolve these conflicts.

They've got a lot more work to do in their party than we do in ours, as I explained at the outset. We have worked through where we are on budget discipline, on economic management, on foreign policy, on environmental policy, on crime policy, on education policy, on health care policy. There has been an enormous modernization of the thinking and direction of the Democratic Party, and we can be proud of it. But we can't go to the American people and say we have a whole vision for the future that will be a unifying vision until we get over this one last big hump.

This is an exciting issue, and it is a difficult issue. And the labor people who will come here tomorrow have real interests at stake which ought to be heard. The environmental community people have real interests at stake which ought to be heard. But we're going to globalize one way or the other, and we'll be at the front of the line or the back or somewhere in the middle. And I believe it is profoundly in our interest and in the interests of the world for America to be leading the pack.

And I promise you, if we take initiative, it will lead to a cleaner environment and higher labor standards and more values that are consistent with ours, including letting more people be part of the process.

So what you are doing here is real, real important. It's our last big challenge to be the party that reflects the values, the heart, and the dreams of 21st century America.

Good luck, and God bless you. Thank you.

NOTE: The President spoke at 9:30 p.m. at the Omni Shoreham Hotel. In his remarks, he referred to Al From, president, Democratic Leadership Council; Senator Joseph I. Lieberman and Representative Calvin M. Dooley, cofounders, New Democrat Network; event chair Samuel P. Fried, senior vice president and general counsel, The Limited, Inc., who introduced the President; and Thomas Patterson, professor of Government and the press, John F. Kennedy School of Government, Harvard University.

The President's News Conference

October 14, 1999

The President. Good afternoon. Thank you. In recent days, members of the congressional majority have displayed a reckless partisanship. It threatens America's economic well being and, now, our national security.

Yesterday, hardline Republicans irresponsibly forced a vote against the Comprehensive Nuclear Test Ban Treaty. This was partisan politics of the worst kind, because it was so blatant and because of the risks it poses to the safety of the American people and the world.

What the Senate seeks is to abandon an agreement that requires other countries to do what we have already done, an agreement that constrains Russia and China, India and Pakistan from developing more dangerous nuclear weapons, that helps to keep other countries out of the nuclear weapons business altogether, that improves our ability to monitor dangerous weapons activities in other countries. Even worse, they have offered no alternative, no other means of keeping countries around the world from developing nuclear arsenals and threatening our security.

In so doing, they ignored the advice of our top military leaders, our most distinguished scientists, our closest allies. They brushed aside the views of the American people and betrayed the vision of Presidents Eisenhower and Kennedy, who set us on the road to this treaty so many years ago.

Even more troubling are the signs of a new isolationism among some of the opponents of the treaty. You see it in the refusal to pay our U.N. dues. You see it in the woefully inadequate budget for foreign affairs and includes meeting our obligations to the Middle East peace process and to the continuing efforts to destroy and safeguard Russian nuclear materials. You see it in the refusal to adopt our proposals to do our part to stem the tide of global warming, even though these proposals plainly would create American jobs.

But by this vote, the Senate majority has turned its back on 50 years of American leadership against the spread of weapons of mass destruction. They are saying America does

not need to lead, either by effort or by example. They are saying we don't need our friends or allies. They are betting our children's future on the reckless proposition that we can go it alone, that at the height of our power and prosperity, we should bury our heads in the sand, behind a wall.

That is not where I stand. And that is not where the American people stand. They understand that, to be strong, we must not only have a powerful military, we must also lead, as we have done time and again, and as the whole world expects us to do, to build a more responsible, interdependent world.

So we will continue to protect our interests around the world. We will continue to seek from Congress the financial resources to make that possible. We will continue to pursue the fight against the spread of nuclear weapons. And we will not—we will not—abandon the commitments inherent in the treaty and resume testing ourselves.

I will not let yesterday's partisanship stand as our final word on the test ban treaty. Today I say again, on behalf of the United States, we will continue the policy we have maintained since 1992 of not conducting nuclear tests. I call on Russia, China, Britain, France, and all other countries to continue to refrain from testing. I call on nations that have not done so to sign and ratify the Comprehensive Test Ban Treaty. And I will continue to do all I can to make that case to the Senate. When all is said and done, I have no doubt that the United States will ratify this treaty.

Partisanship also threatens our economic security. Exactly one week from today the continuing resolution I signed on September the 30th to keep the Government running will expire. And yet, Congress is not even close to finishing its work. At this time of unprecedented prosperity we must ask ourselves why is the congressional majority so unwilling or unable to make the tough choices? Why would we not be willing—or why would they not be willing to send me a responsible budget that saves Social Security, that strengthens and modernizes Medicare, that honors the priorities of the American people, and that clearly continues to pay down our debt keeping interest rates low and the economy growing?

When I signed the continuing resolution 2 weeks ago, I urged Congress to roll up its sleeves and finish the job the American people sent them here to do. I said they should stop playing politics, stop playing games, start making the necessary tough choices. Instead, we have the Republicans lurching from one unworkable idea to the next. Instead of sending me bills I can sign, the congressional majority is still using what the Wall Street Journal, the New York Times and others have called "budget gimmicks," to disguise the fact that they are spending the Social Security surplus. Their own Budget Office says so.

We've even seen them try to raise taxes for our hardest pressed working families. Now, they're talking about across-the-board budget cuts that could deny tens of thousands of children Head Start opportunities, drastically reduce medical research, sacrifice military readiness, jeopardize the safety of air traffic control. One day they raise the spending, the next day they talk about cutting it again.

I say to the congressional majority, enough is enough. We've got a job to do for the American people. It is not that difficult. Let's just do it. We can work together. We can fashion a budget that builds on our economic prosperity and continues to pay down the debt until it is eliminated in 2015 for the first time since 1835, that extends the life of the Social Security Trust Fund to 2050, the life span of almost all the baby boomers, and that invests in our people and our future, especially in our children's education.

The American people want a world-class education for their children. They want smaller classes, more qualified teachers, more computers in the classrooms, more after-school programs for the children who need it, more Head Start opportunities to ensure that our children all start school ready to learn. The majority so far has failed to come forward with a plan that protects these goals. I believe these goals are worth fighting for, and that's what this debate is all about.

They want us to keep making their communities safer; that's what the American people want. They want us to stay with the plan that has resulted in the lowest crime rate in

26 years. They want us to continue to put more cops on the beat and get guns out of the wrong hands. The majority wants to take us off that course and derail our progress. I want to keep us on track in education, in crime, in the budget, in Social Security, in Medicare.

The American people want us to stand up for the environment by preserving our treasured landscapes and enhancing our community's quality of life. The majority would roll back our progress there, too. I want to build on it. That's what this debate is all about.

I want to work with Congress to fulfill these important obligations. We have proved we can do it with the welfare reform bill, with the Balanced Budget Act, with the budget last year, in the teeth of a partisan election season, which made a big downpayment on our goal of 100,000 teachers. We need it again, a workable, bipartisan budget process. We don't have that today. We've got a week to go. They've got to go to work.

There are legitimate differences of opinion. But we can put an end to reckless partisanship, to gimmicks and gamesmanship. We can put people first and make a principled, honorable compromise. We can work for a season of progress, not a winter of politics. And I am committed to do just that.

Thank you.

Helen [Helen Thomas, United Press International]?

Comprehensive Test Ban Treaty

Q. Mr. President, hasn't the treaty rejection really wiped out our moral authority to ask other nations around the world to stop testing? And was there—do you think there was a personal element in the Republican—a personal vendetta against you in the turn-down, Republican—

The President. Well, to answer the first question, let me say I had the occasion to run into three Ambassadors last night, of nations that strongly support the test ban treaty. And they were concerned. They didn't know what to say to their governments back home.

And what I told them was that we were in a battle with the new isolationists in the Republican Party. They see this treaty against the backdrop of the failure to pay the U.N. dues and the failure to shoulder some of our

other responsibilities, the failure to pass a bill that would meet our obligations to the Middle East peace process and our obligations to keep working with the Russians to take down their nuclear arsenal.

But what I told them was the American people always get it right, and we are not going to reverse 40 years of commitment on nonproliferation, that the treaty is still on the Senate calendar, that it will be considered, that we have to keep working forward, and that I have no intention of doing anything other than honoring the obligations of the treaty imposed on the United States.

So I urged them not to overreact, to make clear their opposition to what the Senate did, but to stay with us and believe in the United States because the American people want us to lead toward nonproliferation.

Now, as to the second element, there were a number of partisan considerations, including some bad feelings between the Republicans and Democrats in the Senate, because the Republicans didn't want to bring this up at all, and then they didn't give us a legitimate process when they did. If you compare the debates here, one day of hearings here, with 14 days on the Chemical Weapons Convention, over 20 days on the INF Treaty under President Reagan, this was not a legitimate process.

Now, I know some people made some personal remarks on the floor of the Senate in the debate, but you know, it's been my experience that very often in politics when a person is taking a position that he simply cannot defend, the only defense is to attack the opponent. And that's what I took it as, a form of flattery. They knew they didn't have a very strong case, and so they were looking for some excuse for otherwise inexcusable conduct, and it didn't bother me a bit. I think it only exposed——

Q. It wasn't revenge against you.

The President. No, I think it only exposed the weakness of their argument. I think that it had a lot more to do with what's going on in the Senate and what they think will happen this year and next year. But I say that because if it did, that would be even worse for them. I mean, the idea that we would put the future of our children in peril and the leadership of America for a safer

world in peril for some personal pique, I think is unthinkable.

I just think when you've got—sometimes, I've seen people when they've got a very weak argument and they know they don't have a very strong position, they think that maybe they can deflect the analysis of their vote and their argument by attacking their opponent. That happens from time to time, and you can't take it too seriously.

Terry [Terence Hunt, Associated Press]?

2000 Election

Q. A question about politics, Mr. President. Do you agree with Vice President Gore's characterization of Bill Bradley as a disloyal Democrat? And how much of a difference would it make if Senator Bradley were the Democratic nominee, instead of Vice President Gore?

The President. I am not a candidate in the Democratic primary, and I do not think I should become one. I had to do that twice before, and I enjoyed it very much, but I don't get a third shot.

So what I would say to you is, as all of you know, I think Al Gore has been, by far, the best Vice President in history. He's certainly had more influence over more areas. I think that he is doing well in his campaign. I think he made a good decision to go home to Tennessee. And I expect him to win. But I expect to support the nominee of my party, as I always have. And I think that I can serve no useful function by talking about anything other than the issues. If you want to ask me an issue question related to any of them, I'll be glad to answer it. But I'm not going to get into that kind of horse racing.

Yes, Steve [Steve Holland, Reuters]?

Situation in Pakistan

Q. Given the military coup in Pakistan, are you now more concerned about the prospect of a war between India and Pakistan, and what can you do to calm tensions?

The President. Well, obviously, we have been in touch with the Pakistanis. We don't like it when military leaders forcibly displace elected governments, and we made that clear. We've had our differences with Pakistan over the years that have been sometimes sharp, we've also had strong alliances in many

areas. I still believe Prime Minister Sharif did the right thing to take the Pakistani troops behind the line of control and defuse what could have turned into a war, even a nuclear exchange. And so I appreciate that.

And I would hope that the military government will soon transition to a civilian one. And I would hope that nothing would be done at this time to aggravate tensions between India and Pakistan. India just had an election. Prime Minister Vajpayee has now been returned for another period of service. I think they have an opportunity to resume their dialog and to de-escalate the tensions.

Again, let me say to India and Pakistan, do not take yesterday's vote as a sign that America doesn't care whether you resume nuclear testing and build up your nuclear arsenals. We do care. You shouldn't do it. It's not necessary. It will hurt your economy and endanger your future. That's our message to Pakistan, and we hope they will move to a civilian government as quickly as possible.

Claire [Claire Shipman, NBC].

Comprehensive Test Ban Treaty

Q. To what extent do you think that you and the White House bear some responsibility for the outcome of the vote yesterday? There have been a lot of people heavily involved—supporters of this treaty—who say the White House didn't begin an effective lobbying effort early enough. And I wonder whether you also think that the year of scandal played some role in that, that the White House was just unable to work on this—

The President. No.

Q. —in the way it should have.

The President. For one thing, since I signed this treaty—let's look at the facts here—I've spoken about this 30 times or more. We always start a big public campaign in terms of White House events and other things. Go back and look at this. Look at NAFTA. Look at the Chemical Weapons Convention. Go back—when we know that we're on a hearing schedule and we're going to have a vote, until we were given 8 or 10 days notice, we had no earthly idea there would ever be hearings, much less a vote on this.

So this whole thing came as a complete surprise to us when we realized that we had

8 or 10 days on a subject that we thought they had decided in a very determined way not to bring up, because Senator Helms had made it clear that he didn't want to bring it up, and he wouldn't even talk about it until he disposed of two other treaties that he said were ahead of it in his consideration. We had no earthly idea that it was going to be on the Senate calendar.

So we did our best. We kept asking. And we thought if we ever got a yes, the yes would be like the yes we got on chemical weapons. "Yes, we can have this vote in a couple of months. We'll have 2 or 3 weeks of hearings." If we had had a normal process, you would have seen a much more extensive public campaign. There was simply no time to put it together. But I talked about this over and over and over again in many different contexts. And I think that, given the time we had, we did the best we could.

And besides that, once it became clear to me that they not only were going to force this close vote but that they weren't going to do what they do in every single treaty where there's serious consideration, namely, to allow the Senators of both parties to offer safeguards, to offer reservations, to offer clarifications, so that the treaty means something.

If you remember, the only way we ever passed the chemical weapons treaty is when the Senate—including Senator Helms—participated with us in a process that led to over 20 explicit safeguards and reservations. That's what the Senate is supposed to do. We said, ourselves, that we thought the treaty required six safeguards that we hoped would be put on it. And they said, "Not only are we going to make them vote on the treaty; we're not going to let you put your safeguards on there." So I think that ought to give you some indication of what was afoot here. We did the best we could with the time we had.

Q. [Inaudible]—the criticism has been not the public lobbying effort but behind the scenes—the sense that for a long time the Republicans were lobbying against this treaty when the White House wasn't lobbying very effectively on Capitol Hill.

The President. Well, but—you know, first of all, I just don't accept that. They told us that they had no interest in bringing it up.

It wasn't going to come up. We had no reason to believe we could do it. Before we can lobby the Members, we have to have some sense that we're lobbying them for something. And every time you talk to somebody, they say, "Well, that's not even scheduled. That's not going to come up." And I think the interesting thing is how many made commitments before they heard any arguments one way or the other.

John [John King, Cable News Network]?

Q. But Mr. President, given the importance you've placed on this, why did you wait until 5:15 yesterday to first call the Senate majority leader? And as part of the same question, if you were the Government of China and publicly stated on the record that you're looking to modernize your nuclear arsenal, why would you not take this now as a green light to test, and will you do anything to try to convince the Chinese not to do so?

The President. Well, let me answer the first question first. The one thing I did not want to do, once it became obvious—I had nothing to do with the schedule the majority leader imposed on the treaty, and I had no advance knowledge of it, so I couldn't have talked to him before then.

At that point, he had contact—I believe he and his office—he, personally, and his office, had contacts several times a day with Mr. Berger every day from then on out. What we were trying to do was to preserve the opportunity—just to deal with the question Helen asked in the beginning, you know, if anybody was out there saying, "Well, this is about President Clinton," and we were trying to preserve the opportunity for him and Senator Daschle to make an agreement so that the Senate could do this; the Senate could put it off, could schedule hearings, could deal with it in an orderly fashion.

Then, as you may know, the night before the vote, Senator Lott and Senator Daschle did, in fact, reach an agreement to put it off. And Senator Lott apparently was unable to convince enough of his caucus to honor the agreement he had made, so he had to withdraw. And it was at that point that I called him to see if there was anything else we could do.

But we were in constant contact with his office, and Mr. Berger talked to him innumerable

times. I would happily have talked to him. I thought I was giving him some protection not to do it so that he and Senator Daschle could make an agreement, and they could say the Senate did it out of a concern for the national interest, because it was manifestly the right thing to do. And I think Senator Lott believes today that putting it off was the right thing to do. I'm sorry it didn't happen.

Chinese Nuclear Testing

Q. And the question on China?

The President. Oh, China. Let me say—well, I will say again, the Chinese have taken the position we have, that they won't test. I hope they will continue to honor it. All I can tell you is, we're not going to test. I signed that treaty. It still binds us unless I go, in effect, and erase our name. Unless the President does that and takes our name off, we are bound by it. And we've not been testing since '92. So the Chinese should have every assurance that, at least as long as this administration is here, we support nuclear testing.

Now, if we ever get a President that's against the test ban treaty, which we may get—I mean, there are plenty of people out there who say they're against it—then I think you might as well get ready for it. You'll have Russia testing. You'll have China testing. You'll have India testing. You'll have Pakistan testing. You'll have countries abandoning the nonproliferation treaty.

The reason I wouldn't make a commitment to Senator Lott not to bring this treaty up next year—let's just put that out on the table—apart from the President's prerogative, constitutional prerogative, there is a substantive reason. Four years ago, we got all the countries that were in the nonproliferation treaty—even more than have signed the test ban treaty, I think 176 of them—and they say they're either not going to develop nuclear capacity, or if they have it, they won't share it. It's very, very important.

And a lot of the countries that were edgy because their neighbors had nuclear capacity or because they had nascent nuclear capacity and they wanted to develop it more—they really wanted to know, was there going to

be a test ban treaty, so that if they stopped dead in their tracks, they wouldn't be discriminated against by people who were a little ahead of them who could test. And the United States took the lead in assuring them we would continue to work until we got a test ban treaty. So we did. And that's why I was the first person to sign it, not only because I believe in the test ban treaty but because I think it is essential to reinforce the nonproliferation treaty.

Consider how each of you would feel if you were running a country and you thought you had the scientific capacity to develop these kinds of weapons and you had neighbors with them you felt threatened by, but they were a little ahead of you and they could test and you couldn't.

So the reason I—what I told Senator Lott was, I said, "Look, I believe if next year we have indications that three or four or five countries are going to bail out on the nonproliferation treaty, I could come to you, and I could convince you that we should bring it up. And therefore, I cannot promise not to bring it up. But, barring some international emergency, I wouldn't bring this treaty up until I thought we could get it ratified." To me it's not a matter of personal credit, it's a matter of leaving in place for the future a framework that will maximize the safety and security of the American people and minimize the prospect of nuclear conflict around the world.

So that's where it is. I hope very much that people will see in the steadfast determination of this administration and of the American people, the determination to stay on this path. And I hope they will stick with us. I think if we ever have a President and a Senate not for this test ban treaty, then all bets are off. You will see a lot of testing, and they will bail on the NPT. That's what I think will happen, and we will be in a much, much more dangerous world. But we are not there today, and I hope I can discourage people from going there.

Mark, [Mark Knoller, CBS Radio] and then Sarah [Sarah McClendon, McClendon News Service].

Comprehensive Test Ban Treaty

Q. Sir, just as you had experts saying, advocating the ratification of the treaty, the Republicans had experts saying that the treaty was dangerous. Why can't you accept the vote as a good faith expression of that opposition, rather than as a partisan attack?

The President. Oh, I have said every time that there were some Republicans who believed that in good conscience. The reason I can't accept it as only a matter of conviction are the following reasons.

Number one, they had a lot of people committed who didn't know very much about the treaty, who were asked to commit before there was ever an argument made.

Number two, the objections about the treaty essentially fall into two categories. One is that, notwithstanding the heads of the weapons labs, the entire military establishment and General Shelton's last few predecessors as Chairmen of the Joint Chiefs, and these 32 Nobel laureates, there are people who say, "I don't care what they all say, I just don't believe it. I just don't think that they can preserve the security of the nuclear arsenal without testing. Even though we're spending \$4.5 billion a year, and we're going to spend more, and we're far more likely to be able to do that than any other country in the world, I just don't believe it."

Now, my answer to them was, so we put an explicit safeguard in the treaty which says, when we have evidence, which we don't have now, that we cannot maintain the reliability of the nuclear deterrent, if at that time it is still necessary for us to do so, then we will have to give notice and withdraw. That's what you have these safeguards for. That's in our supreme national interest.

The other major argument against the treaty was that there can be some cheating because you can't always be sure, for underground tests under 5 kilotons and particularly under 1 kiloton. The answer to that is, that's true now. And this treaty makes it more likely that we will catch such things.

That wasn't a good argument, because this treaty would give us over 300 sensors around the world. And those sensors are far more likely to pick it up. This treaty would give us the possibility of on-site inspections,

something we don't have now. And this treaty would give us the possibility of marshaling a much sterner rebuke to any country that violated it than we do now.

There were other objections that were more minor, compared to these two big ones. That's why we offered these six safeguards, and invited the Senate to offer more. There were objections like this to the Chemical Weapons Convention. There are always going to be objections from the point of view of the country that feels it's in the strongest position. And that's why we have a process, an orderly process in the Senate, to allow the Senate to put these safeguards on. I think that's what Senator Byrd was saying yesterday when he voted "present" and condemned the process.

You know, keep in mind, I didn't ask them to ratify the treaty as it was written. I asked them to ratify the treaty with the six safeguards that would address those two major objections and some of the others.

Sarah, and then——

Deployment of U.S. Troops Abroad

Q. Do you think the American people agree with you on the fact that we send armed soldiers to every place in the world where there's a conflict?

The President. Do I think what now?

Q. Do you feel that we, the American people, agree with the policy that we send armed soldiers to other parts of the country when we're not involved, but they're having an armed conflict, and we send soldiers over there anyway?

The President. Yes, but I think——

Q. Do you think the American people agree with that?

The President. Let me say this. I think that the safer we make the world and the more we reduce the likelihood of war, the less likely we are to send people there. But you know, this is another argument for co-operation, however.

There's another point I'd like to make. The heads of the Governments of Britain, France and Germany took the extraordinary step of writing an op-ed piece—we don't have any better allies—they took the extraordinary step of writing an op-ed piece asking us to ratify this treaty and, in any case, not to de-

feat it. This was also an amazing rebuke to our allies. We say, "Okay you guys are with us every time we need you, the Gulf war, the Balkans, always in NATO, you're there, but you ask us to do something for your common safety, go take a hike." And you know, I think that's a very tenuous position.

If you look at what we did, we took a very leading role in trying to stop the violence and promote the integrity of the referendum in East Timor, a long way away. The Australians, the New Zealanders, the other countries in that region, they stepped right up and took the lion's share of the burden. They didn't expect America to do that. They asked us to help them with certain services that we are capable of providing, but they stepped right up. They looked to us and say, "You know, keep leading the world toward non-proliferation. We'll do this work with you." We say to them, "Go take a hike." I think it was a very dubious decision.

Go ahead.

FY 2000 Budget

Q. Mr. President, a question on the budget. Are you saying that you would veto a Republican plan for across-the-board spending cuts? And since they are adamantly opposed to your tobacco tax hikes and your loophole closings, and both of you don't want to spend the Social Security surplus, what is the way out of this box to avoid another Government shutdown?

The President. Well, first of all, I would veto a bill that I thought—here at the moment of our greatest prosperity, when we've got a surplus, if they wanted to cut education and gut our efforts to put more teachers in the schools, our efforts to give kids after-school programs, our efforts to do all of the things we're trying to do in education—hook up their computers to the schools by 2000, the Internet, all the classrooms to the Internet by 2000—all these things we're trying to do, would I veto that? I would. I would have to do that. I would have no choice. It would be unconscionable to think that America, at its moment of greatest prosperity, when we've got our first surplus in 30 years, is out there cutting education and several other areas. So, yes, I would.

Secondly, I know for ideological reasons they don't want to raise the tobacco tax, but just yesterday one of their long-time allies, Philip Morris, acknowledged that cigarettes cause cancer. And we know that more needs to be done to get our kids off tobacco. And we know that raising the price of a pack of cigarettes is one of the best ways to do it. So we—you know, they don't have to agree to raise it as much as I proposed, but it would help to sit down and negotiate that. If they don't like my offsets, what are their offsets? Maybe there are some other things we could agree on. We won't know unless we have a serious conversation.

I think the best way to do this is to avoid spending the Social Security surplus, even though it's been done every year for at least 16 years and was done before in times of deficits. This is a new thing, you know, not spending it. The only reason they're proposing not to spend it is that we have non-Social Security surplus, though much smaller.

There is a good reason not to spend it. And the good reason not to spend it is, number one, it will help us to pay down the debt and get this country out of debt in 15 years, for the first time in 165 years. Number two, it enables us to achieve interest savings, and those interest savings, I believe, for 5 years should be put back in the Trust Fund, and that will run the life of Social Security out to 2050 and take into account the retirement of all the baby boomers. So I hope we can do it.

But in order to do it, we're going to have to make some hard decisions. But it looks to me like, though, the decisions that I propose to make are less hard than slashing education at a time of great prosperity when you've got the biggest and most diverse student population in history or raising taxes on poor people, which was another one of their proposals or all these gimmicks. I mean, they proposed—for example, if they do this 13-month thing, you know, where they just, we spend the money this year but play like we're spending it next year, then they're just going to make an even bigger headache. We'll have the same headache next year. And we'll be here a year from now, and you will be asking me these same questions.

They say that the ordinary operations of the Pentagon are an emergency. That's one of the things they're considering. The ordinary operations of the Pentagon are an emergency. I think that will come as a surprise to people who have been working there for 10 or 20 years.

Susan [Susan Page, USA Today]?

2000 Election Issues

Q. Mr. President, every 4 years the American people revise and adjust what they're looking for in the President they're about to elect, often, in reaction to the President who is about to leave office. And I wonder if, looking ahead, what you think Americans are looking for in the President they'll elect next year? And if there are ways in which those qualities or qualifications are different from what they were looking for in 1992 and 1996 when you were elected?

The President. Well, I think that one big difference is the country is going to be in good shape instead of bad shape. And so they're going to be—right now, unless something unforeseen happens, by next February we'll have the longest expansion in history, peacetime or wartime. We'll have a 26-year-low in crime rate, a 30-year-low in the welfare rolls, a 29-year-low in unemployment, first back-to-back surpluses in 42 years. We'll have—the social fabric of America will be mending. And the economy is lifting. We have a low in poverty rate of 20 years.

So I think they'll be looking for things and thinking about—and they will know that they have a chance to shape the future in a way that we've not had in my lifetime. And so, I can only tell you what I think. What I think they will be looking for is someone who will offer big ideas about how to make sure that we deal with the aging of America, as we double the number of people over 65, how we deal with the explosion of children and their increasing diversity.

I hope that they will say—we see a little bit in this debate on the gun safety issue in the Senate now. I hope they will say, "Oh, it's fine we've got the lowest crime rate in 26 years. We want to vote for somebody that'll make this the safest big country in the world." And I hope they will say that they are now much more concerned than they

were able to be in '92, when people were worried about how they were going to get from one month to the next, that they really, really want us to make a sustained effort to bring opportunity to all the people and places that are still trapped in poverty. And I hope they will say that—they've been given a new issue now. I hope they will say that they don't want America to adopt a new isolationism, they want us to lead into the future. So there is a different sort of thing there. I also think that they want somebody who can deal in a sensitive way with the continuing evidence we have of violence in our country and of people manifesting all kinds of bigotry, that in its most extreme version you see in the killings in the Middle West and the shootings at the Jewish community school and all of that.

But it's a different world. On balance, it's better, but I think we're much more sensitive than we were 7 years ago to the problems of the poor among us, and that's a good thing. And I think we're much more sensitive to the problems of discrimination and violence against people because of their race or their religion or their sexual orientation.

You know, I hope that they will want someone, and I hope that—who will try as hard as I have tried and maybe be more successful—although I think they'll have to make some changes in Congress to do that—to create a genuine, constructive, bipartisan atmosphere. We get it here, but we get it about once a year, and it doesn't last long enough to suit me. When we get it, great things happen. [Laughter]

Mary, [Mary McGrory, Washington Post] did you have a question?

Anti-Ballistic-Missile Treaty

Q. Yes, sir. I was wondering if you have any plans to protect the ABM Treaty, which will almost certainly be the next target of the Senate Republicans, looking to start Star Wars?

The President. As you have—all of you have reported this, we have continued to work on missile defense. We spend quite a good deal of money on it. Some preliminary tests are encouraging. If we have the potential to protect our people against missiles that could be loaded with nuclear weapons or

chemical or biological weapons, coming at us from other countries—and this does not include the Russians with whom we have this ABM Treaty but all of these other countries that are trying to get missile technology—and it would be the responsible thing to try to deploy such a system.

The problem is, any such system, even a ground-based one, would violate the literal terms of the ABM Treaty. Now, there are—as you've said, Mary, there are people in the United States Congress who would like to just tear up the ABM Treaty and go on. I, personally, think that would be a terrible mistake. Look, we are—for all of our ups and downs and rough edges, we are working with the Russians, and we have made real progress in reducing threats as a result of it. And let me just tick off a few things. They continue to reduce their nuclear arsenals. If they ratify START II, we'll take our nuclear arsenals to 80 percent below their cold-war high. We're prepared to go into START III negotiations with them if we do. They've also taken their troops out of the Baltics, and they've gotten nuclear weapons out of all those other former Soviet republics.

We're getting something out of this, this partnership. And we, I think, would be very foolish to just discard the ABM Treaty.

So what we're trying to do is see whether or not we can work with the Russians in a way that enhances their security and ours, to share some of the benefits of these developments, and to go forward in a way that convinces them that they're not the problem. We're also trying to do other things to minimize the problem. As you know, we've been working very hard with North Korea to try to end the missile program there.

So I do not want to throw the ABM Treaty away. I do think it is the responsible thing to do to continue to pursue what appears to be far more promising than many had thought, including me a few years ago, in terms of missile defense. But we have to try to work the two things out together. And I'm confident that if the Russians believe it is in their security interest to do so, that we can. And that will happen if we work with them. If we just scrap the ABM Treaty, it won't happen, and our insecurity will increase.

Bill [Bill Plante, CBS News]? Go ahead, I'll take both of you, just one after the other. Go ahead.

Judge Susan Webber Wright's Decision

Q. Mr. President, you've never commented on Judge Wright's decision that you intentionally lied in the Jones deposition. Do you accept her finding? And if not, why have you or your attorneys not challenged it?

The President. When I am out of office, I will have a lot to say about this. Until then, I'm going to honor my commitment to all of you, to go back to work. I haven't challenged anything, including things that I consider to be questionable, because I think it is wrong. The American people have been put through enough, and they need every hour, every day, every minute I can give them thinking about their business. And so until I leave here, as I understand it now, all this is finished, and I don't have to comment on it. And unless there is some reason I legally have to, I'm not going to say anything else that doesn't relate to my responsibilities as President as regards to that. When I'm done, then I can say what I want to say.

Go ahead.

Dismantling of Strategic Arms Controls

Q. Mr. President, one of the arguments that some of your closest friends in the Senate make about this situation with the Comprehensive Test Ban Treaty is that the Republicans aren't just after that treaty or the ABM Treaty, that really what they want to do is embark on the full dismantling of all strategic arms controls. We've known it since the end of the cold war.

The Republican argument is that arms control is an illusion and a delusion, that it lulls us into a false sense of security, and that it drains our will to maintain our military might. What do you think of those arguments? What's your response to them?

The President. Imagine the world we will live in if they prevail. I mean, imagine the world we will live in if they prevail. That's what I think of them. I mean, look, are we more secure because we made an agreement with the Russians to reduce our nuclear arsenals? I believe we are. Are we more secure,

given the economic and political tensions in that area that we made an agreement with the Russians to take those nuclear weapons out of Kazakhstan and Ukraine and Belarus? I believe we are. Are we more secure because other countries are not testing nuclear weapons and can only do so much in the laboratory? I believe we are. I think these arms control agreements have created a climate in the world which has helped to make us far more secure and helped to reduce the likelihood that nuclear weapons will ever be used again.

If the United States, with all of our wealth, all of our strength, more nuclear weapons than anybody else, says we are so insecure that we want more, more, more, what in the wide world could we ever say to the Chinese; to the Russians, who I hope will not be on their backs economically forever; to the Indians and the Pakistanis, who I hope will not be on their backs economically forever, to the Indians and the Pakistanis, who have all kinds of arguments, one against the other, and involving other countries; to countries that believe we are too aggressive in the world already and don't share a lot of our political or our philosophical views?

You know, I'm glad you said that. You're right. They don't believe that, and they think we ought to go it alone. It doesn't bother them that we don't pay our U.N. dues. It doesn't bother them that we're giving the Pentagon money in their budget that the Pentagon didn't ask for and say is not necessary for our national security, but they won't fund a decent investment in diplomacy and helping to lift the world's poor in places where people are trying to make democracy take root; that we're not funding our obligations under the Middle East peace process, our obligations to help the Russians continue to dismantle their nuclear weapons. That's right, and they do believe that. And I go back to what Mark said, there are—I don't believe they're yet the majority in the Republican caucus, but they are a very very potent minority. And they do believe this. But I think they're wrong. And the American people must understand that this is one of the choices they now have to make.

Q. Mr. President, you said imagine a world without these agreements. Please give some

examples of what you're driving at, because they said it's going to be a terrific world without these agreements, that America is going to be safer without the agreements than it is with them.

The President. First of all, we're all tied in knots now over this budget, right? I mean, it's totally unnecessary, but we are. We shouldn't be. Now, can you imagine if we had no arms control agreements, let's just suppose we tore them all up tomorrow—nothing, no nonproliferation agreement. Then this same crowd would be coming in and saying, "Well, now there's no nonproliferation agreements, you know, and here's a list of 12 countries that we think they have two scientists who can figure out how to put together a small nuclear weapon. And there's no Chemical Weapons Convention or Biological Weapons Convention, so they've got those labs chugging right along here. And therefore, we need you to increase the budget for all this to the labs and the Pentagon by another \$30 or \$40 or \$50 billion a year. So, I'm sorry, we'll just have to get out of the business of funding education. We can't afford to invest any more in health care. The American people just have to figure out what to do on their own." It would totally erode the fabric of our domestic climate.

Meanwhile, what happens overseas? Countries that could be putting money into the education and health care and development of their children, whether they're democracies or military dictatorships or communist countries, will be sitting there saying, "Well, you know, we'd like to lower the infant mortality rate. We'd like to lower the hunger rate. We'd like to lower the poverty rate. We'd like to raise the literacy rate. But look at what the Americans are doing. Look at what our neighbors are doing. Let's spend half our money on military." It would be great for the people that build this stuff, but for everybody else it would be a nightmare.

Consider the Japanese, coming out, we earnestly hope, of their long economic slump, having honored, since World War II, their commitment to be a non-nuclear state and to spend a small percentage of their income on defense. What in the world would they do in such a world? And if they had to divert 4, 5, 6 percent of their gross national

product to defense, what kind of economic partner would they be?

What would happen in Latin America, the area which has been the area that was the greatest growth for us in trade? After we have worked so hard, you've got Brazil to renounce its nuclear program. You've got former adversaries working together in trade agreements. What would happen if they, all of a sudden, got antsy and decided, "Well, you know, we have no national status. Our people, you know, we'll have the same elements in our country saying we can't defend ourselves. We've got to have a biological program, a chemical program, a nuclear program."

I mean, you know, all this sounds good. But the idea that the best way for us to go forward—since right now, at this particular moment in history, we enjoy the greatest wealth and the greatest power, is to build this big old wall and tell all of our friends and neighbors to go take a hike. "We're not cooperating with them anymore. As far as we're concerned any night—might be an enemy, and anything you want to do with your money is fine with us, because we have more money than you do, so whatever you do, we'll do more."

I think it will be a bleak, poor, less secure world. I don't want my children and my grandchildren or your children or your grandchildren to live in it. They believe that. I will do everything I can to stop it.

Yes.

Political Impact of Senate Action

Q. Sir, isn't it wishful thinking for the Democrats to think they can beat up on the Republicans next year over this treaty vote? Yes, public opinions show that most Americans do support the treaty. But you were not able, despite your 30-plus public appearances, you were not able to light a fire under public opinion. Can't the Republicans just walk away from this without any damage, particularly in the post-cold-war era? Isn't it true that Americans just don't worry about the nuclear threat?

The President. I think there is something to that. But you know, it was interesting, as I understand it, one of the reasons this came up—from what my Republican friends in the

Senate say—is that the Republicans were worried that the Democrats would keep beating on this next year if they didn't bring it up and dispose of it this year, and they were afraid it would be a political issue. I never wanted it to be a political issue. I never wanted the Chemical Weapons Treaty to be a political issue. I never thought this stuff would be a political issue. I always thought we'd have a bipartisan consensus to do what had to be done.

So they may have made it a political issue now, and it may or may not have any impact. But I will say this. I will say again—I believe the American people eventually—I think they will stay where they are, and I think we'll eventually get this treaty ratified. But it may be in every democracy—you know, the people decide what they care about. I told Senator Lott that I did not expect that this would ever be such a big issue. I think it might be now, and the people have to decide. This is part of the choices a free people make, and it's an important choice, and we'll just see what they do.

Yes, go ahead.

Protests at the Seattle Trade Talks

Q. Labor unions have stepped up their criticisms of the World Trade Organization and plan to demonstrate at the talks next month. You've sought to answer some of their concerns, but it's not likely that you're going to answer all of them before then. Is that going to weaken the U.S. negotiating position in the talks?

The President. No, because there will be a lot of people from other countries there demonstrating against it, too. [Laughter] I mean, you're going to have—there will be a lot of people there against it. And I think—I want to say two things. First of all, I am committed to launching a new trade round which will expand opportunities for us and for others on a fair basis. For example, if we stop export subsidies to agriculture, 85 percent of which are in Europe today, it would benefit farmers in my home State of Arkansas, but it would also benefit farmers in Argentina and farmers in Africa. And I would like to see that done.

I would like to see us make a commitment that electronic commerce would continue to

be tax free. And I would like to see us continue to make progress in other areas, because 3 out of 10—30 percent of our growth came from trade-related growth, until the Asian financial crisis, and because I think it's the best way to lift labor standards and to give countries the money they need to protect their environment. So I will continue to push for this.

Now, having said that, I don't think it's such a bad thing that all these people are coming to Seattle to demonstrate. Why? Because I went to Geneva to speak to the WTO, and then I went back to Geneva to speak to the International Labor Organizations to say that, particularly those of us in the wealthier countries, have a heavy responsibility to try to put a more human face on the global economy. And that means you have to bring labor interests and environmental interests into these deliberations, that not only do these factors have to be considered but the people themselves have to be heard. I think it is very important. And so we have proposed, for example, a trade and labor group, coming out of the WTO. We want to see more work done in the environmental area.

But the point I'd like to make is—if you'll just let me get off on this one little area in which I have an obsession. I think that, while I'm all for big ideas—you asked me about what the next campaign should be about; I'm all for big ideas—the world is still largely in the grip of a big idea that isn't true anymore. And that big idea is that in order for any country that's not rich to get rich, they have to burn more fossil fuels and put more greenhouse gases in the atmosphere, because that's the way we got rich, and that's the way the British got rich, and that's the way other countries got rich. And that's not true anymore.

The whole economics of energy and the economy have changed. And we could have a revolution in the environment with more trade and investment in available, presently available, environmental technologies and alternative energy sources. That's just one example.

But it won't necessarily happen automatically. And just as—look at the domestic market in America. We have about the freest

markets you can imagine here. It's easier for—if any of you folks could leave what you're doing, if you weren't so devoted to it, and go make more money probably doing something else, you could get venture capital; you could come up with some idea; you'd fooled around with your computer so much you could probably start some new Internet company and be worth a couple hundred million dollars in no time. And that happens all the time. [Laughter] You know, those of you who are over 25 may be too old to do it, now. That's where all the money—[laughter].

But you know, we have an open economy. But what makes it work? We've got a Federal Reserve that works. We've got a Securities and Exchange Commission that works. We've got protections for consumers. We've got protections against monopolies. We have intermediate institutions.

The trading system and the financial system, the global financial markets and the global trading system, are creating a global economy. We need some intermediate involvement from labor and environment, just to name two, to make sure that we build an economy that benefits everybody and that literally has a more human face on it.

And so I'm actually not all that upset those folks are coming to Seattle. I welcome them. But if their fundamental view is, if we had less trade instead of more, that every economy could be self-sustaining and the environment would be better and people would make more money, I think that is simply not true. And I think you can demonstrate that's not true. So I want an expansive trade round that helps America and helps them, too.

Let me just make one final point. I have done everything I could to get the wealthy countries to do more for the poor countries. We're trying to pass an Africa trade initiative here, and a Caribbean Basin initiative. And it does have bipartisan support. Let me say that I'm grateful for the Republicans that are helping us with it. And I think we've got a chance to pass it this year. We're trying to get debt relief for the poorest countries in the world.

So I'm sympathetic with all these negative feelings. But one of the things that spawns these kind of negative feelings is, these folks

feel like they've been shut out. They think the WTO is some rich guys' club where people get in and talk in funny language and use words nobody understands and make a bunch of rules that help the people that already have and stick it to the people that have not. That's what they think. And so if we're going to change their perception, we've got to listen to their protests and bring them into the tent and go forward taking these concerns into account.

Gun Buy-Back Program

Q. Mr. President, you have alluded several times to anti-crime initiatives, and a big part of your anti-crime initiatives are gun buy-back programs. Recent studies that are coming out—that have come out—that are coming out show that a lot of people that hand these guns in are old shotguns that don't work. They're from the attic. They're from the basement, whatever. They're really not the kinds of guns that were used in Los Angeles, in some of the high profile crimes that the nation has been so fixed on in recent months.

Basically, I'm wondering, are you concerned that in putting so much focus on these buy-back programs that other initiatives like they've tried in Richmond, that have proven successful, and in Philadelphia, might languish as a result?

The President. Well, first let me say that I do believe that the gun buy-back programs will get all kinds of guns. And obviously, if you wanted the money and you didn't care about the gun, those are the easiest to give up. If you've got some old gun that doesn't work and you want \$25 or whatever you get for it, it's a good way to get it.

But keep in mind there are over—I don't know what the exact number is—but there is almost one gun for every person in America. There are way over 200 million guns in America. And all the new gun purchases, handgun purchases at least, require background checks. So I still think the more you can get done with that the better. I still think the more the better.

I agree with the import of your question, however. It would be a great mistake to emphasize that to the exclusion of law enforcement strategies that plainly work like the one

in Richmond, like the one in Boston that led to no child being killed by gun violence in nearly 2 years. It would be a great mistake to think that's a substitute for closing the loopholes in both our assault weapons bill and the Brady bill, especially the gun show loophole. It would be a great mistake to think that that could substitute for our efforts to put 50,000 more police officers on the street in the areas that still have crime rates that are still too high.

So I think we should stick with the gun buy-back program. I think we're spending about \$15 million on it, not an enormous amount of money, but it should be only one part of a very comprehensive strategy.

Yes, in the back.

Japan

Q. Mr. President, about steel imports from Japan. Why are you delaying your decision under Section 201 charges against Japanese steel wire? The ITC was divided; your advisers are divided, according to Mr. Sperling yesterday. Does that mean that you don't see any compelling reasons for taking action to protect domestic producers? And also, next—about CTBT, does Japan have any special role to play in preventing the spread of nuclear weapons?

The President. Let me answer the first question first. You answered the first question for me. I have delayed a decision because the ITC was divided, and my advisers are divided. So I have to make the decision. [Laughter] And it's a complicated issue, and I'm trying to work it through. And I only got the background material on it, oh, in the last few days. And as you know, we've been otherwise preoccupied with the test ban treaty. So I only looked at it, I don't know, yesterday, the day before, even at first blush.

So it's a decision that I will have to make and for which everyone can hold me responsible, because our people have not yet been able—they can't resolve all the details themselves. I will do what I think is right. You should not infer from the fact that a decision has been made that I will grant no relief, because I have not decided whether to grant relief or not. And I will decide in the most timely fashion I can.

Now on the second question you asked, which I think is the far more important question, I think in a way Japan may be in a unique position to play a role of global importance now. Why? Because Japan is by far the wealthiest, strongest country in the world without a nuclear program. And if the Japanese say—go to the Chinese and say, "Don't start testing;" go to the Indians and say, "Don't start testing;" go to the Pakistanis and say, "Don't start testing again;" say, "We want to stay where we are; we want to live in a 21st century world where our competition is commercial, not military, where we're worried about ideas, not atoms," I think it will have a very important effect in this period when people are going to try to sort out how they feel about what I've said at this press conference today as against the vote last night.

So I personally believe Japan can play a remarkably positive role. And I have great confidence in Prime Minister Obuchi; he's done a terrific job. And I hope that Japan will play that role.

Thank you very much.

NOTE: The President's 182d news conference began at 2:04 p.m. in the East Room at the White House. In his remarks, he referred to Prime Minister Nawaz Sharif of Pakistan; Prime Minister Atal Behari Vajpayee of India; Prime Minister Keizo Obuchi of Japan.

Remarks at the Dedication of the United States Secret Service Memorial Building

October 14, 1999

Thank you very much, Secretary Summers, Director Stafford, Commissioner Peck, Monsignor Vaghi, Ms. Worley, Congressman Kolbe and Congressman Hoyer, Sergeant at Arms Livingood, Mr. Berger, Secretary Johnson. And I especially appreciate the presence of three former Directors of the Secret Service here today, Eljay Bowron and John Magaw and Stu Knight. I thank them for coming.

I thank the Marines for giving us such wonderful music today. Didn't they do a great job? [Applause.] Thank you. I think that's the only thing I'm going to miss more

than Air Force One when I'm gone, having music everywhere I go, provided by the Marines. [Laughter]

I wanted to be here for a number of reasons today. At first, I just wanted to look out and see some friendly faces. I just finished a press conference. [Laughter] It's nice to do that. I wanted to see this beautiful building, and I knew I would be given the experience of seeing this beautiful building. I want to thank Larry Cockell for letting me come in the front door today. [Laughter] You know, usually when I go into a building the Secret Service makes me go into an underground parking garage, past all the garbage—[laughter]—up the service elevator. You think—the last time I went to the Hilton here, I have been in the service entrance so much that they had an employee in every section of the Hilton Hotel, in every part of—[inaudible]—they met me when I came in, and they gave me a laminated employee ID card. [Laughter] Just something else I owe to the Secret Service.

I also was hoping that I might get another invitation to try out some more of the Secret Service training that I got at Beltsville, with Hillary, a couple of years ago. We're still looking for that escape pod on Air Force One. We haven't found that yet. [Laughter]

I want to also say how much I appreciate the leadership that Brian is giving to the Secret Service. The only apprehension I had about his becoming the Director was that he wanted to extend the protection of the PPD to country music singers and motorcycle gangs—[laughter]—and I had to draw the line somewhere.

Actually, I came here most of all to say thanks. I compliment the architects, the contractors, and all those involved in the construction of this magnificent building. And I do believe it will reinforce all the values and sense of community that Brian talked about.

Harry Truman once said, the Secret Service was the only boss he had as President, with the exception of Mrs. Truman. And even when I don't like it, I have to admit that's true. And I came here to say thank you on behalf of Hillary and Chelsea and myself. I know Hillary wanted to be here today. I can't tell you how—I feel about the Secret

Service the way I sometimes feel about some of my friends in the Congress: I like them a lot more than they like me.

They've had to put up with me on so many different occasions, under such stress. You know, you wake up in the morning, and you're worried about something else, and you take it out by being a little short. You're impatient because you're tired and you've got a headache. They have to put up with all of it and act like you're still President, even when you're not acting like it; you're really being a person.

I think of all the sacrifices that the Secret Service and the PPD has made. I think about all these long, exhausting trips we take. I've seen the worried look in the agents' eyes whenever I get out and make some spontaneous stop into an unmaggged crowd. A lot of times at night, I'm working late, and I come down, and I walk in between—sometimes after midnight—between the office and the house, and the agents are always there. And I often wonder how many children they have and how hard it must be for them to be awake while their children are sleeping and sleeping while their children are awake.

Sometimes, I just worry that they're going to have a heart attack on the job. I never will forget the first time—all the Secret Service who have been in PPD know this—there's this sort of, this elaborate little electronic guard system out around the White House. And if anything triggers the alarm, if you'll forgive me, all hell breaks loose for the Secret Service. You know, they're convinced that, you know, 45 terrorists are storming the gates; they have to do it. That's why we're all so taken care of.

Anything, any little old thing, can trigger that deal. And I remember the first time that happened. I didn't know it. I was up on the third floor of the White House, and the Residence is on the second floor, and I didn't know what happens. So what happens is, the elevator stops, and the SWAT team occupies the staircase with their semiautomatic weapons.

So they're all looking for somebody that's invading the White House. I come tromping down the staircase to the third floor; this guy comes rushing up on the second floor. I look

up, and there he is with his weapon pointed at me, and I thought: This would be a heck of a note for the Secret Service. [Laughter] "Clinton killed by agent protecting the President." [Laughter] That poor—I think he still has nightmares about that. [Laughter]

We're all laughing about it, but this is a hard job. And it's an important job. And it's important, the protections that are provided to other people and all the other things the Secret Service does, and I want to say more about that in a moment. But especially, I want everyone to know—I want Larry and Donny and all the people on PPD and all their predecessors to know how profoundly grateful I am for the way my wife and my daughter and I have been treated and genuinely cared for and protected, whether we like it or not. It has made an enormous degree of difference in the confidence with which I think the American people can express toward their Government, and we are all in your debt.

I also want to thank you for naming this building after the 32 brave men and women who gave their lives in guarding our democracy and in whose memory the building now stands. Ten of those 32, I'm sad to say, lost their lives during my Presidency, including the 6 in the Oklahoma City bombing, one of the most difficult events in my life.

You have honored their memory in two ways: First, by naming this building in their honor; and second, by using this building to continue your mission and their mission. Most people know the Secret Service as these sort of mysterious, stone-faced figures that are either steely eyed or masked behind sexy sunglasses, protecting Presidents and visiting world leaders. They don't know much about the ongoing efforts of the Secret Service to protect the integrity of our financial system, but that's a proud history that stretches back 130 years now.

When our country was awash in counterfeit currency after the Civil War, America turned to the Secret Service. When three Presidents were assassinated in four decades, America turned to the Secret Service, broadening the mandate at the beginning of this century to include protective duties.

Now, with the new challenges we face in a new and rapidly changing world, America

still turns to the Secret Service. You are out there every day, fighting telecommunications fraud, credit card fraud, computer crimes, counterfeiting, abuses of Government programs, taking on your investigative and protective assignments across the country and all around the world.

Regardless of the times or the tasks, there has always been a thread of honor and integrity, trust, and true confident performance, also, a remarkable ability to adapt to change and challenge. Those values are symbolized in this building. It is a solid, solid building, standing on a firm foundation but looking toward the future.

So, today, I'm honored to join you in dedicating this building and honoring the memory of those who gave their lives for what you do every day and in saying a special, special word of profound appreciation for the many sacrifices so many have made for me and my family and our country.

Thank you very much.

NOTE: The President spoke at 4:47 p.m. in the Conference Center. In his remarks, he referred to Rev. Monsignor Peter J. Vaghi, pastor, St. Patrick's Church, who gave the invocation; and Debra L. Worley, headquarters consolidation project manager, and Larry Cockell, Special Agent-in-Charge, Presidential Protective Division, U.S. Secret Service.

Videotape Remarks to the National Summit on Community Food Security

October 14, 1999

Good afternoon, and thank you for taking the time to participate in this first-ever summit on community food security. Thank you, Secretary Glickman, for your leadership in this vital area.

Sometimes it's hard to comprehend that in the middle of the strongest peacetime economy in our Nation's history, when poverty is at a 20-year low and incomes are rising all across America, there are still people in our country who go to bed hungry. More than 3 million children suffer from hunger at some point during the year. And nearly 1 in 10 American households are at serious

risk that an expensive car repair or an unexpected rent increase could make them go hungry. That kind of deprivation is simply unacceptable in our land of plenty.

From the earned-income tax credit to Medicaid to child care, our administration has carried out a new approach to help lift people out of poverty by forging a new social contract that rewards work, promotes responsibility, and helps families who need it.

Last July, I took executive action to help families gain access to food stamps. Secretary Glickman is leading our efforts to launch a nationwide food stamp public education campaign, and all of you gathered here today are critically important to that effort. I ask each and every one of you to join with us in our partnership to ensure families get the help they need.

Our work is far from done. While the Federal Government continues to be deeply involved in the fight against hunger, our nutritional safety net alone can't conquer the problem.

The solution lies in new and innovative partnerships with grassroots efforts. For too long, Government programs haven't done enough to capitalize on community expertise. And likewise, community efforts have often not taken full advantage of the Government resources available to them. This conference is about building stronger partnerships, about bringing all the parties to the table and forming stronger ties among the Federal Government, State, local, and tribal governments, the private sector, nonprofit groups, the faith community, and private citizens. The more we work together, the better we can do in meeting the challenge of hunger.

Thank you again for your participation and for the hard work you do and the dedication you show every single day in the fight against hunger.

NOTE: The President's remarks were videotaped at approximately 2:50 p.m. on October 12 in Room 459 in the Old Executive Office Building for later transmission to the National Summit on Community Food Security, meeting in Chicago, IL, on October 14. A tape was not available for verification of the content of these remarks.

**Statement on the Nomination of
Gen. Ralph E. Eberhart To Be
Commander in Chief, United States
Space Command, and Related
Positions**

October 14, 1999

I am pleased to nominate Gen. Ralph E. Eberhart, United States Air Force, to be Commander in Chief, United States Space Command; Commander in Chief, North American Aerospace Defense Command; Commander, Air Force Space Command; and Department of Defense Manager for Space Transportation Systems Contingency Support. If confirmed by the Senate, General Eberhart will succeed Gen. Richard B. Myers.

General Eberhart currently serves as the Commander of the Air Combat Command. Over a distinguished career, General Eberhart has gained extensive operational and planning experience and demonstrated tremendous leadership ability. A Command Pilot, he commanded the 10th Tactical Fighter Squadron, the 363d Tactical Fighter Wing, U.S. Forces Japan, and the 5th Air Force, as well as Air Combat Command. His broad professional experience also includes significant tours on the Joint Staff and Air Staff in the Pentagon and on the staff of Commander in Chief, U.S. Air Forces, Europe.

General Eberhart assumes the post of Commander in Chief, United States Space Command, at a time when U.S. capabilities in space have become critical to our economic prosperity, our position of leadership in the world, and our national security. He will be charged with protecting and extending those capabilities, and as well as taking on new responsibilities for information operations. I have the utmost trust and confidence in his ability to do so.

**Statement on the Nomination of
Gen. Richard B. Myers To Be Vice
Chairman of the Joint Chiefs of Staff**

October 14, 1999

I am pleased to nominate Gen. Richard B. Myers, United States Air Force, to be Vice

Chairman of the Joint Chiefs of Staff. If confirmed by the Senate, General Myers will succeed Gen. Joseph J. Ralston.

General Myers currently serves as Commander in Chief, United States Space Command; Commander in Chief, North American Aerospace Defense Command; and Commander, Air Force Space Command. He brings to the position of Vice Chairman extensive operational and planning experience as well as proven leadership ability. During this distinguished career, General Myers commanded the 335th Tactical Fighter Squadron, the 325th Tactical Training Wing, the 1st Tactical Fighter Wing, U.S. Forces Japan, the 5th Air Force, and U.S. Pacific Air Forces. He is a Command Pilot with more than 3,900 flying hours, including combat missions in Vietnam. His broad professional experience also includes significant tours on the Joint Staff and Air Staff in the Pentagon.

General Myers assumes the post of Vice Chairman at a time of diverse challenges for our Armed Forces, ranging from preserving and enhancing military readiness to modernizing and transforming our forces to maintain our military superiority in the 21st century. I have the utmost trust and confidence in his ability to meet these challenges.

**Statement on the Nomination of
Gen. Joseph J. Ralston To Be
Supreme Allied Commander Europe**
October 14, 1999

I am pleased to announce that I have nominated Gen. Joseph J. Ralston, United States Air Force, to succeed Gen. Wesley K. Clark, United States Army, as Supreme Allied Commander Europe. This nomination is subject to the approval of the North Atlantic Council's Defense Planning Committee. Upon Defense Planning Committee approval of his nomination as Supreme Allied Commander Europe, I intend to send forward to Congress General Ralston's nomination to serve as Commander in Chief, United States European Command.

General Ralston's distinguished career spans three decades, with significant operational and policy experience. He established

impeccable credentials as a military commander while commanding the 68th Tactical Fighter Squadron, the 56th Tactical Training Wing, the U.S. Alaskan Command, the 11th Air Force, and the Air Combat Command. He has served with great distinction as Vice Chairman of the Joint Chiefs of Staff over the past 3½ years, providing excellent advice and support for two Joint Chiefs of Staff Chairmen and two Secretaries of Defense.

This is a time of significant change within the North Atlantic Alliance, as NATO continues the work of building a secure and undivided Europe. General Clark is doing an extraordinary job as Supreme Allied Commander Europe. He led Allied forces to a brilliant victory in Operation Allied Force and is demonstrating similarly impressive leadership as KFOR provides the security necessary to build a lasting and just peace in Kosovo. I know he will continue his dynamic leadership of NATO forces in Europe during the remainder of his tour. I have utmost confidence that General Ralston will be a worthy successor.

**Statement on the Death of Former
President Julius Nyerere of Tanzania**
October 14, 1999

On behalf of the American people, Hillary and I extend our deepest sympathies to the family of former President Julius Nyerere, to President Mkapa, and the people of Tanzania. President Nyerere's death is a great loss for Tanzania, for Africa, and for the international community as a whole.

President Nyerere was a pioneering leader for freedom and self-government in Africa. Many African leaders sought his guidance as they crafted their own new societies.

President Nyerere dedicated his life to a vision rooted in the belief that all people have a responsibility to protect those who cannot protect themselves. He practiced this ethic personally, aiding not only courageous African leaders but also ordinary victims of regional conflict; he opened Tanzania's borders to refugees from wars in Mozambique, Rwanda, Burundi, Congo, and Uganda.

President Nyerere's legacy of determination and compassion lives on in the generous

people of Tanzania today. We join our friends in Tanzania and Africa in celebrating his achievements and mourning his death. Our thoughts and prayers are with his family and his fellow citizens.

Memorandum on Individual Training Accounts for Federal Workers

October 14, 1999

Memorandum for the Director of the Office of Personnel Management

Subject: Individual Training Accounts for Federal Workers

Thank you for forwarding the options and recommendations of the Task Force on Federal Training Technology on establishing individual training accounts (ITAs) for Federal employees.

Your report provides a thoughtful and thorough review of the ways ITAs may be used to improve the quality of training available to Federal workers. The skills needed by Federal workers, the technologies available for training, and the institutions capable of delivering high-quality training are all changing rapidly. Individual employees may be in the best position to discover opportunities in this fast changing market; ITAs can give them needed flexibility.

Improving the efficiency and quality of Federal Government services in the years ahead will require educated workers to fill new jobs and allow incumbent workers to continuously upgrade their knowledge and skill base. We have an obligation to explore the use of new technologies to provide cost-effective, high-quality, and accessible training to ensure that we provide the kind of working environment that attracts and retains outstanding working men and women.

After reviewing your report, it is clear that ITAs merit further exploration because of their potential for improving Federal training. The Task Force points out that while a number of private firms, State governments, and foreign governments are currently implementing ITAs, the programs are not fully tested. I support the Task Force recommendation that Federal agencies should begin a series of pilot projects and

develop tools for evaluating their success. I therefore direct that OPM work with the Task Force to develop a guidance for agencies to use in developing and evaluating ITA pilot projects.

I understand that the Task Force also is making steady progress in developing recommendations for Federal agencies to make effective use of technology to improve training opportunities. I look forward to reviewing the final Task Force report and learning more about the development of the demonstrations of advanced learning technologies being proposed by the Executive departments. Particularly valuable are the Task Force's recommendations regarding how agencies can use their combined procurement power to stimulate development of high-quality training technologies conforming to standards used in commercial and university instruction. Your work will serve not only to strengthen the Federal workforce and ensure that the American taxpayers receive the best service possible, but can also accelerate the development of technologies useful in schools and companies throughout the Nation.

I appreciate your leadership, the commitment of the Task Force, and the dedicated service of your staff, particularly Emzell Blanton, the Executive Director of the Task Force, in ensuring the success of this important effort.

William J. Clinton

Remarks Honoring the NCAA Men's and Women's Basketball Champions

October 14, 1999

The President. Thank you very much. Well, ladies and gentlemen, welcome to the White House. I want to say a special word of welcome to Purdue Coach Carolyn Peck and UConn Coach Jim Calhoun and their wonderful teams. And we're honored to be joined by two Members of Congress from Connecticut, John Larson and Nancy Johnson. [*Applause*] Thank you.

Usually, you know, the Members of Congress, they stand in front of the team, and I shake hands with them, and then I go shake hands with the team. And I started shaking

hands with the UConn team, and Nancy Johnson was the fourth person in the line, and I wondered what position she could possibly have played. [Laughter]

Well, we're delighted that they're both here, and the two Connecticut Senators, Joe Lieberman and Chris Dodd were also here. They had to go vote, and they're going to try to get back before we finish. But we thank them for coming.

It's a great honor for me today to welcome the Purdue Lady Boilermakers and the UConn Huskies, two talented basketball teams who remained focused enough to win the most coveted prize in college basketball. It's a kind of a joke around the White House that I am a fanatic basketball fan, that I frequently misbehave during the NCAA tournament—[laughter]—especially if the Arkansas Razorbacks aren't playing well that year.

But I studied these teams very closely. I'd like to—I think that I would like to begin by making two acknowledgements that are important to the human element of basketball. First of all, the Lady Boilermakers lost one of their teammates, Tiffany Young, last August in a car accident, and her parents are here. And I'd like to acknowledge their presence and thank them for coming. Would you—well, they're here somewhere. There they are. [Applause] Thank you.

And in this week, I can't help noting that on Monday we lost one of the greatest basketball players of all time, Wilt Chamberlain, whose dedication, determination, and performance inspired countless Americans, most of whom never scored 100 points in a single game.

Wilt Chamberlain once said, in his rather wry and funny way, "They say nobody is perfect. Then, they tell you practice makes perfect. I wish they'd make up their mind." [Laughter] One thing is clear. With practice and talent, UConn and Purdue got pretty close to perfect. They both beat two very talented Duke Blue Devil teams.

This was a season of firsts. First time a men's team from New England had won the NCAA tournament since Harry Truman lived in the White House; the first time the Purdue women or the UConn men ever won a national championship.

Let me begin by saluting the Lady Boilermakers. All America was awed by your performance. I understand it was fueled by power naps and peanut butter. [Laughter] If that's true, I think I'll stay with them both. [Laughter]

They had a dazzling 34–1 season record. I told the coach when we were starting this that I happened to see one night, on television, their early-season victory against Tennessee. And—because, you know, Tennessee's coming here has become a kind of regular event—[laughter]—Coach Summitt and her husband and her wonderful son have become friends of ours. And Al Gore was in a slump the next day. [Laughter] And he said, "Well, they must have had an off night." And I said, "Al, I watched the game. They didn't have an off night." [Laughter] "That Purdue team is great. It's going to be hard for anybody to beat them." And it turned out to be right.

I want to mention the extraordinary contributions of the co-captains of the team. MVP Ukari Figgs turned around the final game with 18 points. All-American Stephanie White-McCarty amassed the second-highest number of points in the history of Purdue.

Basketball is a team effort. It depends upon everyone working together and relies heavily on good leadership. The Boilermakers had a lot of both. As the first African-American woman ever to win the NCAA championship as a coach, Carolyn Peck has demonstrated extraordinary leadership, carrying Purdue to two Big 10 tournament championships in only two seasons. And I'm glad she's back here with her team today. She's just finished her first season as a pro coach, where she missed the playoffs, I think she said, by one game. And next year is your second season; you've got to deliver. And we wish you well. [Laughter] So I'd like to call on Carolyn Peck and give her the microphone now. Thank you.

[A this point, Coach Peck made brief remarks.]

The President. I also want to acknowledge, before I leave the State of Indiana, the presence here of a man who has been my friend for 20 years, the former Senator from Indiana and the father of the current Senator

from Indiana, Mr. Birch Bayh. Thank you, Senator. Thank you. I'm glad to see you. Thank you.

Now, the Huskies. I watched them all year, too. They won 34 games, and they were supposed to be a big underdog in the championship. They had a team that was determined not to be defeated. Richard Hamilton's outside touch and the tough defensive play of Ricky Moore and Khalid El-Amin gave them a 77-74 down-to-the-wire thriller that will never be forgotten by people who love basketball.

I also want to say that I'm glad Richard is coming to Washington to help the Wizards. We need it. *[Laughter]* Jim Calhoun's achievements as the Huskies' coach are tremendous. He's the only coach in NCAA history to win 250 games at two different Division I programs. He's the winningest coach in UConn history, with the third most wins in all of college basketball in the last six seasons.

When I called Jim to congratulate him on the victory, we had a wonderful talk about a lot of things, and I'll always remember our conversation. But I told him, and I thought that the Duke coach, Mike Krzyzewski, gave him and these fine young men, the ultimate compliment; you can only imagine how disappointed he was. He has all those great players; they were supposed to win everything easily. It was a fabulous game.

The truth is, UConn was better than they thought they were. And it was—at a moment of enormous disappointment, he got before the national television cameras and he said, "We did not lose this game. We were defeated by a better team." And that says a lot about this coach and these players.

So, Coach, the microphone is yours.

[Coach Calhoun made brief remarks, and the team captains presented a jersey and ring to the President.]

The President. Look at this. I think it's a little big for me, don't you? *[Laughter]* Thank you. I really love this, thank you.

Now, when does practice start? *[Laughter]*

Coach Calhoun. I'll see you Saturday morning at 11.

The President. Thank you very much.

Coach Peck. Can we make a presentation?

The President. Sure. Give them another hand, guys. *[Applause]*

[Coach Peck and the team's senior captains presented a jersey to the President.]

The President. I can wear this. It's the right size, right? It's the right size. I love it.

[A Purdue senior captain thanked the President and congratulated the University of Connecticut Huskies.]

The President. You know, in a year and a half when I'm not President anymore, people will, all of a sudden, start treating me as an elder statesman or something, and they will all want my advice on various things. One of the things people ask me all the time is, isn't it hard to keep your feet on the ground and the sense of basic humility when, you know, the Secret Service are with you, you fly around on Air Force One, every need is just at your fingertips? And I think I will have two pieces of advice: One is, have regular press conferences; that'll cut you down to size. *[Laughter]* And the other is, always meet with the champions of the men and women's NCAA basketball tournament. They will make you feel very small.

Thank you very much.

NOTE: The President spoke at 6:08 p.m. in the East Room at the White House. In his remarks, he referred to Tiffany Young's parents, Gloria and Billy Ray Young, and Pat Summitt, coach, University of Tennessee Lady Volunteers.

Remarks on Unveiling Public Service Announcements on Youth Violence

October 15, 1999

The President. Thank you very much, Epatha; welcome back to the White House. She was here back in February, again trying to help children, when we unveiled the PSA to help our children get the health care they need. So she is becoming the Federal Government's number one volunteer for America's children, and we're grateful for her.

I think she knows that if she and the rest of us could do enough for our children in a preventive and preparatory way, we'd put

a lot of police officers and actors playing police officers out of work—[laughter]—because we wouldn't have nearly as much trouble. I thank you so much.

Attorney General Reno and Secretary Shalala, thank you both for your commitment to helping our children and to unifying our Government's resources—not having a lot of little, indistinct programs that are separate, one from another.

I want to thank all of those who are here supporting this campaign. Thank you, Dr. Roz Weinman, from NBC. Thank you for everything you've done. I want to thank the ADL national director, Abraham Foxman, the Human Rights Committee's executive director, Elizabeth Birch, the people from La Raza, and all the other groups that have supported this endeavor.

I'd also like to acknowledge the young people behind me. They're from Eastern High School in Washington, DC, and they are actively and personally working to prevent youth violence. They are the symbols of the people we are trying to empower with this public service campaign, and we ought to give them a hand. [Applause]

Six months ago next week we will observe the half-year anniversary of the tragedy at Littleton, Colorado. As awful as it was, we all know it was not an isolated event. We have seen since and we saw before—in a string of violent incidents at school and in the fact that 13 young people lose their lives every single day to gunshots, in ones and twos—that our children, notwithstanding the fact that we have the lowest crime rate in 26 years and a dramatic drop in the murder rate, are still subject to a nation that is too dangerous and can be made safer.

That is why we have asked every sector of our society to get involved in the search for solutions to youth violence, to hatred, to the absence of control, to environmental and cultural factors that need to be dealt with. We've asked people to help at home and school, in Hollywood and in the heartland, in our State capitals and in the Nation's Capital.

In August we helped launch the National Campaign Against Youth Violence, to pull together commitments from people and organizations from all different walks of life. Al-

though this new campaign is not even 2 months old, it has already made a remarkable start. Over the coming months, it will roll out a major media campaign, begin supporting anti-violence concerts and townhall meetings, in-school and after-school programs, and sponsor a city-by-city effort to shine a spotlight on the local initiatives that are producing the most promising results.

The executive director of this national campaign, Jeff Bleich, is here with us today. I introduced him when we named him, but I want to thank you again for your great work.

Today we are pleased and grateful that NBC is making its own commitment to protect our children from youth violence. As part of its "The More You Know" campaign, NBC has created a series of ads that speak to parents and children about how families can help to stop violence and hate before they start. I would like to now stop and show one of these ads, which features Epatha and her "Law & Order" colleague, Angie Harmon. So could we show the ad?

[At this point, the public service announcement was shown.]

The President. Thank you, thank you, and thank you. [Laughter]

This ad and others like it will be seen by millions of viewers every day. In clear and powerful terms, they will convey the message that stopping violence and intolerance begins at home. They say if you're a parent, you owe it to your children to sit down with them, to draw them out, to give them a comfortable opportunity to express their fears, to give you early warning if there's a problem you need to address.

The thing I like best about it is the message I think every parent ought to try to give every child: If you've done something wrong, tell me. It's okay. It's not the end of the world. Before it gets too bad, tell me.

As you saw, these ads also provide an 800 number and a web address, so viewers can immediately get the best advice from national organizations which deal with these issues every day.

I look forward to continuing to build on the progress that NBC, its national partners, and the fine actors who appear in this campaign have started. It's a wonderful example

of what you can accomplish, with the power of television, to send out positive messages to parents and children alike.

I also want to emphasize that we are going to change the way we in the Federal Government do our part, along the lines that the two Cabinet members here have long advocated. Youth violence has many origins and so many facets. Not just one but many of our Cabinet agencies are working to provide solutions. And they should be. They get contacted by people all over the country. Today I had this year and last year's winner of the Points of Light Award in the White House for pictures. And an enormous percentage of these national winners were people who were involved in trying to keep our kids out of trouble and give them good things to do.

So we see responses ranging from community policing to mental health to after-school programs to job opportunities. To respond to what Donna and Janet have talked to me about for years—Janet sent me another memo just a couple of weeks ago about how we've got to get the Government to work together on this—we are creating a new Youth Violence Council. The job of the Council will be to coordinate, accelerate, and amplify all the anti-violence efforts now coming out of our Cabinet agencies, so that they will work together, not at cross purposes; they will waste less money and make the money they have go further; and they will touch more children's lives.

So I want to thank you, Madame Attorney General, and you, Secretary Shalala, for your suggestion, and we will do this.

I also want to say again that it is my strong conviction that preventing youth violence requires Congress to do more. It has been 6 months since Littleton now. Congress has had more than ample time to analyze and act on the elements of this problem. They have had more than enough time to recognize that one of the biggest problems of intentional and accidental violence against our children is the appalling ease with which young people can gain access to guns.

And yet, after a very encouraging vote in the Senate last May—when the Vice President was able to break a tie and pass legislation that makes a lot of sense, among other things closing the Brady background check

loophole that didn't apply to gun shows and flea market gun sales—there has been no action, because the leadership has done nothing but delay.

So again, I say to the Republican leadership, I know this is a tough issue for you; I know that nobody likes to make the NRA mad looking towards the next election. But we—when I went to the American people in 1992 and I said, "Let's adopt the Brady bill, and let's ban assault weapons," and I told all the hunters in my home State—which is about half the people that breathe down there, me among them—[laughter]—I said, "Look, I'm telling you this will not affect hunting. This will not affect sporting events. It will make our country a safer place." It was an argument no one knew. It's not an argument anymore. We have the results.

The Brady bill has kept 400,000 people who had criminal records or otherwise should not have had handguns from getting them, and we have the lowest crime rate in 26 years. This is not an argument anymore. There is evidence. And we now know that a lot of people who shouldn't get these guns know they can go get them at a gun show or an urban flea market because there is no background check. There are loopholes in the assault weapons ban in terms of the importation of inappropriately sized magazines, of ammunition clips, and other problems that we ought to address. So I would say again, the time to act is now. The country overwhelmingly supports this.

I want to give the House a pat on the back again for passing a decent Patients' Bill of Rights last week. They had to break the stranglehold of an interest group that had the allegiance of their leadership. They have to do it again. But if they do it, they'll feel real good about it, just like they did last week. [Laughter] You know, this is another one of those issues—it's not a particularly partisan issue, except in Washington, DC. And we need to get free of all that and think about these kids.

I feel the same way about the hate crimes legislation. Since I first proposed the hate crimes bill—believe it or not, hundreds of Americans, like young Matthew Shepard in Wyoming or James Byrd in Texas, have been killed or injured simply because of who they

are, because of their race, their faith, because they're gay. And I think this is important for America and important for our leadership at home and around the world.

What do I spend my time on around the world? If I'm trying to deal with peace in Ireland, what am I trying to do? Get people over their religious—if we try to make peace and avoid another Rwanda in Africa, what are we trying to do? Get people of different tribes not to kill each other. If we're trying to make peace in Kosovo and Bosnia, what are we trying to do? Trying to get people over their ethnic and religious hatreds. And on and on and on.

This is a deep thing in the human psyche that has been with us since the dawn of time. And of course the most stunning example of all is the struggle we are still making to harmonize and reconcile the people of the Middle East, in the very heart of the place that gave birth to all three of the world's great religions that hold there is one creator, God.

Now, when America is a force in all these places but at home, you have to read that a guy that hates people that aren't just like him shoots a bunch of kids at a Jewish community center and then drives around and kills a Filipino postman working for the Federal Government—he got a two-for—the guy was an Asian and a Federal Government employee. And you read there is a guy that belongs to something in the Middle West that he called a church—even though they don't believe in God; they believe in the supremacy of white people—and he shoots a fine young man who was a basketball coach at Northwestern and then toodles down the road again and kills a young Korean Christian coming out of his church, and you see all these things happening.

It seems to me very hard to make the case that America, for our own sanity and our own humanity and for what we owe to the rest of the world, should not pass strong hate crimes legislation and do it without delay this year.

So again let me say, to every proposal someone can raise the objection, this will not solve every problem. If we did that, no one

would ever do anything constructive. That's like saying if you decided to go on a diet and you stay on it 3 days, you won't lose the 20 pounds you want to lose. That's like saying, don't do this because even though you should do this, even when you do it, there are three other things you should do.

I mean, all these arguments don't make any sense. Look, I'm proud of the fact that I had the chance to be President when Americans believed we could lower crime again and where we have a 26-year low in the crime rate. But we have the highest murder rate of any civilized country in the world, still. The rate of accidental deaths of children by gunshots is 9 times higher than the rate of the next 25 industrial economies combined.

What I'm trying to do with this PSA is to mobilize the American people to save our children, so the next President can say America is the safest big country in the world. Why don't we have a big goal here? It's nice to say that we've got the lowest crime rate in 26 years; maybe by the time I leave office, we can say it's the lowest in 30 years. Maybe we'll really be chugging along here.

But don't you want to really be able to say, every time you look at a young person like this fine young boy here in this beautiful red sweater—[laughter]—that this child should grow up in the safest big country on the face of the Earth? Let's have a goal worth fighting for, for our children. And let's mobilize people to do what can be done now, in their families, and let's have nobody run and hide from the responsibility we all have to give that gift to our children in the new millennium.

Thank you very much.

NOTE: The President spoke at 1:45 p.m. in the Presidential Hall (formerly Room 450) in the Old Executive Office Building. In his remarks, he referred to S. Epatha Merkerson and Angie Harmon, actors, NBC's "Law & Order"; Rosalyn Weinman, executive vice president, broadcast standards and content policy, NBC; Abraham H. Foxman, national director, Anti-Defamation League; and Jeff Bleich, executive director, National Campaign Against Youth Violence.

Memorandum on the White House Council on Youth Violence

October 15, 1999

Memorandum of the Attorney General, the Secretary of Labor, the Secretary of Health and Human Services, the Secretary of Education, the Assistant to the President for Domestic Policy

Subject: White House Council on Youth Violence

Violence by youth and against youth is an issue that deeply concerns us all. Youth violence can be thought of as a juvenile crime issue, as a public health issue, and as a school safety issue. It affects every region and demographic group. As many recent incidents have made us aware, it is a problem that can strike with unexpected force—and that now demands uncommonly unified responses. That is why I announced, on August 17, 1999, that a nonprofit, nonpartisan “National Campaign Against Youth Violence” had been established to bring together all segments of society to help prevent youth violence.

The Federal Government already addresses many aspects of youth violence through its programs. I am particularly proud of the joint efforts of the Attorney General, the Secretary of Health and Human Services, and the Secretary of Education in developing the Safe Schools/Healthy Students initiative. These agencies also worked well together to help us respond quickly to the Columbine High School incident. I have read with interest the report of the Attorney General’s Coordinating Council on Juvenile Justice and Delinquency Prevention. I look forward to the report that the Surgeon General in response to my May request is preparing on the causes of youth violence. The Secretary of Labor’s efforts to address the needs of youth are also about to bear fruit, as high-poverty communities implement our new Youth Opportunity Grants, and as the Secretary and the Attorney General finalize their agreement for cooperative work on those grants and on Labor’s Youth Offender grant program.

With so many agencies and programs involved, and with the need for my Administration to work closely with different elements

of State and local governments, tribes, schools, community groups, and families, it has become increasingly clear to me that the Federal Government needs a more effective policy coordination strategy for youth violence issues. Therefore, today I direct the Assistant for Domestic Policy to form a White House Council on Youth Violence to provide this policy coordination, to provide flexible and timely responses to the challenge of youth violence, and to ensure that our Nation’s citizens are able to benefit from the Federal Government’s many antiviolence initiatives.

Structure of the Council

The Assistant to the President for Domestic Policy will chair the Council. The Office of the Vice President and the Office of Management and Budget will be regular participants. Four agency heads will be the regular program members of the Council:

- The Attorney General, responding to the juvenile crime aspects;
- The Secretary of Health and Human Services, responding to the public health aspects, including mental health aspects, and to family issues;
- The Secretary of Education, responding to the school safety issues; and
- The Secretary of Labor, responding to youth employment and out-of-school youth issues.

The Chair of the Council may add such other officials as he deems appropriate to further the purposes of this overall effort or to participate in specific aspects of it. For example, matters relating to public health aspects would involve the Surgeon General. Matters relating to firearms control or drug abuse would involve the Secretary of the Treasury and the Director of National Drug Control Policy, respectively. Implications for economic development policies would call for involvement of the Secretary of Housing and Urban Development, the Secretary of Agriculture, and the Secretary of Commerce. Comparable policies for Indian country would engage the Secretary of the Interior. Issues relating to community service opportunities for youth would involve the Chief Executive Officer of the Corporation for National and Community Service.

The Chair, after consultation with Council members, will appoint staff members to coordinate the Council's efforts. The Chair may call upon the participating agencies for logistical support to the Council, as necessary.

Duties of the Council

1. *Develop a citizen's information hub.* The Council will develop and maintain a coordinated inventory of relevant agency programs and provide analyses of their effectiveness. It will make this inventory widely available in summary form—and upon request in more detail—through the services of the appropriate Council member, to elected officials, community groups, police organizations, school systems, parents, and others working on local solutions to these issues. The inventory and full texts of program reports and evaluations should be available on an easily accessible website. The availability of this compilation will be widely publicized.

2. *Produce reports on youth violence.* The Council will prepare or have prepared reports on various aspects of the problem of youth violence, describing, for instance, best practices in combating the problem. In doing so, the Council should consult with non-profits, foundations, and other organizations that have conducted research and/or developed resources on the prevention of youth violence. In addition, the Surgeon General is now carrying out a broad study of the potential causes of youth violence. I ask that the Surgeon General consult closely with the Council in the development of the study so that I may have the benefit of participation of all the involved agencies in its analysis and findings.

3. *Expand the Safe Schools/Healthy Students model of collaboration.* This initiative of the Departments of Justice, Education, and Health and Human Services has evolved into a highly effective collaboration among the agencies. The Council will oversee this effort and examine options for improving its operations and applying the model to other governmental efforts. The Secretary of Labor will begin participation in the initiative through establishing linkages to Youth Opportunities and Youth Offender grants.

4. *Provide tools for parents to deal with the issue.* Many Federal programs address issues relating to strengthening the family and helping parents raise children. The Council will explore the possibility of devising a cross-program strategy to help parents address youth violence. It will also report on new tools emerging in both the private and public sectors to assist parents.

5. *Coordinate the Federal research agenda.* The Council will oversee coordination of agency research agendas and the development of needed cross-agency research collaborations. I ask the Council to seek to have this structure in place to support the planning for FY 2001 research funds, and where feasible, to improve the planned use of funds available from prior years.

6. *Develop further policy responses.* The Council will meet at the call of the Chair to discuss new findings from analyses of the youth violence issue and to consider new or modified Administration responses to it, especially those that involve more than one agency. Recommendations for initiatives will be discussed in the Council for consistency with overall coordinated policy before being presented for formal decision in the budget process. From time to time, the Council will report to me directly on the results of its efforts.

William J. Clinton

Joint United States-Norway Statement

October 15, 1999

The President and the Prime Minister met today at the White House to review the many accomplishments of the enduring U.S.-Norwegian partnership and to explore new areas of cooperation.

Transatlantic solidarity and mutual security in NATO form the core of the U.S.-Norwegian relationship. President Clinton reaffirmed the strong U.S. commitment to the security and defense of Norway. The two leaders reiterated their commitments to the Washington Summit's vision of an Alliance devoted to collective defense, capable of addressing current and future challenges, strengthened by and open to new members, and working with others in a mutually reinforcing way to enhance Euro-Atlantic security and stability. They also reaffirmed their commitment to strengthen European security and defense capabilities for crisis management.

The Prime Minister and the President expressed satisfaction that the concerted action of the NATO Alliance achieved an end to Milosevic's campaign of ethnic cleansing in Kosovo and created the conditions for the safe return of refugees. They reaffirmed their strong commitment to democracy and the rule of law in Kosovo, and their support for the Stability Pact for Southeastern Europe as a means of achieving lasting peace and stability in the region.

The President congratulated the Prime Minister on Norway's essential contributions as Chairman-in-Office of the OSCE. The two leaders underscored the importance of arms control, in particular the 30-nation Treaty on Conventional Armed Forces in Europe (CFE). The United States and Norway agreed to intensify their efforts, together with other Treaty partners, to reach agreement on adaptation of the CFE Treaty for signature by Heads of State and Government at the November 18-19 OSCE Summit in Istanbul.

The United States and Norway share a vital interest in the development of a democratic, prosperous, and stable Russia. Russia has an opportunity to further entrench its transition to democracy by ensuring free and fair elections in the coming months for its parliament and president. The President and the Prime Minister recognized Russia's struggle against terrorism and reaffirmed their support for Russia's territorial integrity. They urged a constructive dialogue between the Russian government and legitimate leaders in the North Caucasus that could lead to peaceful resolution of conflict, and called

on all concerned to avoid indiscriminate use of force and to respect human rights. The Prime Minister and the President agreed that increased international efforts are called for to deal with the problem of nuclear waste in Russia, including that from decommissioned nuclear submarines. The two leaders called on Russia to accept the 1993 amendment to the London Convention that establishes a mandatory moratorium on all dumping of radioactive waste at sea. They welcomed increased international cooperation through the Arctic Council and the Arctic Military Environmental Cooperation Program. Working closely with local governments and communities, they pledged to promote sustainable development and protection of the fragile Arctic environment.

The two leaders expressed satisfaction with the work of the Barents and Baltic Sea States Councils and the extensive U.S.-Norway cooperation under the U.S. Northern European Initiative. They underlined the importance of fully integrating the Baltic countries into the European and trans-Atlantic community, and agreed to continue support for language training programs in Latvia and Estonia to foster social integration.

The Prime Minister and the President share concern over the growing dangers to international security posed by the proliferation of small arms and light weapons in areas of conflict and post-conflict. They announced the establishment of a Norway-U.S. working group to marshal support for nations which agree to destroy surplus small arms.

The two leaders noted the extensive U.S.-Norwegian commercial relationship and affirmed that the United States and Norway attach great importance to the upcoming WTO round in Seattle. They recognized Norway's role as a major international supplier of oil and gas to the world, and agreed U.S. industry will remain a key partner in petroleum production on the Norwegian continental shelf.

The President expressed his appreciation for Norway's strong support of the Middle East peace process through the Oslo process, and saluted Norway's leadership role in the Palestinian donor effort. The two leaders agreed to intensify their efforts to achieve a lasting settlement in the Middle East and

other conflict areas. They stressed the need to strengthen the United Nations' capabilities in responding to the challenges of a new Millennium. They agreed that the protection of human rights and dignity, eradication of poverty, and the safeguarding of the global environment were crucial to continued progress. The two leaders agreed to work together to reduce the debt of heavily-indebted poor countries and increase the support among creditors to maximize the benefits of the debt reduction initiative.

Finally, the two leaders agreed to continue the excellent cooperation between the two countries through ongoing dialogue on the full range of bilateral, regional and global issues that join the United States and Norway.

Proclamation 7240—White Cane Safety Day, 1999

October 15, 1999

By the President of the United States of America

A Proclamation

The white cane is widely recognized as a symbol of independence for people who are blind or visually impaired. This simple device has given freedom to generations of blind Americans by enabling them to move through their communities with greater ease, confidence, and safety.

Dr. Kenneth Jernigan, former President of the National Federation of the Blind who died just a year ago this month, was an early advocate of the white cane and the full integration of blind people into every aspect of society. Dr. Jernigan used the white cane himself and recognized its power as a means to allow blind people to leave the confines of their homes for the outside world—to go to school and to work and to make ever-greater contributions to their communities.

Thanks to enormous advances in technology, people who are blind or visually impaired now have additional tools—such as voice recognition software, computer screen readers, and braille translators—to assist

them in carrying out their responsibilities on the job. My Administration has proposed increased investment in such assistive technology as well as a \$1,000 tax credit to help people with disabilities offset the cost of special transportation requirements and work-related expenses. I have also strongly urged the Congress to pass the Work Incentives Improvement Act so that Americans with disabilities can go to work without jeopardizing their Medicare or Medicaid coverage.

We can be heartened today that many barriers to full inclusion for blind Americans have been dismantled. But the greatest barrier still remains: the attitude of too many sighted people that those who are blind or visually impaired are incapable of holding their own in the working world. On White Cane Safety Day, let us reaffirm our national commitment to providing equal opportunity for all Americans, regardless of disability.

To honor the many achievements of blind and visually impaired citizens and to recognize the white cane's significance in advancing independence, the Congress, by joint resolution approved October 6, 1964, has designated October 15 of each year as "White Cane Safety Day."

Now, Therefore, I, William J. Clinton, President of the United States of America, do hereby proclaim October 15, 1999, as White Cane Safety Day. I call upon the people of the United States, government officials, educators, and business leaders to observe this day with appropriate programs, ceremonies, and activities.

In Witness Whereof, I have hereunto set my hand this fifteenth day of October, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

Proclamation 7241—National Forest Products Week, 1999

October 15, 1999

*By the President of the United States
of America*

A Proclamation

From our earliest days as a Nation, America's forests have played a vital role in fostering our country's economic strength and enhancing the quality of our lives. American Indians and European settlers alike found in our forests the fuel and material for shelter to sustain their families and communities. From those same forests came timber for our fleets of sailing ships and the ties for our railroads that span the continent. Whether working in lumber mills or paper mills, for furniture manufacturers or the building industry, generations of Americans have earned their livelihood from the bounty of our forests.

Forests bring more, however, to our lives than economic prosperity. They provide invaluable habitat for a variety of plants and animals, help to keep our air and water clean, and promote soil stability. They also renew our spirits by offering us a place to experience the beauty, peace, and diversity of the natural world.

As our Nation has grown and developed, so too have our demands on our forests. We can be grateful that, despite decades of exploitation, forests still comprise as much as one-third of our country's land area today. Thanks to innovative management techniques, individual and corporate commitment to recycling, and close cooperation between Federal, State, and private land owners, we are succeeding in sustaining the health and productivity of these precious natural resources. Through continued wise stewardship, we can ensure that future generations of Americans will have the same opportunities to share the beauty and bounty of our forests as we enjoy today.

To recognize the importance of our forests in ensuring the long-term welfare of our Nation, the Congress, by Public Law 86-753 (36 U.S.C. 123), has designated the week beginning on the third Sunday in October of each year as "National Forest Products

Week" and has authorized and requested the President to issue a proclamation in observance of this week.

Now, Therefore, I, William J. Clinton, President of the United States of America, do hereby proclaim October 17 through October 23, 1999, as National Forest Products Week. I call upon all Americans to observe this week with appropriate ceremonies and activities.

In Witness Whereof, I have hereunto set my hand this fifteenth day of October, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

NOTE: This proclamation will be published in the *Federal Register* on October 19.

Digest of Other White House Announcements

The following list includes the President's public schedule and other items of general interest announced by the Office of the Press Secretary and not included elsewhere in this issue.

October 9

In the afternoon, the President returned to Washington, DC, from Chicago, IL.

October 10

In the afternoon, the President went to Camp David, MD.

October 12

In the morning, the President returned to Washington, DC.

In the afternoon, the President met with King Abdullah of Jordan.

October 13

In the morning, the President traveled to George Washington National Forest, VA, and in the afternoon, he returned to Washington, DC.

The President announced his intention to appoint Jennifer L. Hernandez as a member of the Board of Directors of the Presidio Trust.

October 14

The President announced his intention to appoint Kumiki Gibson as a member of the District of Columbia Commission on Judicial Disabilities and Tenure.

October 15

In the morning, the President met with Prime Minister Kjell Bondevik of Norway.

The President announced his intention to nominate Herschelle S. Challenor to be a member of the National Security Education Board.

The President announced the nomination of Charles L. Kolbe to the Internal Revenue Service Oversight Board.

The President declared a major disaster in Arizona and ordered Federal aid to supplement State and local recovery efforts in the area struck by severe storms, flooding, and high winds on September 14–23.

The President declared a major disaster in Florida and ordered Federal aid to supplement State and local recovery efforts in the area struck by Hurricane Irene on October 14, and continuing.

Nominations Submitted to the Senate

The following list does not include promotions of members of the Uniformed Services, nominations to the Service Academies, or nominations of Foreign Service officers.

Submitted October 14

Charles L. Kolbe,
of Iowa, to be a member of the Internal Revenue Service Oversight Board for a term of 3 years (new position).

Checklist of White House Press Releases

The following list contains releases of the Office of the Press Secretary that are neither printed as

items nor covered by entries in the Digest of Other White House Announcements.

Released October 12

Transcript of a press briefing by Press Secretary Joe Lockhart

Released October 13

Transcript of a press briefing by National Economic Council Director Gene Sperling, U.S. Trade Representative Charlene Barshefsky, and Agriculture Secretary Daniel Glickman on the trade agenda

Transcript of remarks to the pool by Council on Environmental Quality Chairman George Frampton on protection of forest “roadless” areas

Released October 14

Statement by the Press Secretary announcing that the First Family has secured substitute financing for the purchase of their Chappaqua, NY, home

Released October 15

Transcript of a press briefing by Press Secretary Joe Lockhart

Statement by the Press Secretary: Visit by Panamanian President Mireya Moscoso

Acts Approved by the President

Approved October 9
